WEBVTT

NOTE duration: "00:59:09.4830000"

NOTE language:en-us

NOTE Confidence: 0.825476512857143

00:00:00.000 --> 00:00:05.215 OK, why don't we? Oh, get started.

NOTE Confidence: 0.825476512857143

 $00:00:05.220 \longrightarrow 00:00:07.848$ We have a good number of

NOTE Confidence: 0.825476512857143

 $00:00:07.848 \longrightarrow 00:00:10.110$ people on the line now.

NOTE Confidence: 0.825476512857143

 $00:00:10.110 \longrightarrow 00:00:11.890$ Welcome to grand rounds.

NOTE Confidence: 0.825476512857143

 $00:00:11.890 \longrightarrow 00:00:13.674$ Today May 18th, 2021.

NOTE Confidence: 0.825476512857143

00:00:13.674 --> 00:00:16.338 We're focusing on GI cancers today,

NOTE Confidence: 0.825476512857143

 $00{:}00{:}16.340 \dashrightarrow 00{:}00{:}18.092$ challenges an opportunities and

NOTE Confidence: 0.825476512857143

00:00:18.092 --> 00:00:20.282 we'll hear from two members

NOTE Confidence: 0.825476512857143

 $00{:}00{:}20.282 \dashrightarrow 00{:}00{:}22.568$ of that newly formed center.

NOTE Confidence: 0.825476512857143

 $00:00:22.570 \longrightarrow 00:00:25.144$ It was actually the first official

NOTE Confidence: 0.825476512857143

 $00:00:25.144 \longrightarrow 00:00:27.470$ disease center that we formed,

NOTE Confidence: 0.825476512857143

 $00:00:27.470 \longrightarrow 00:00:30.545$ and it's fitting that we

NOTE Confidence: 0.825476512857143

 $00:00:30.545 \longrightarrow 00:00:33.005$ have these two speakers.

NOTE Confidence: 0.825476512857143

 $00{:}00{:}33.010 \dashrightarrow 00{:}00{:}35.778$ And what we'll do is we'll have each

 $00:00:35.778 \longrightarrow 00:00:38.290$ speak for 2025 minutes and then

NOTE Confidence: 0.825476512857143

 $00:00:38.290 \longrightarrow 00:00:40.906$ we'll do some questions right after.

NOTE Confidence: 0.825476512857143

 $00:00:40.910 \longrightarrow 00:00:43.675$ So the first is Doctor Pan Kunz,

NOTE Confidence: 0.825476512857143

 $00:00:43.680 \longrightarrow 00:00:46.050$ who is associate professor of internal

NOTE Confidence: 0.825476512857143

 $00:00:46.050 \longrightarrow 00:00:47.630$ medicine and medical oncology,

NOTE Confidence: 0.825476512857143

 $00:00:47.630 \longrightarrow 00:00:50.367$ and the director of the Center for

NOTE Confidence: 0.825476512857143

00:00:50.367 --> 00:00:53.184 GI Cancers and the and the and

NOTE Confidence: 0.825476512857143

00:00:53.184 --> 00:00:55.530 the Chief of GI Medical Oncology.

NOTE Confidence: 0.825476512857143

 $00:00:55.530 \longrightarrow 00:00:58.690$ And we're really fortunate to have Pam here.

NOTE Confidence: 0.825476512857143

 $00{:}00{:}58.690 \dashrightarrow 00{:}01{:}01.448$ She's been here less than a year.

NOTE Confidence: 0.825476512857143

 $00:01:01.450 \longrightarrow 00:01:03.804$ She moved from Palo Alto, Atherton.

NOTE Confidence: 0.825476512857143

00:01:03.804 --> 00:01:06.422 And two New Haven during a very

NOTE Confidence: 0.825476512857143

 $00:01:06.422 \longrightarrow 00:01:07.969$ tough year to travel.

NOTE Confidence: 0.825476512857143

 $00{:}01{:}07.970 \dashrightarrow 00{:}01{:}10.574$ So we're so happy you came Pam.

NOTE Confidence: 0.825476512857143

 $00:01:10.580 \longrightarrow 00:01:12.340$ She received her medical degree

 $00:01:12.340 \longrightarrow 00:01:14.100$ from Dartmouth Medical School and

NOTE Confidence: 0.825476512857143

00:01:14.156 --> 00:01:16.156 Residency and Fellowship at Stanford.

NOTE Confidence: 0.825476512857143

 $00:01:16.160 \longrightarrow 00:01:18.722$ She then state was at Stanford until

NOTE Confidence: 0.825476512857143

 $00:01:18.722 \longrightarrow 00:01:21.359$ she joined us in 2020 at Stanford.

NOTE Confidence: 0.825476512857143

 $00:01:21.360 \longrightarrow 00:01:23.964$ She was the director of the Stanford

NOTE Confidence: 0.825476512857143

00:01:23.964 --> 00:01:25.080 Neuroendocrine Tumor Program,

NOTE Confidence: 0.825476512857143

00:01:25.080 --> 00:01:27.075 the leader of Endocrine Oncology

NOTE Confidence: 0.825476512857143

 $00{:}01{:}27.075 \dashrightarrow 00{:}01{:}29.622$ Research Group and the Director of

NOTE Confidence: 0.825476512857143

 $00{:}01{:}29.622 \dashrightarrow 00{:}01{:}31.566$ the Neuroendocrine Tumor Fellowship.

NOTE Confidence: 0.825476512857143

00:01:31.570 --> 00:01:33.220 As you all probably know,

NOTE Confidence: 0.825476512857143

 $00{:}01{:}33.220 \dashrightarrow 00{:}01{:}34.690$ she's an international leader in

NOTE Confidence: 0.825476512857143

 $00:01:34.690 \longrightarrow 00:01:36.160$ the clinical care of patients

NOTE Confidence: 0.825476512857143

 $00:01:36.209 \longrightarrow 00:01:37.490$ with neuroendocrine tumors.

NOTE Confidence: 0.825476512857143

 $00:01:37.490 \longrightarrow 00:01:39.490$ We call those Nets and ETS and is

NOTE Confidence: 0.825476512857143

00:01:39.490 --> 00:01:41.352 advancing the field through clinical

NOTE Confidence: 0.825476512857143

 $00{:}01{:}41.352 \dashrightarrow 00{:}01{:}43.088$ trials and translational research.

 $00:01:43.090 \longrightarrow 00:01:45.512$ She's got a broad investigation or program

NOTE Confidence: 0.825476512857143

 $00{:}01{:}45.512 \dashrightarrow 00{:}01{:}48.016$ and you're going to hear today about her,

NOTE Confidence: 0.825476512857143 00:01:48.020 --> 00:01:48.684 her plans, NOTE Confidence: 0.825476512857143

 $00:01:48.684 \longrightarrow 00:01:50.344$ and what she's already initiated

NOTE Confidence: 0.825476512857143

 $00{:}01{:}50.344 \dashrightarrow 00{:}01{:}52.299$ to really build her own program.

NOTE Confidence: 0.825476512857143

 $00:01:52.300 \longrightarrow 00:01:53.200$ But more importantly,

NOTE Confidence: 0.825476512857143

 $00:01:53.200 \longrightarrow 00:01:55.725$ the entire Geo program here at the Yale

NOTE Confidence: 0.825476512857143

 $00{:}01{:}55.725 \dashrightarrow 00{:}01{:}57.555$ Cancer Center Smile Cancer Hospital,

NOTE Confidence: 0.825476512857143 00:01:57.560 --> 00:01:58.204 so Pam, NOTE Confidence: 0.825476512857143

00:01:58.204 --> 00:02:00.136 thanks for being here today and

NOTE Confidence: 0.825476512857143

00:02:00.136 --> 00:02:02.168 I'm looking forward to your talk.

NOTE Confidence: 0.82296735

 $00:02:04.440 \longrightarrow 00:02:06.630$ Thank you, right?

NOTE Confidence: 0.82296735

 $00{:}02{:}06.630 \dashrightarrow 00{:}02{:}08.499$ And right just give me a thumbs

NOTE Confidence: 0.82296735

 $00:02:08.499 \longrightarrow 00:02:10.706$ up but can you see my screen OK?

