NOTE duration: "00:02:08.7250000"

NOTE language:en-us

NOTE Confidence: 0.845489140000001

 $00:00:00.000 \longrightarrow 00:00:02.580$ Cervical cancer is a gynaecologic

NOTE Confidence: 0.845489140000001

 $00:00:02.580 \longrightarrow 00:00:05.160$ malignancy where women are affected

NOTE Confidence: 0.845489140000001

 $00:00:05.239 \longrightarrow 00:00:08.382$ by a cancerous growth on their cervix

NOTE Confidence: 0.845489140000001

 $00{:}00{:}08.382 \dashrightarrow 00{:}00{:}11.173$ and it's unfortunately the third most

NOTE Confidence: 0.845489140000001

 $00:00:11.173 \longrightarrow 00:00:13.453$ common gynaecologic malignancy that we

NOTE Confidence: 0.845489140000001

 $00:00:13.453 \longrightarrow 00:00:16.568$ see and trade in the United States.

NOTE Confidence: 0.83999455

00:00:21.830 --> 00:00:24.010 Women who have multiple

NOTE Confidence: 0.83999455

 $00{:}00{:}24.010 \dashrightarrow 00{:}00{:}26.620$ sexual partners and who have

NOTE Confidence: 0.83999455

00:00:26.620 --> 00:00:29.900 more exposure to HPV virus are

NOTE Confidence: 0.83999455

 $00:00:29.900 \longrightarrow 00:00:32.750$ higher risk for cervical cancer.

NOTE Confidence: 0.83999455

 $00:00:32.750 \longrightarrow 00:00:36.146$ Also, the women with less health

NOTE Confidence: 0.83999455

 $00:00:36.146 \longrightarrow 00:00:39.446$ compliance and health literacy are at

NOTE Confidence: 0.83999455

 $00:00:39.446 \longrightarrow 00:00:42.028$ increased risk for cervical cancer.

NOTE Confidence: 0.84835196

 $00:00:47.000 \longrightarrow 00:00:48.580$ The solution to preventing

NOTE Confidence: 0.84835196

 $00{:}00{:}48.580 \dashrightarrow 00{:}00{:}50.555$ cervical cancer comes from health

NOTE Confidence: 0.84835196

 $00{:}00{:}50.555 \dashrightarrow 00{:}00{:}52.290$ compliance and cervical screening,

NOTE Confidence: 0.84835196

 $00:00:52.290 \longrightarrow 00:00:55.944$ which might be employed in one or many ways.

NOTE Confidence: 0.84835196

00:00:55.950 --> 00:00:58.875 The most common way that we do use in

NOTE Confidence: 0.84835196

 $00:00:58.875 \longrightarrow 00:01:02.058$ the United States is cervical cytology,

NOTE Confidence: 0.84835196

 $00:01:02.060 \longrightarrow 00:01:04.030$ meaning cervical pap smears when

NOTE Confidence: 0.84835196

 $00:01:04.030 \longrightarrow 00:01:06.000$ women present to their annual

NOTE Confidence: 0.84835196

 $00{:}01{:}06.063 \dashrightarrow 00{:}01{:}08.158$ exams to see their gynecologists.

NOTE Confidence: 0.84835196

00:01:08.160 --> 00:01:11.416 They get the pop smear from the cervix,

NOTE Confidence: 0.84835196

 $00{:}01{:}11.420 \dashrightarrow 00{:}01{:}13.048$ which can detect precancerous

NOTE Confidence: 0.84835196

 $00:01:13.048 \longrightarrow 00:01:15.784$ cells and give us a latency, or.

NOTE Confidence: 0.84835196

 $00:01:15.784 \longrightarrow 00:01:17.548$ You know window where we can

NOTE Confidence: 0.84835196

 $00:01:17.548 \longrightarrow 00:01:19.249$ intervene and prevent these cancers?

NOTE Confidence: 0.8436693

 $00:01:24.440 \longrightarrow 00:01:26.264$ There are many advances,

NOTE Confidence: 0.8436693

00:01:26.264 --> 00:01:28.092 both prevention and therapeutic

NOTE Confidence: 0.8436693

 $00:01:28.092 \longrightarrow 00:01:29.920$ phases of cervical cancer.

NOTE Confidence: 0.8436693

 $00{:}01{:}29.920 \dashrightarrow 00{:}01{:}32.984$ The one that we are most excited about

NOTE Confidence: 0.8436693

 $00{:}01{:}32.984 \dashrightarrow 00{:}01{:}36.221$ as far as Preventionist concern is

NOTE Confidence: 0.8436693

 $00:01:36.221 \longrightarrow 00:01:38.605$ the prophylactic vaccinations that

NOTE Confidence: 0.8436693

00:01:38.605 --> 00:01:41.753 we have been fortunate enough to use

NOTE Confidence: 0.8436693

00:01:41.753 --> 00:01:45.574 in the US for a decade or over now,

NOTE Confidence: 0.8436693

 $00:01:45.574 \longrightarrow 00:01:48.004$ and these vaccinations are extremely

NOTE Confidence: 0.8436693

 $00:01:48.004 \longrightarrow 00:01:50.746$ efficacious since they give the human

NOTE Confidence: 0.8436693

 $00:01:50.746 \longrightarrow 00:01:52.926$ immunity against the most commonly.

NOTE Confidence: 0.8436693

 $00:01:52.930 \longrightarrow 00:01:55.690$ Seen HPV virus types and therefore

NOTE Confidence: 0.8436693

 $00{:}01{:}55.690 \dashrightarrow 00{:}01{:}58.405$ we can easily prevent this cancer

NOTE Confidence: 0.8436693

00:01:58.405 --> 00:02:01.140 in young women by oxygenating them.
