NOTE duration:"00:02:08.7250000"

NOTE language:en-us

NOTE Confidence: 0.852742850780487

00:00:00.000 --> 00:00:02.775 Cervical cancer is a gynaecologic

NOTE Confidence: 0.852742850780487

 $00:00:02.775 \rightarrow 00:00:06.126$  malignancy where women are affected by

NOTE Confidence: 0.852742850780487

 $00{:}00{:}06{.}126 \dashrightarrow 00{:}00{:}09{.}072$  a cancerous growth on their service

NOTE Confidence: 0.852742850780487

 $00{:}00{:}09{.}072 \dashrightarrow 00{:}00{:}11.608$  and it's unfortunately the third

NOTE Confidence: 0.852742850780487

00:00:11.608 --> 00:00:13.572 most common gynaecologic malignancy

NOTE Confidence: 0.852742850780487

 $00{:}00{:}13.572 \dashrightarrow 00{:}00{:}16.970$  that we see and trade in the

NOTE Confidence: 0.842312422665683

00:00:16.970 -> 00:00:20.140 United States. Women who have

NOTE Confidence: 0.842312422665683

 $00:00:20.140 \longrightarrow 00:00:23.830$  multiple sexual partners and who have

NOTE Confidence: 0.839994549751282

 $00{:}00{:}23.830 \dashrightarrow 00{:}00{:}27.586$  more exposure to HPV virus are

NOTE Confidence: 0.839994549751282

00:00:27.586 --> 00:00:31.010 higher risk for cervical cancer.

NOTE Confidence: 0.839994549751282

 $00:00:31.010 \longrightarrow 00:00:34.395$  Also, the women with less

NOTE Confidence: 0.839994549751282

00:00:34.395 --> 00:00:37.103 health compliance and health

NOTE Confidence: 0.839994549751282

 $00:00:37.103 \rightarrow 00:00:40.148$  literacy are at increased risk

NOTE Confidence: 0.846502661705017

 $00:00:40.150 \longrightarrow 00:00:43.170$  for cervical cancer. The solution

NOTE Confidence: 0.846502661705017

 $00:00:43.170 \longrightarrow 00:00:45.586$  to preventing cervical cancer

NOTE Confidence: 0.849756717681885

 $00:00:45.590 \longrightarrow 00:00:46.979$  comes from health

NOTE Confidence: 0.849756717681885

 $00:00:46.980 \rightarrow 00:00:48.952$  compliance and cervical screening,

NOTE Confidence: 0.849756717681885

 $00:00:48.952 \rightarrow 00:00:52.980$  which might be employed in one or many ways.

NOTE Confidence: 0.849756717681885

 $00:00:52.980 \longrightarrow 00:00:56.301$  The most common way that we do use in

NOTE Confidence: 0.849756717681885

 $00:00:56.301 \rightarrow 00:00:59.910$  the United States is cervical cytology,

NOTE Confidence: 0.849756717681885

 $00:00:59.910 \rightarrow 00:01:02.145$  meaning cervical pap smears when

NOTE Confidence: 0.849756717681885

00:01:02.145 --> 00:01:04.380 women present to their annual

NOTE Confidence: 0.849756717681885

 $00:01:04.458 \rightarrow 00:01:06.838$  exams to see their gynecologists.

NOTE Confidence: 0.849756717681885

 $00:01:06.840 \rightarrow 00:01:10.536$  They get the pop smear from the cervix,

NOTE Confidence: 0.849756717681885

 $00:01:10.540 \longrightarrow 00:01:12.825$  which can detect precance rous cells

NOTE Confidence: 0.849756717681885

 $00:01:12.825 \longrightarrow 00:01:16.130$  and give give us a latency or.

NOTE Confidence: 0.849756717681885

 $00{:}01{:}16.130 \dashrightarrow 00{:}01{:}19.077$  You know window where we can intervene

NOTE Confidence: 0.846786886453629

 $00:01:19.080 \longrightarrow 00:01:20.964$  and prevent these cancers?

NOTE Confidence: 0.846786886453629

 $00:01:20.964 \rightarrow 00:01:22.848$  There are many advances,

NOTE Confidence: 0.846786886453629

 $00:01:22.850 \longrightarrow 00:01:25.430$  both prevention and the rapedic phases

NOTE Confidence: 0.841642618179321

 $00:01:25.430 \longrightarrow 00:01:26.834$  of cervical cancer.

NOTE Confidence: 0.841642618179321

 $00{:}01{:}26.834 \dashrightarrow 00{:}01{:}30.840$  The one that we are most excited about

NOTE Confidence: 0.841642618179321

 $00{:}01{:}30{.}840 \dashrightarrow 00{:}01{:}34{.}626$  as far as Preventionist concern is

NOTE Confidence: 0.841642618179321

 $00:01:34.626 \longrightarrow 00:01:37.044$  the prophylactic vaccinations that

NOTE Confidence: 0.841642618179321

 $00:01:37.044 \rightarrow 00:01:40.068$  we have been fortunate enough to use NOTE Confidence: 0.841642618179321

00:01:40.068 - 00:01:44.559 in the US for a decade or over now,

NOTE Confidence: 0.841642618179321

 $00:01:44.560 \rightarrow 00:01:47.120$  and these vaccinations are extremely

NOTE Confidence: 0.841642618179321

 $00{:}01{:}47{.}120 \dashrightarrow 00{:}01{:}50{.}275$  efficacious since they give the human

NOTE Confidence: 0.841642618179321

 $00{:}01{:}50.275 \dashrightarrow 00{:}01{:}52.850$  immunity against the most commonly.

NOTE Confidence: 0.841642618179321

 $00:01:52.850 \longrightarrow 00:01:56.665$  Seen HPV virus types and therefore we NOTE Confidence: 0.841642618179321

 $00{:}01{:}56.665 \dashrightarrow 00{:}02{:}00.480$  can easily prevent this cancer in young

NOTE Confidence: 0.77857106924057

 $00:02:00.480 \longrightarrow 00:02:02.660$  women by oxygenating them.