NOTE Confidence: 0.82296735

00:02:10.710 --> 00:02:11.664 OK, excellent good.

 $00:02:11.664 \dashrightarrow 00:02:13.890$ Well thank you every body and where I

NOTE Confidence: 0.82296735

 $00:02:13.948 \longrightarrow 00:02:16.048$ thank you for that kind introduction.

NOTE Confidence: 0.82296735

00:02:16.050 --> 00:02:17.904 I'm very excited to share with

NOTE Confidence: 0.82296735

00:02:17.904 --> 00:02:19.730 you our GI cancer program.

NOTE Confidence: 0.82296735

00:02:19.730 --> 00:02:22.058 But before we jump in I just want

NOTE Confidence: 0.82296735

 $00:02:22.058 \longrightarrow 00:02:24.850$ you to save the date for a very

NOTE Confidence: 0.82296735

 $00:02:24.850 \longrightarrow 00:02:27.080$ exciting grand rounds in two weeks.

NOTE Confidence: 0.82296735

00:02:27.080 --> 00:02:28.958 See we're having our first annual

NOTE Confidence: 0.82296735

 $00{:}02{:}28.958 \dashrightarrow 00{:}02{:}30.750$ yield Center for GI cancers.

NOTE Confidence: 0.82296735

 $00:02:30.750 \longrightarrow 00:02:31.752$ Visiting lectureship with

NOTE Confidence: 0.82296735

00:02:31.752 --> 00:02:33.088 Doctor Marcia Cruz Korea.

NOTE Confidence: 0.82296735

 $00:02:33.090 \longrightarrow 00:02:35.142$ She is a professor of medicine

NOTE Confidence: 0.82296735

 $00{:}02{:}35.142 \dashrightarrow 00{:}02{:}36.923$ and biochemistry and the director

NOTE Confidence: 0.82296735

 $00{:}02{:}36.923 \dashrightarrow 00{:}02{:}39.011$ of the GI Oncology Program at

NOTE Confidence: 0.82296735

00:02:39.011 --> 00:02:40.869 the University of Puerto Rico.

NOTE Confidence: 0.82296735

 $00:02:40.870 \longrightarrow 00:02:43.236$ She has held leadership roles in ACR,

 $00:02:43.240 \longrightarrow 00:02:45.150$ most recently the women in

NOTE Confidence: 0.82296735

 $00:02:45.150 \longrightarrow 00:02:47.060$ Cancer Research Committee and she

NOTE Confidence: 0.82296735

 $00:02:47.124 \longrightarrow 00:02:48.969$ was the chairperson for that.

NOTE Confidence: 0.82296735

 $00:02:48.970 \longrightarrow 00:02:50.650$ The focus of her research is

NOTE Confidence: 0.82296735

 $00{:}02{:}50.650 \dashrightarrow 00{:}02{:}51.770$ understanding genetic and AP

NOTE Confidence: 0.82296735

 $00:02:51.827 \longrightarrow 00:02:53.375$ genetic pathways for colorectal

NOTE Confidence: 0.82296735

00:02:53.375 --> 00:02:54.923 cancer among Hispanic patients.

NOTE Confidence: 0.82296735

 $00:02:54.930 \longrightarrow 00:02:56.874$ So we're very excited to host

NOTE Confidence: 0.82296735

 $00:02:56.874 \longrightarrow 00:02:58.900$ her in a couple of weeks.

NOTE Confidence: 0.7907561

 $00{:}03{:}01.220 \dashrightarrow 00{:}03{:}03.453$ So I will be sharing the virtual

NOTE Confidence: 0.7907561

 $00{:}03{:}03.453 \dashrightarrow 00{:}03{:}05.262$ podium today with Doctor, Mandar,

NOTE Confidence: 0.7907561

 $00{:}03{:}05.262 \dashrightarrow 00{:}03{:}07.254$ Mazumdar and we are excited to

NOTE Confidence: 0.7907561

 $00:03:07.254 \longrightarrow 00:03:09.523$ share with you an overview of the

NOTE Confidence: 0.7907561

 $00:03:09.523 \longrightarrow 00:03:11.770$ program and some of the goals Mander

NOTE Confidence: 0.7907561

 $00:03:11.770 \longrightarrow 00:03:14.026$ will take on the scientific vision.

 $00:03:18.040 \longrightarrow 00:03:20.704$ So I'd like to start off just by

NOTE Confidence: 0.89496815

 $00{:}03{:}20.704 \dashrightarrow 00{:}03{:}22.689$ recognizing that this is a an

NOTE Confidence: 0.89496815

 $00{:}03{:}22.689 \dashrightarrow 00{:}03{:}24.561$ incredible team effort and what I

NOTE Confidence: 0.89496815

00:03:24.637 --> 00:03:26.635 will be talking about today really

NOTE Confidence: 0.89496815

 $00:03:26.635 \longrightarrow 00:03:28.936$ is the work of the entire team.

NOTE Confidence: 0.89496815

 $00:03:28.936 \longrightarrow 00:03:31.610$ It's been a pleasure to get to meet.

NOTE Confidence: 0.89496815

00:03:31.610 --> 00:03:33.230 Everybody will be at mostly

NOTE Confidence: 0.89496815

 $00:03:33.230 \longrightarrow 00:03:35.250$ by zoom over the last year,

NOTE Confidence: 0.89496815

 $00{:}03{:}35.250 \dashrightarrow 00{:}03{:}37.465$ but we have really tremendous

NOTE Confidence: 0.89496815

 $00{:}03{:}37.465 \dashrightarrow 00{:}03{:}39.680$ team members and have started

NOTE Confidence: 0.89496815

 $00{:}03{:}39.760 \dashrightarrow 00{:}03{:}41.788$ also doing some recruiting.

NOTE Confidence: 0.89496815

 $00:03:41.790 \longrightarrow 00:03:43.166$ These are my disclosures,

NOTE Confidence: 0.89496815

 $00{:}03{:}43.166 \dashrightarrow 00{:}03{:}46.012$ so I will take on providing you a

NOTE Confidence: 0.89496815

00:03:46.012 --> 00:03:48.154 background on GI cancers talking about

NOTE Confidence: 0.89496815

 $00:03:48.154 \longrightarrow 00:03:50.469$ this newly launched center and then

NOTE Confidence: 0.89496815

 $00{:}03{:}50.469 \dashrightarrow 00{:}03{:}52.767$ I'll speak about our patient care,

 $00:03:52.770 \longrightarrow 00:03:54.494$ education and clinical research

NOTE Confidence: 0.89496815

 $00{:}03{:}54.494 \dashrightarrow 00{:}03{:}57.080$ initiatives and then I will pass

NOTE Confidence: 0.89496815

 $00:03:57.147 \longrightarrow 00:03:59.097$ the baton to Doctor Mazumdar.

NOTE Confidence: 0.89496815

00:03:59.100 --> 00:04:00.996 So first just a brief background

NOTE Confidence: 0.89496815

 $00{:}04{:}00.996 \dashrightarrow 00{:}04{:}03.022$ on GI cancers and aspects that

NOTE Confidence: 0.89496815

 $00:04:03.022 \longrightarrow 00:04:05.110$ make up make our center unique.

NOTE Confidence: 0.89496815

 $00:04:05.110 \longrightarrow 00:04:07.730$ So if you try to count up all of the

NOTE Confidence: 0.89496815

 $00:04:07.804 \longrightarrow 00:04:10.786$ different primary sites in the GI system,

NOTE Confidence: 0.89496815

 $00:04:10.790 \longrightarrow 00:04:12.460$ there are at least 12.

