NOTE duration: "00:00:59.605" NOTE Confidence: 0.9686258

 $00:00:00.080 \longrightarrow 00:00:01.680$  I'm a breast cancer surgeon,

NOTE Confidence: 0.9686258

 $00:00:01.680 \longrightarrow 00:00:03.220$  so I take care of

NOTE Confidence: 0.9686258

00:00:03.360 --> 00:00:05.359 primarily breast cancer patients, but

NOTE Confidence: 0.9686258

 $00:00:05.359 \longrightarrow 00:00:06.720$  I also take care of

NOTE Confidence: 0.9686258

00:00:06.720 --> 00:00:08.240 patients who don't have breast

NOTE Confidence: 0.9686258

 $00:00:08.240 \longrightarrow 00:00:09.780$  cancer but may have

NOTE Confidence: 0.9339661

 $00:00:10.080 \longrightarrow 00:00:11.780$  benign disease in the breast,

NOTE Confidence: 0.9339661

 $00:00:11.840 \longrightarrow 00:00:13.139$  such as an infection,

NOTE Confidence: 0.9960257

00:00:13.599 --> 00:00:14.905 or I also take care

NOTE Confidence: 0.9960257

 $00:00:14.905 \longrightarrow 00:00:16.025$  of women who are at

NOTE Confidence: 0.9960257

 $00{:}00{:}16.025 \dashrightarrow 00{:}00{:}17.545$  high risk for developing breast

NOTE Confidence: 0.9960257

 $00{:}00{:}17.545 \dashrightarrow 00{:}00{:}18.985$  cancer. When we treat breast

NOTE Confidence: 0.9960257

 $00:00:18.985 \longrightarrow 00:00:20.185$  cancer, one of the most

NOTE Confidence: 0.9960257

 $00:00:20.185 \longrightarrow 00:00:21.625$  important things is to find

NOTE Confidence: 0.9960257

 $00:00:21.625 \longrightarrow 00:00:22.904$  out what type of breast

NOTE Confidence: 0.9960257

00:00:22.904 --> 00:00:24.364 cancer a woman has.

NOTE Confidence: 0.9836204

00:00:24.744 --> 00:00:26.585 Most breast cancers are hormone

NOTE Confidence: 0.9836204

 $00:00:26.585 \longrightarrow 00:00:28.205$  sensitive or estrogen sensitive,

NOTE Confidence: 0.99548054

 $00:00:28.939 \longrightarrow 00:00:30.699$  and those cancers typically are

NOTE Confidence: 0.99548054

 $00:00:30.699 \longrightarrow 00:00:32.219$  treated with a combination of

NOTE Confidence: 0.99548054

 $00:00:32.219 \longrightarrow 00:00:32.719$  surgery

NOTE Confidence: 0.9949454

 $00:00:33.260 \longrightarrow 00:00:35.180$  and a medication that will

NOTE Confidence: 0.9949454

00:00:35.180 --> 00:00:36.320 target the estrogen

NOTE Confidence: 0.99608386

 $00:00:36.699 \longrightarrow 00:00:37.199$  that's

NOTE Confidence: 0.996366

 $00{:}00{:}37.579 \dashrightarrow 00{:}00{:}38.800$  stimulating the cancer.

NOTE Confidence: 0.9888696

 $00:00:39.420 \longrightarrow 00:00:39.920$  Fortunately,

NOTE Confidence: 0.99849045

00:00:40.379 --> 00:00:41.199 breast cancer

NOTE Confidence: 0.9912218

 $00{:}00{:}41.899 \dashrightarrow 00{:}00{:}43.955$  is usually a curable disease.

NOTE Confidence: 0.9912218

 $00:00:43.955 \longrightarrow 00:00:45.635$  It's a highly treatable disease

NOTE Confidence: 0.9912218

 $00:00:45.635 \longrightarrow 00:00:46.935$  with good outcomes

NOTE Confidence: 0.97680455

 $00:00:47.315 \longrightarrow 00:00:48.355$  so that I can take

NOTE Confidence: 0.97680455

 $00:00:48.355 \longrightarrow 00:00:50.195$  care of a woman and

NOTE Confidence: 0.97680455

00:00:50.195 --> 00:00:51.715 then continue to follow her

NOTE Confidence: 0.97680455

00:00:51.715 --> 00:00:53.155 for the rest of her

NOTE Confidence: 0.97680455

00:00:53.155 --> 00:00:54.455 life along with,

NOTE Confidence: 0.9995035

 $00:00:55.075 \longrightarrow 00:00:55.815$  my team.