NOTE Confidence: 0.89496815

00:04:12.460 --> 00:04:14.458 Depending on how you count them,

NOTE Confidence: 0.89496815

 $00{:}04{:}14.460 \dashrightarrow 00{:}04{:}16.553$ and I think that poses both some

NOTE Confidence: 0.89496815

 $00{:}04{:}16.553 \dashrightarrow 00{:}04{:}18.226$ challenges and some opportunities as

NOTE Confidence: 0.89496815

 $00{:}04{:}18.226 \dashrightarrow 00{:}04{:}20.368$ we think about developing a center

NOTE Confidence: 0.89496815

 $00:04:20.368 \longrightarrow 00:04:22.810$ and really trying to address all of

NOTE Confidence: 0.89496815

 $00:04:22.810 \longrightarrow 00:04:24.815$ these different primary sites via all

00:04:24.815 --> 00:04:27.160 of the main pillars of patient education,

NOTE Confidence: 0.89496815

00:04:27.160 --> 00:04:29.026 patient care, education,

NOTE Confidence: 0.89496815

 $00:04:29.026 \longrightarrow 00:04:30.270$ and research.

NOTE Confidence: 0.89496815

00:04:30.270 --> 00:04:32.979 In terms of estimated new cancer cases,

NOTE Confidence: 0.89496815

 $00:04:32.980 \longrightarrow 00:04:35.896$ colon, rectal and pancreas are in

NOTE Confidence: 0.89496815

 $00:04:35.896 \longrightarrow 00:04:39.869$ the top 10 for both men and women.

NOTE Confidence: 0.89496815

00:04:39.870 --> 00:04:40.313 However,

NOTE Confidence: 0.89496815

 $00:04:40.313 \longrightarrow 00:04:42.971$ there is a larger proportion attributed

NOTE Confidence: 0.89496815

 $00{:}04{:}42.971 \dashrightarrow 00{:}04{:}45.810$ to GI cancers or estimated deaths.

NOTE Confidence: 0.89496815

 $00:04:45.810 \longrightarrow 00:04:46.650$ In fact,

NOTE Confidence: 0.89496815

 $00:04:46.650 \longrightarrow 00:04:50.010$ 27% of estimated deaths in men or due

NOTE Confidence: 0.89496815

 $00:04:50.106 \longrightarrow 00:04:53.578$ to GI cancers that school in pancreas,

NOTE Confidence: 0.89496815

 $00:04:53.580 \longrightarrow 00:04:54.036$ liver,

NOTE Confidence: 0.89496815

 $00:04:54.036 \dashrightarrow 00:04:57.684$ and oesophageal and for women it's about 21%.

NOTE Confidence: 0.89496815

 $00:04:57.690 \longrightarrow 00:04:58.147$ Colon,

NOTE Confidence: 0.89496815

 $00:04:58.147 \longrightarrow 00:04:59.518$ pancreas and liver.

 $00{:}05{:}01.900 \dashrightarrow 00{:}05{:}04.490$ We've also had a number of FDA

NOTE Confidence: 0.810886

 $00:05:04.490 \longrightarrow 00:05:06.808$ approvals over the last 12 months.

NOTE Confidence: 0.810886

 $00:05:06.810 \longrightarrow 00:05:09.834$ This is since May of 2020 in fact,

NOTE Confidence: 0.810886

 $00:05:09.840 \longrightarrow 00:05:12.031$ just in the last six weeks we've

NOTE Confidence: 0.810886

 $00:05:12.031 \longrightarrow 00:05:14.781$ had three new FDA approvals in the

NOTE Confidence: 0.810886

00:05:14.781 --> 00:05:17.391 immunotherapy space for advanced Asafa Geo,

NOTE Confidence: 0.810886

00:05:17.400 --> 00:05:19.290 GE Junction, and gastric cancers.

NOTE Confidence: 0.810886

 $00:05:19.290 \longrightarrow 00:05:21.670$ You'll see in those last three rows

NOTE Confidence: 0.810886

00:05:21.670 --> 00:05:23.994 Pembroke Plus for permitting nivo plus

NOTE Confidence: 0.810886

 $00{:}05{:}23.994 \dashrightarrow 00{:}05{:}26.049$ floor permitting and Pembroke Plus

NOTE Confidence: 0.810886

 $00{:}05{:}26.049 \dashrightarrow 00{:}05{:}28.740$ tries to the map in floor permitting.

NOTE Confidence: 0.810886

 $00:05:28.740 \longrightarrow 00:05:32.835$ So it's been very exciting for us.

NOTE Confidence: 0.810886

 $00:05:32.840 \longrightarrow 00:05:35.388$ GI cancers have also been in the

NOTE Confidence: 0.810886

00:05:35.388 --> 00:05:38.268 news quite a bit in the last year,

NOTE Confidence: 0.810886

 $00:05:38.270 \longrightarrow 00:05:41.528$ which I think has done a lot to raise

 $00:05:41.528 \longrightarrow 00:05:43.370$ awareness, which is quite important.

NOTE Confidence: 0.810886

 $00{:}05{:}43.370 \dashrightarrow 00{:}05{:}45.995$ So Chadwick Boseman sadly died at a

NOTE Confidence: 0.810886

 $00:05:45.995 \longrightarrow 00:05:48.035$ very young age of colorectal cancer.

NOTE Confidence: 0.810886

00:05:48.040 --> 00:05:49.850 Ruth Bader Ginsburg died of

NOTE Confidence: 0.810886

 $00:05:49.850 \longrightarrow 00:05:50.936$ metastatic pancreas cancer.

NOTE Confidence: 0.810886

 $00:05:50.940 \longrightarrow 00:05:53.466$ We've also seen recommendations for the

NOTE Confidence: 0.810886

 $00:05:53.466 \longrightarrow 00:05:56.370$ colon cancer screening age to drop to age 45,

NOTE Confidence: 0.810886

 $00:05:56.370 \longrightarrow 00:05:58.954$ and this is on the basis of a

NOTE Confidence: 0.810886

00:05:58.954 --> 00:06:00.519 draft recommendation from the

NOTE Confidence: 0.810886

00:06:00.519 --> 00:06:01.797 United States President.

NOTE Confidence: 0.810886

 $00{:}06{:}01.800 \dashrightarrow 00{:}06{:}03.484$ Preventive Services task force.

NOTE Confidence: 0.810886

 $00{:}06{:}03.484 \dashrightarrow 00{:}06{:}06{:}06.302$ For average risk, adults age 45 to

NOTE Confidence: 0.810886

 $00:06:06.302 \longrightarrow 00:06:08.630$ 49 that they should start screening.

NOTE Confidence: 0.810886

 $00:06:08.630 \longrightarrow 00:06:13.976$ This is not been put into practice just yet.

NOTE Confidence: 0.810886

 $00:06:13.980 \longrightarrow 00:06:15.888$ So in terms of our center,

NOTE Confidence: 0.810886

 $00:06:15.890 \longrightarrow 00:06:18.130$ I think Kevin best for this slide.

00:06:18.130 --> 00:06:20.038 Many of you have seen this,

NOTE Confidence: 0.810886

00:06:20.040 --> 00:06:23.550 but Roy and I are in a bit of a competition,

NOTE Confidence: 0.810886

 $00:06:23.550 \longrightarrow 00:06:25.776$ so both of our centers have launched.

NOTE Confidence: 0.810886

 $00:06:25.780 \longrightarrow 00:06:26.416$ We went.

NOTE Confidence: 0.810886

 $00{:}06{:}26.416 \dashrightarrow 00{:}06{:}28.642$ We just edged out the thoracic center,

NOTE Confidence: 0.810886

 $00:06:28.650 \longrightarrow 00:06:31.290$ but it's very exciting and there

NOTE Confidence: 0.810886

 $00:06:31.290 \longrightarrow 00:06:34.320$ are 13 more centers yet to launch.

NOTE Confidence: 0.810886

 $00:06:34.320 \longrightarrow 00:06:35.696$ These centers, I think,

NOTE Confidence: 0.810886

 $00:06:35.696 \longrightarrow 00:06:37.416$ as many of you know,

NOTE Confidence: 0.810886

 $00:06:37.420 \longrightarrow 00:06:38.792$ have a shared organizational

NOTE Confidence: 0.810886

 $00{:}06{:}38.792 \dashrightarrow 00{:}06{:}40.507$ structure with a leadership cabinet.

NOTE Confidence: 0.810886

 $00{:}06{:}40.510 \dashrightarrow 00{:}06{:}42.574$ There are common rules in all

NOTE Confidence: 0.810886

 $00{:}06{:}42.574 \dashrightarrow 00{:}06{:}43.606$ the disease centers.

NOTE Confidence: 0.810886

 $00:06:43.610 \longrightarrow 00:06:44.758$ These include the director,

NOTE Confidence: 0.810886

 $00:06:44.758 \longrightarrow 00:06:46.898$ and I will be serving that position

 $00:06:46.898 \longrightarrow 00:06:49.064$ for our center patient care Services

NOTE Confidence: 0.810886

 $00{:}06{:}49.064 \dashrightarrow 00{:}06{:}50.989$ Director Maureen Major Campos and

NOTE Confidence: 0.810886

 $00:06:50.989 \longrightarrow 00:06:52.549$ Operations and planning director.

NOTE Confidence: 0.810886

 $00:06:52.550 \longrightarrow 00:06:55.490$ Which is Kevin best?

NOTE Confidence: 0.810886

00:06:55.490 --> 00:06:57.338 I also have a scientific director,

NOTE Confidence: 0.810886

00:06:57.340 --> 00:06:58.572 doctor Mandel, Razum Dar,

NOTE Confidence: 0.810886

 $00{:}06{:}58.572 \dashrightarrow 00{:}07{:}00.420$ which I'm very excited about it.

NOTE Confidence: 0.810886

00:07:00.420 --> 00:07:02.410 I'm currently serving an interim

NOTE Confidence: 0.810886

 $00:07:02.410 \longrightarrow 00:07:04.400$ role as the clinical director.

NOTE Confidence: 0.810886

 $00:07:04.400 \longrightarrow 00:07:06.986$ We also have the flexibility of

NOTE Confidence: 0.810886

 $00{:}07{:}06.986 \dashrightarrow 00{:}07{:}10.134$ adding a number of ad hoc rules

NOTE Confidence: 0.810886

00:07:10.134 --> 00:07:11.910 specific to GI cancers.

NOTE Confidence: 0.810886

 $00{:}07{:}11.910 \dashrightarrow 00{:}07{:}14.710$ We wanted all of the relevant stakeholders

NOTE Confidence: 0.810886

 $00{:}07{:}14.710 \dashrightarrow 00{:}07{:}18.536$ to have a place in this leadership cabinet.

NOTE Confidence: 0.810886

00:07:18.540 --> 00:07:21.198 So these include Sir junk education,

NOTE Confidence: 0.810886

 $00:07:21.200 \longrightarrow 00:07:23.410$ cancer imaging, RAD ONC pathology,

 $00:07:23.410 \longrightarrow 00:07:24.733$ and Network Director,

NOTE Confidence: 0.810886

 $00{:}07{:}24.733 \dashrightarrow 00{:}07{:}26.056$ biorepository advanced endoscopy

NOTE Confidence: 0.810886

00:07:26.056 --> 00:07:26.938 and importantly,

NOTE Confidence: 0.810886

 $00:07:26.940 \longrightarrow 00:07:30.804$ a liaison with the GI service line.

NOTE Confidence: 0.810886

00:07:30.810 --> 00:07:32.980 You'll see that that GI service line

NOTE Confidence: 0.810886

 $00{:}07{:}32.980 \dashrightarrow 00{:}07{:}34.684$ dotted line is really indicated

NOTE Confidence: 0.810886

 $00:07:34.684 \longrightarrow 00:07:36.802$ to represent a bridge with our

NOTE Confidence: 0.810886

 $00:07:36.802 \longrightarrow 00:07:38.790$ program at Doctor Mario Stresa.

NOTE Confidence: 0.810886

 $00:07:38.790 \longrightarrow 00:07:40.974$ Bosco has done a wonderful job

NOTE Confidence: 0.810886

 $00{:}07{:}40.974 \dashrightarrow 00{:}07{:}43.158$ building a liver cancer program over

NOTE Confidence: 0.810886

 $00:07:43.158 \longrightarrow 00:07:45.798$ many years and we still plan to work

NOTE Confidence: 0.810886

 $00{:}07{:}45.868 \dashrightarrow 00{:}07{:}48.157$ very closely with he and his team.

NOTE Confidence: 0.810886

00:07:48.160 --> 00:07:48.816 In addition,

NOTE Confidence: 0.810886

00:07:48.816 --> 00:07:50.456 we have started and launched

NOTE Confidence: 0.810886

00:07:50.456 --> 00:07:51.980 for disease specific programs,

 $00:07:51.980 \longrightarrow 00:07:52.672$ including pancreas,

NOTE Confidence: 0.810886

 $00{:}07{:}52.672 \dashrightarrow 00{:}07{:}53.710$ neuroendocrine advanced hepatic

NOTE Confidence: 0.810886

 $00{:}07{:}53.710 \dashrightarrow 00{:}07{:}55.094$ bilary and colorectal ING.

NOTE Confidence: 0.810886

 $00:07:55.100 \longrightarrow 00:07:55.440$ Alone.

NOTE Confidence: 0.810886

 $00:07:55.440 \longrightarrow 00:07:57.480$ I'll speak about those in just

NOTE Confidence: 0.810886

 $00:07:57.480 \longrightarrow 00:07:59.958$ a moment and we have some tumor

NOTE Confidence: 0.810886

 $00:07:59.958 \longrightarrow 00:08:02.040$ boards that match up with these,

NOTE Confidence: 0.810886

 $00:08:02.040 \longrightarrow 00:08:05.748$ which we will also talk about.

NOTE Confidence: 0.810886

 $00{:}08{:}05.750 \dashrightarrow 00{:}08{:}07.450$ So we have implemented some

NOTE Confidence: 0.810886

 $00:08:07.450 \longrightarrow 00:08:09.150$ new meetings on the yellow.

NOTE Confidence: 0.810886

 $00:08:09.150 \longrightarrow 00:08:11.010$ The yellow Star indicates things

NOTE Confidence: 0.810886

 $00:08:11.010 \longrightarrow 00:08:12.870$ that have been implemented newly

NOTE Confidence: 0.84153587

 $00:08:12.935 \longrightarrow 00:08:15.505$ in the last year, so we have had an

NOTE Confidence: 0.84153587

 $00:08:15.505 \longrightarrow 00:08:17.100$ existing trimmer but actually just

NOTE Confidence: 0.84153587

 $00:08:17.167 \longrightarrow 00:08:19.616$ yesterday we launched a split, so this

NOTE Confidence: 0.84153587

00:08:19.616 --> 00:08:22.750 is now a single hour and a half meeting,

 $00:08:22.750 \longrightarrow 00:08:25.684$ but we have an upper GI pancreas net tumor

NOTE Confidence: 0.84153587

 $00:08:25.684 \longrightarrow 00:08:28.190$ board and a colorectal **** tumor board.

NOTE Confidence: 0.84153587

 $00:08:28.190 \longrightarrow 00:08:30.910$ The Liver Tumor Board is still on Thursdays.

NOTE Confidence: 0.84153587

 $00:08:30.910 \longrightarrow 00:08:32.610$ We have our existing DART

NOTE Confidence: 0.84153587

00:08:32.610 --> 00:08:33.630 clinical trial review,

NOTE Confidence: 0.84153587

 $00:08:33.630 \longrightarrow 00:08:36.066$ but we started a Center for GI.

NOTE Confidence: 0.84153587

00:08:36.070 --> 00:08:38.260 Cancer Seminar series on Thursday

NOTE Confidence: 0.84153587

 $00:08:38.260 \longrightarrow 00:08:40.450$ afternoons that consists of Journal

NOTE Confidence: 0.84153587

 $00:08:40.518 \longrightarrow 00:08:43.059$ club being led by Doctor Christie Gomez.

NOTE Confidence: 0.84153587

 $00{:}08{:}43.060 \dashrightarrow 00{:}08{:}45.048$ Scientifiche talks clinical talks

NOTE Confidence: 0.84153587

 $00{:}08{:}45.048 \dashrightarrow 00{:}08{:}47.036$ and industry pipeline talks.

NOTE Confidence: 0.84153587

 $00:08:47.040 \longrightarrow 00:08:48.894$ In addition, we've started a number

NOTE Confidence: 0.84153587

 $00{:}08{:}48.894 \dashrightarrow 00{:}08{:}50.780$ of working groups and committees.

NOTE Confidence: 0.84153587

 $00:08:50.780 \longrightarrow 00:08:52.820$ This includes a GI tumor board

NOTE Confidence: 0.84153587

 $00:08:52.820 \longrightarrow 00:08:53.840$ revamp working group.

 $00:08:53.840 \longrightarrow 00:08:55.540$ This initial phase has concluded,

NOTE Confidence: 0.84153587

 $00{:}08{:}55.540 {\:\dashrightarrow\:} 00{:}08{:}57.773$ but we will continue to meet quarterly

NOTE Confidence: 0.84153587

 $00{:}08{:}57.773 \dashrightarrow 00{:}09{:}00.300$ a GI multi D
 Clinic working group.

NOTE Confidence: 0.84153587

 $00:09:00.300 \longrightarrow 00:09:02.370$ We started this in March and

NOTE Confidence: 0.84153587

 $00:09:02.370 \longrightarrow 00:09:04.141$ or having monthly meetings to

NOTE Confidence: 0.84153587

00:09:04.141 --> 00:09:06.079 pilot some multi D clinic switch,

NOTE Confidence: 0.84153587

 $00{:}09{:}06.080 \dashrightarrow 00{:}09{:}08.800$ I will speak about on a later slide.

NOTE Confidence: 0.84153587

 $00:09:08.800 \longrightarrow 00:09:10.975$ We have leadership cabinet meetings

NOTE Confidence: 0.84153587

 $00{:}09{:}10.975 \dashrightarrow 00{:}09{:}12.715$ and program leader meetings.

NOTE Confidence: 0.84153587

 $00:09:12.720 \longrightarrow 00:09:15.340$ So we've been quite busy.

NOTE Confidence: 0.84153587

 $00{:}09{:}15.340 \dashrightarrow 00{:}09{:}17.422$ So I'll speak next about our

NOTE Confidence: 0.84153587

 $00:09:17.422 \longrightarrow 00:09:18.116$ disease programs.

NOTE Confidence: 0.84153587

00:09:18.120 --> 00:09:20.088 I want to mention some shared

NOTE Confidence: 0.84153587

 $00:09:20.088 \longrightarrow 00:09:22.200$ themes that I won't repeat on

NOTE Confidence: 0.84153587

 $00:09:22.200 \longrightarrow 00:09:24.020$ some of the specific slides,

NOTE Confidence: 0.84153587

 $00:09:24.020 \longrightarrow 00:09:26.435$ but we all envision in the pancreas,

00:09:26.440 --> 00:09:27.788 colorectal advanced hepatic bilary,

NOTE Confidence: 0.84153587

 $00{:}09{:}27.788 {\:\raisebox{--}{\text{--}}}{\:\raisebox{--}{\text{--}}}{\:\raisebox{--}{\text{--}}} 00{:}09{:}30.609$ and net programs to focus on these pillars.

NOTE Confidence: 0.84153587

00:09:30.610 --> 00:09:31.994 So multi disciplinary clinics,

NOTE Confidence: 0.84153587

 $00:09:31.994 \longrightarrow 00:09:32.686$ tumor boards,

NOTE Confidence: 0.84153587

 $00:09:32.690 \longrightarrow 00:09:33.731$ care coordination really

NOTE Confidence: 0.84153587

00:09:33.731 --> 00:09:35.119 important to GI cancers,

NOTE Confidence: 0.84153587

 $00:09:35.120 \longrightarrow 00:09:36.540$ integration of palliative care

NOTE Confidence: 0.84153587

 $00:09:36.540 \longrightarrow 00:09:38.670$ and we actually just have newly

NOTE Confidence: 0.84153587

00:09:38.734 --> 00:09:40.660 recruited Doctor Laura Baum who is

NOTE Confidence: 0.84153587

 $00:09:40.660 \longrightarrow 00:09:42.750$ pallative care and he Monk trained.

NOTE Confidence: 0.84153587

 $00:09:42.750 \longrightarrow 00:09:45.570$ She will join us this summer.

NOTE Confidence: 0.84153587

 $00:09:45.570 \longrightarrow 00:09:47.294$ In terms of education,

NOTE Confidence: 0.84153587

 $00{:}09{:}47.294 \dashrightarrow 00{:}09{:}49.449$ we plan on expanding physician

NOTE Confidence: 0.84153587

 $00{:}09{:}49.449 \dashrightarrow 00{:}09{:}50.979$ education and CME events,

NOTE Confidence: 0.84153587

 $00:09:50.980 \longrightarrow 00:09:52.225$ patient education events,

00:09:52.225 --> 00:09:53.885 mentoring with shovel ready,

NOTE Confidence: 0.84153587

00:09:53.890 --> 00:09:55.063 projects for trainees,

NOTE Confidence: 0.84153587

 $00{:}09{:}55.063 \dashrightarrow 00{:}09{:}57.018$ and plan an advanced fellowship

NOTE Confidence: 0.84153587

00:09:57.018 --> 00:09:59.300 in GI Oncology for research.

NOTE Confidence: 0.84153587

 $00:09:59.300 \longrightarrow 00:10:02.205$ We hope to expand on clinical trials,

NOTE Confidence: 0.84153587

 $00:10:02.210 \longrightarrow 00:10:03.054$ specifically Iits.

NOTE Confidence: 0.84153587

 $00:10:03.054 \longrightarrow 00:10:05.586$ That's something that we need to

NOTE Confidence: 0.84153587

 $00{:}10{:}05.586 \dashrightarrow 00{:}10{:}07.998$ increase in our portfolio and I

NOTE Confidence: 0.84153587

 $00{:}10{:}07.998 \dashrightarrow 00{:}10{:}09.873$ will let Doctor Mazumdar speak

NOTE Confidence: 0.84153587

 $00{:}10{:}09.873 \dashrightarrow 00{:}10{:}12.951$ later about some of our basic and

NOTE Confidence: 0.84153587

 $00:10:12.951 \longrightarrow 00:10:14.268$ translational research efforts.

NOTE Confidence: 0.84153587

00:10:14.270 --> 00:10:15.410 And then Lastly,

NOTE Confidence: 0.84153587

 $00:10:15.410 \longrightarrow 00:10:15.790$ advocacy.

NOTE Confidence: 0.84153587

 $00:10:15.790 \longrightarrow 00:10:18.911$ I'd like to think of this as the

NOTE Confidence: 0.84153587

00:10:18.911 --> 00:10:19.677 fourth pillar,

NOTE Confidence: 0.84153587

 $00:10:19.680 \longrightarrow 00:10:21.712$ and particularly in my role as the Vice

00:10:21.712 --> 00:10:24.163 Chief for DTI and getting more involved

NOTE Confidence: 0.84153587

 $00:10:24.163 \dashrightarrow 00:10:26.053$ with community engagement and Health Equity.

NOTE Confidence: 0.84153587

 $00:10:26.060 \longrightarrow 00:10:28.668$ I'd like for us to think about these

NOTE Confidence: 0.84153587

 $00:10:28.668 \longrightarrow 00:10:31.474$ aspects as we do all of our patient care,

NOTE Confidence: 0.84153587

 $00:10:31.480 \longrightarrow 00:10:31.922$ education,

NOTE Confidence: 0.84153587

 $00:10:31.922 \longrightarrow 00:10:32.806$ and research.

NOTE Confidence: 0.84153587

 $00:10:32.806 \longrightarrow 00:10:36.388$ So the pancreas program is being Co led

NOTE Confidence: 0.84153587

 $00{:}10{:}36.388 \dashrightarrow 00{:}10{:}39.286$ by doctors Jill Lacy and Mandar Mazumdar.

NOTE Confidence: 0.84153587

 $00:10:39.290 \longrightarrow 00:10:41.546$ And in terms of patient care

NOTE Confidence: 0.84153587

 $00{:}10{:}41.546 \dashrightarrow 00{:}10{:}44.360$ would I have done on these sides?

NOTE Confidence: 0.84153587

 $00:10:44.360 \longrightarrow 00:10:47.132$ Is underlying some of the key aspects

NOTE Confidence: 0.84153587

 $00:10:47.132 \longrightarrow 00:10:49.524$ that are unique to this program

NOTE Confidence: 0.84153587

 $00:10:49.524 \longrightarrow 00:10:51.768$ so they have planned a pilot,

NOTE Confidence: 0.84153587

 $00{:}10{:}51.770 \dashrightarrow 00{:}10{:}53.798$ pancreatic cancer multi D clinic with

NOTE Confidence: 0.84153587

00:10:53.798 --> 00:10:56.449 a focus on non metastatic disease.

 $00:10:56.450 \longrightarrow 00:10:59.570$ We have just recently started point of care.

NOTE Confidence: 0.84153587

 $00:10:59.570 \longrightarrow 00:11:01.490$ Germline testing with collaboration with

NOTE Confidence: 0.84153587

 $00:11:01.490 \longrightarrow 00:11:04.250$ Shabbier your and his cancer genetics team.

NOTE Confidence: 0.84153587

00:11:04.250 --> 00:11:05.414 Advanced endoscopy expertise.

NOTE Confidence: 0.84153587

00:11:05.414 --> 00:11:06.578 As I'd mentioned,

NOTE Confidence: 0.84153587

 $00:11:06.580 \longrightarrow 00:11:08.195$ we are embedding pallative care

NOTE Confidence: 0.84153587

 $00{:}11{:}08.195 \dashrightarrow 00{:}11{:}10.977$ in our program and we had a pink

NOTE Confidence: 0.84153587

00:11:10.977 --> 00:11:12.441 pancreatic cancer early detection

NOTE Confidence: 0.84153587

00:11:12.441 --> 00:11:14.400 clinic in terms of education.

NOTE Confidence: 0.84153587

00:11:14.400 --> 00:11:16.934 We are hoping to launch a pancreatic

NOTE Confidence: 0.84153587

 $00{:}11{:}16.934 \dashrightarrow 00{:}11{:}19.147$ cancer interest group for trainees and

NOTE Confidence: 0.84153587

00:11:19.147 --> 00:11:21.632 then in terms of Community wide efforts,

NOTE Confidence: 0.7719335

 $00{:}11{:}21.640 \dashrightarrow 00{:}11{:}24.657$ we had a very successful Yale Pack

NOTE Confidence: 0.7719335

 $00{:}11{:}24.657 \dashrightarrow 00{:}11{:}27.412$ seminar series this past year under

NOTE Confidence: 0.7719335

 $00:11:27.412 \longrightarrow 00:11:29.707$ Research Summit led by Mandor.

NOTE Confidence: 0.7719335

 $00:11:29.710 \longrightarrow 00:11:31.406$ In terms of research,

 $00:11:31.406 \longrightarrow 00:11:34.235$ 50% of our new pancreas patients

NOTE Confidence: 0.7719335

 $00{:}11{:}34.235 \dashrightarrow 00{:}11{:}36.640$ are consented into clinical trials

NOTE Confidence: 0.7719335

 $00:11:36.719 \longrightarrow 00:11:39.442$ and we have been the leading in

NOTE Confidence: 0.7719335

 $00:11:39.442 \longrightarrow 00:11:41.435$ roller for clinical trials in

NOTE Confidence: 0.7719335

00:11:41.435 --> 00:11:43.667 the US between 2016 and 2019,

NOTE Confidence: 0.7719335

 $00:11:43.670 \longrightarrow 00:11:45.780$ we treated over 400 patients,

NOTE Confidence: 0.7719335

00:11:45.780 --> 00:11:49.164 38% at care centers from on clinical trials,

NOTE Confidence: 0.7719335

 $00:11:49.170 \longrightarrow 00:11:52.124$ and we plan to grow the IIT.

NOTE Confidence: 0.86282706

 $00:11:57.890 \longrightarrow 00:12:00.061$ Samples and this represents 61% of

NOTE Confidence: 0.86282706

00:12:00.061 --> 00:12:01.866 all of our biorepository samples,

NOTE Confidence: 0.86282706

 $00{:}12{:}01.870 \dashrightarrow 00{:}12{:}04.678$ so that's a problem for the other diseases

NOTE Confidence: 0.86282706

 $00:12:04.678 \longrightarrow 00:12:07.656$ which we will speak to as an opportunity.

NOTE Confidence: 0.86282706

 $00{:}12{:}07.660 \dashrightarrow 00{:}12{:}10.663$ And then we also plan on leveraging

NOTE Confidence: 0.86282706

 $00:12:10.663 \longrightarrow 00:12:13.341$ innovative multi omics profiling on the

NOTE Confidence: 0.86282706

 $00:12:13.341 \longrightarrow 00:12:16.400$ right are some of our recent publications.

00:12:16.400 --> 00:12:19.669 The colorectal program is Co led by

NOTE Confidence: 0.86282706

 $00{:}12{:}19.669 \dashrightarrow 00{:}12{:}22.000$ doctors Michael Cicchini Shabbier your

NOTE Confidence: 0.86282706

 $00:12:22.000 \longrightarrow 00:12:24.968$ and ready in terms of patient care,

NOTE Confidence: 0.86282706

 $00:12:24.970 \longrightarrow 00:12:27.676$ we plan on developing a Nurse

NOTE Confidence: 0.86282706

00:12:27.676 --> 00:12:28.578 Navigator program,

NOTE Confidence: 0.86282706

00:12:28.580 --> 00:12:30.965 fully integrating genomics with patient

NOTE Confidence: 0.86282706

 $00:12:30.965 \longrightarrow 00:12:34.666$ care and developing an early age of onset

NOTE Confidence: 0.86282706

 $00:12:34.666 \longrightarrow 00:12:37.144$ colorectal clinic in terms of education,

NOTE Confidence: 0.86282706

 $00:12:37.150 \longrightarrow 00:12:39.448$ we hope to work with stakeholders

NOTE Confidence: 0.86282706

 $00:12:39.448 \longrightarrow 00:12:41.626$ such as this Milo screening

NOTE Confidence: 0.86282706

 $00{:}12{:}41.626 \dashrightarrow 00{:}12{:}43.906$ program on public campaigns.

NOTE Confidence: 0.86282706

 $00:12:43.910 \longrightarrow 00:12:45.754$ This is especially pertinent

NOTE Confidence: 0.86282706

 $00:12:45.754 \longrightarrow 00:12:48.059$ as the USPS TF guidelines.

NOTE Confidence: 0.86282706

 $00:12:48.060 \longrightarrow 00:12:50.715$ Roll out for the lower

NOTE Confidence: 0.86282706

 $00:12:50.715 \longrightarrow 00:12:52.839$ colorectal cancer screening age.

NOTE Confidence: 0.86282706

 $00:12:52.840 \longrightarrow 00:12:55.498$ And then, in terms of research

 $00:12:55.498 \longrightarrow 00:12:57.270$ for the colorectal program,

NOTE Confidence: 0.86282706

 $00:12:57.270 \longrightarrow 00:12:59.944$ we aim to enhance collection of colorectal

NOTE Confidence: 0.86282706

 $00:12:59.944 \longrightarrow 00:13:02.720$ specimen in aryel GI BIOREPOSITORY and

NOTE Confidence: 0.86282706

00:13:02.720 --> 00:13:04.796 increased clinical trial enrollment,

NOTE Confidence: 0.86282706

 $00:13:04.800 \longrightarrow 00:13:05.892$ again with IIT's,

NOTE Confidence: 0.86282706

 $00:13:05.892 \longrightarrow 00:13:08.440$ and then expand the early age of

NOTE Confidence: 0.86282706

 $00:13:08.520 \longrightarrow 00:13:11.000$ onset colorectal cancer thinktank.

NOTE Confidence: 0.86282706

 $00:13:11.000 \longrightarrow 00:13:13.598$ This is a committee that was

NOTE Confidence: 0.86282706

 $00:13:13.598 \longrightarrow 00:13:15.880$ started by Shawbury Orangel Mamma.

NOTE Confidence: 0.88139915

 $00:13:17.910 \longrightarrow 00:13:20.664$ And then Lastly, our community outreach

NOTE Confidence: 0.88139915

 $00:13:20.664 \longrightarrow 00:13:23.750$ and engagement plans for colorectal with

NOTE Confidence: 0.88139915

 $00:13:23.750 \longrightarrow 00:13:26.690$ developing targeted strategies and special

NOTE Confidence: 0.88139915

 $00{:}13{:}26.690 \dashrightarrow 00{:}13{:}29.390$ emphasis on underserved populations.

NOTE Confidence: 0.88139915

 $00{:}13{:}29.390 \dashrightarrow 00{:}13{:}31.425$ The advanced hepatic Bilary program

NOTE Confidence: 0.88139915

 $00:13:31.425 \longrightarrow 00:13:34.229$ built will link very closely with Mario,

00:13:34.230 --> 00:13:35.742 Tresa, Bosco's liver program.

NOTE Confidence: 0.88139915

00:13:35.742 --> 00:13:38.660 This is being Co led by doctors,

NOTE Confidence: 0.88139915

00:13:38.660 --> 00:13:40.892 David Madoff, Stacy Stein and Saj

NOTE Confidence: 0.88139915

00:13:40.892 --> 00:13:43.320 Khan and the Patient Care Education

NOTE Confidence: 0.88139915

 $00:13:43.320 \longrightarrow 00:13:45.906$ and research plans are listed here.

NOTE Confidence: 0.88139915

00:13:45.910 --> 00:13:48.724 I would say importantly for patient care,

NOTE Confidence: 0.88139915

 $00:13:48.730 \longrightarrow 00:13:51.166$ we routine tumor profiling for biliary

NOTE Confidence: 0.88139915

 $00:13:51.166 \longrightarrow 00:13:54.430$ cancers has proven in recent years to be

NOTE Confidence: 0.88139915

 $00{:}13{:}54.430 \dashrightarrow 00{:}13{:}56.782$ critical in terms of the rapy selection.

NOTE Confidence: 0.88139915

 $00:13:56.790 \longrightarrow 00:13:58.434$ In terms of education,

NOTE Confidence: 0.88139915

00:13:58.434 --> 00:14:00.078 we will again work.

NOTE Confidence: 0.88139915

 $00:14:00.080 \longrightarrow 00:14:01.680$ Mostly within the liver cancer

NOTE Confidence: 0.88139915

 $00:14:01.680 \longrightarrow 00:14:03.643$ program and some of the research

NOTE Confidence: 0.88139915

 $00{:}14{:}03.643 \dashrightarrow 00{:}14{:}05.757$ plans are very much in line with

NOTE Confidence: 0.88139915

 $00:14:05.757 \longrightarrow 00:14:08.670$ the other shared programmatical's.

NOTE Confidence: 0.88139915

 $00:14:08.670 \longrightarrow 00:14:10.214$ The neuroendocrine tumor program.

 $00:14:10.214 \longrightarrow 00:14:12.993$ I will be Co leading with Doctor

NOTE Confidence: 0.88139915

 $00{:}14{:}12.993 \dashrightarrow 00{:}14{:}14.958$ Darko Pukaar from nuclear medicine

NOTE Confidence: 0.88139915

 $00:14:14.958 \longrightarrow 00:14:17.710$ and from a patient care perspective.

NOTE Confidence: 0.88139915

00:14:17.710 --> 00:14:20.998 We plan on launching a pre PRT clinic.

NOTE Confidence: 0.88139915

00:14:21.000 --> 00:14:23.877 For those of you who don't know,

NOTE Confidence: 0.88139915

 $00:14:23.880 \longrightarrow 00:14:26.340$ PRT is peptide receptor radionuclide therapy.

NOTE Confidence: 0.88139915

00:14:26.340 --> 00:14:28.874 The agent is 177 Letitia Ndoda Tate

NOTE Confidence: 0.88139915

 $00:14:28.874 \longrightarrow 00:14:32.462$ and we plan on doing this to really

NOTE Confidence: 0.88139915

 $00{:}14{:}32.462 \dashrightarrow 00{:}14{:}34.887$ streamline and provide some consistency

NOTE Confidence: 0.88139915

 $00{:}14{:}34.967 \dashrightarrow 00{:}14{:}37.739$ for heart patients are getting here.

NOTE Confidence: 0.88139915

 $00:14:37.740 \longrightarrow 00:14:39.268$ In terms of education,

NOTE Confidence: 0.88139915

00:14:39.268 --> 00:14:41.560 we also plan on having more

NOTE Confidence: 0.88139915

00:14:41.646 --> 00:14:43.786 patient events such as Milo,

NOTE Confidence: 0.88139915

00:14:43.790 --> 00:14:45.945 carers and hopefully in person

NOTE Confidence: 0.88139915

00:14:45.945 --> 00:14:47.669 and collaborating with some

 $00:14:47.669 \longrightarrow 00:14:50.008$ of our nonprofit foundations.

NOTE Confidence: 0.88139915

00:14:50.010 --> 00:14:51.450 In terms of research,

NOTE Confidence: 0.88139915

 $00:14:51.450 \longrightarrow 00:14:52.890$ the BIOREPOSITORY is also

NOTE Confidence: 0.88139915

00:14:52.890 --> 00:14:54.279 enriched for nut cases,

NOTE Confidence: 0.88139915

00:14:54.280 --> 00:14:57.484 and we hope to build on this and then,

NOTE Confidence: 0.88139915

00:14:57.490 --> 00:14:59.270 in terms of clinical trials,

NOTE Confidence: 0.88139915

 $00:14:59.270 \longrightarrow 00:15:01.686$ we have a real opportunity that should be

NOTE Confidence: 0.88139915

 $00:15:01.686 \longrightarrow 00:15:04.608$ a key site for impactful clinical trials.

NOTE Confidence: 0.88139915

 $00{:}15{:}04.610 --> 00{:}15{:}05.190 \ \mathrm{In \ fact},$

NOTE Confidence: 0.88139915

 $00:15:05.190 \longrightarrow 00:15:07.510$ we are one of five Centers for a

NOTE Confidence: 0.88139915

 $00{:}15{:}07.581 \dashrightarrow 00{:}15{:}09.105$ international clinical trial Meter

NOTE Confidence: 0.88139915

 $00:15:09.105 \longrightarrow 00:15:12.233$ 2 on which I sit on the steering

NOTE Confidence: 0.88139915

 $00{:}15{:}12.233 \dashrightarrow 00{:}15{:}14.519$ committee and there are a number

NOTE Confidence: 0.88139915

 $00{:}15{:}14.519 \dashrightarrow 00{:}15{:}16.436$ of other novel peptide receptor

NOTE Confidence: 0.88139915

 $00:15:16.436 \longrightarrow 00:15:18.346$ radionuclide agents that we hope

NOTE Confidence: 0.88139915

 $00{:}15{:}18.346 \to 00{:}15{:}20.268$ to examine in clinical trials.

 $00:15:20.270 \longrightarrow 00:15:22.643$ And we have a number of grants

NOTE Confidence: 0.88139915

 $00{:}15{:}22.643 \dashrightarrow 00{:}15{:}25.284$ in the works that will hopefully

NOTE Confidence: 0.88139915

00:15:25.284 --> 00:15:27.849 start bringing together both Yale

NOTE Confidence: 0.88139915

 $00{:}15{:}27.849 \dashrightarrow 00{:}15{:}30.219$ Science and outside science.

NOTE Confidence: 0.88139915

 $00:15:30.220 \longrightarrow 00:15:33.380$ Moving on to patient care.

NOTE Confidence: 0.88139915

 $00:15:33.380 \longrightarrow 00:15:36.453$ So this data represents new patient visits

NOTE Confidence: 0.88139915

 $00:15:36.453 \longrightarrow 00:15:39.608$ from both in the tank and Sir junk.

NOTE Confidence: 0.88139915

00:15:39.610 --> 00:15:41.705 This does not include radiation

NOTE Confidence: 0.88139915

 $00:15:41.705 \longrightarrow 00:15:44.326$ oncology and in our leadership cabinet

NOTE Confidence: 0.88139915

 $00:15:44.326 \longrightarrow 00:15:46.591$ meetings we have started reviewing

NOTE Confidence: 0.88139915

 $00{:}15{:}46.591 \dashrightarrow 00{:}15{:}48.832$ data and key performance indicators

NOTE Confidence: 0.88139915

 $00:15:48.832 \longrightarrow 00:15:51.338$ with the goal to develop a dashboard

NOTE Confidence: 0.88139915

 $00{:}15{:}51.338 \dashrightarrow 00{:}15{:}53.302$ of GI cancer specific metrics.

NOTE Confidence: 0.88139915

 $00:15:53.302 \longrightarrow 00:15:55.786$ So as you can see here,

NOTE Confidence: 0.88139915

 $00:15:55.790 \longrightarrow 00:15:57.346$ this is trends overtime.

 $00:15:57.346 \longrightarrow 00:15:59.680$ We certainly dipped and have really

NOTE Confidence: 0.88139915

 $00:15:59.749 \longrightarrow 00:16:02.019$ plateaued since the covid pandemic,

NOTE Confidence: 0.88139915

 $00:16:02.020 \longrightarrow 00:16:04.090$ but we have bounced back.

NOTE Confidence: 0.87521565

 $00:16:11.270 \longrightarrow 00:16:13.025$ Another interesting set of data

NOTE Confidence: 0.87521565

 $00:16:13.025 \longrightarrow 00:16:15.683$ that we looked at it then courtesy

NOTE Confidence: 0.87521565

 $00:16:15.683 \longrightarrow 00:16:18.191$ of Kevin Best was our Connecticut

NOTE Confidence: 0.87521565

 $00:16:18.191 \longrightarrow 00:16:20.414$ population and distribution of GI

NOTE Confidence: 0.87521565

00:16:20.414 --> 00:16:22.604 Services across our service area,

NOTE Confidence: 0.87521565

 $00:16:22.610 \longrightarrow 00:16:25.193$ and I think this is helpful for us as

NOTE Confidence: 0.87521565

 $00:16:25.193 \longrightarrow 00:16:28.195$ we think about developing and placing

NOTE Confidence: 0.87521565

 $00{:}16{:}28.195 \dashrightarrow 00{:}16{:}30.303$ services in specific locations.

NOTE Confidence: 0.87521565

 $00:16:30.310 \longrightarrow 00:16:32.599$ So as an example here in red

NOTE Confidence: 0.87521565

 $00:16:32.599 \longrightarrow 00:16:35.220$ or a GI medical oncology.

NOTE Confidence: 0.87521565

00:16:35.220 --> 00:16:40.080 Providers in yellow GI radiation oncology.

NOTE Confidence: 0.87521565

00:16:40.080 --> 00:16:42.210 And in green GI surgical oncology,

NOTE Confidence: 0.87521565

 $00:16:42.210 \longrightarrow 00:16:43.630$ so there certainly clustered

 $00:16:43.630 \longrightarrow 00:16:45.405$ at areas of denser population.

NOTE Confidence: 0.87521565

 $00:16:45.410 \longrightarrow 00:16:47.540$ Those are in the dark blue,

NOTE Confidence: 0.87521565

 $00:16:47.540 \longrightarrow 00:16:50.498$ but I think there are still

NOTE Confidence: 0.87521565

00:16:50.498 --> 00:16:51.977 certainly some opportunities.

NOTE Confidence: 0.87521565

 $00{:}16{:}51.980 \dashrightarrow 00{:}16{:}55.158$ Another data slide that I found also

NOTE Confidence: 0.87521565

 $00{:}16{:}55.158 \operatorname{--}{>} 00{:}16{:}57.480$ especially interesting as we think

NOTE Confidence: 0.87521565

00:16:57.480 --> 00:16:59.680 about sort of strategic planning,

NOTE Confidence: 0.87521565

 $00:16:59.680 \longrightarrow 00:17:02.398$ is the incidence of new GI

NOTE Confidence: 0.87521565

 $00:17:02.398 \longrightarrow 00:17:04.210$ cancers across the state.

NOTE Confidence: 0.87521565

 $00:17:04.210 \longrightarrow 00:17:06.928$ We here look at colon stomach,

NOTE Confidence: 0.87521565

00:17:06.930 --> 00:17:08.478 Asafa, Geo liver,

NOTE Confidence: 0.87521565

 $00:17:08.478 \longrightarrow 00:17:12.090$ and pancreas the the higher rates for

NOTE Confidence: 0.87521565

 $00{:}17{:}12.184 \dashrightarrow 00{:}17{:}15.834$ the state are in red and I have kind of

NOTE Confidence: 0.87521565

 $00:17:15.936 \longrightarrow 00:17:19.968$ squares around the two disease sites where.

NOTE Confidence: 0.87521565

00:17:19.970 --> 00:17:22.826 Our rates are higher than the US rates,

 $00:17:22.830 \longrightarrow 00:17:24.610$ and that's true for both

NOTE Confidence: 0.87521565

 $00{:}17{:}24.610 --> 00{:}17{:}25.678$ stomach and pancreas,

NOTE Confidence: 0.87521565

 $00{:}17{:}25.680 \rightarrow 00{:}17{:}28.123$ and I think that's perhaps why we

NOTE Confidence: 0.87521565

00:17:28.123 --> 00:17:30.119 actually accrue so successfully to

NOTE Confidence: 0.87521565

 $00:17:30.119 \longrightarrow 00:17:31.867$ pancreatic cancer clinical trials

NOTE Confidence: 0.87521565

 $00{:}17{:}31.867 \dashrightarrow 00{:}17{:}35.094$ and have a very robust clinical and

NOTE Confidence: 0.87521565

 $00:17:35.094 \longrightarrow 00:17:37.444$ research program in pancreas cancer.

NOTE Confidence: 0.87521565

00:17:37.450 --> 00:17:40.194 Would like to also mention you know,

NOTE Confidence: 0.87521565

00:17:40.200 --> 00:17:41.379 like almost everybody,

NOTE Confidence: 0.87521565

 $00:17:41.379 \longrightarrow 00:17:43.737$ covid has disrupted our outpatient practice.

NOTE Confidence: 0.87521565

 $00{:}17{:}43.740 \dashrightarrow 00{:}17{:}45.650$ GI Medical Oncology main campus

NOTE Confidence: 0.87521565

 $00:17:45.650 \longrightarrow 00:17:48.435$ is still on the 1st floor of

NOTE Confidence: 0.87521565

 $00{:}17{:}48.435 \dashrightarrow 00{:}17{:}50.415$ the North Haven Care Center.

NOTE Confidence: 0.87521565

 $00:17:50.420 \longrightarrow 00:17:53.236$ I'd like to use this as an opportunity

NOTE Confidence: 0.87521565

 $00:17:53.236 \longrightarrow 00:17:55.723$ to really thank my nursing partners

NOTE Confidence: 0.87521565

00:17:55.723 --> 00:17:58.279 Ali and seller Ooley Hazare PSM,

 $00:17:58.280 \longrightarrow 00:18:00.240$ Kathleen Moseman and Vanna Dest.

NOTE Confidence: 0.87521565

 $00:18:00.240 \longrightarrow 00:18:02.949$ We have worked hard to try to

NOTE Confidence: 0.87521565

 $00{:}18{:}02.949 \dashrightarrow 00{:}18{:}05.748$ make this space work for our team.

NOTE Confidence: 0.87521565

 $00:18:05.750 \longrightarrow 00:18:08.494$ There are still some challenges for sure,

NOTE Confidence: 0.87521565

 $00:18:08.500 \longrightarrow 00:18:09.526$ but we're appreciative.

NOTE Confidence: 0.87521565

00:18:09.526 --> 00:18:12.620 Of some of the small wins that we've had,

NOTE Confidence: 0.87521565

 $00:18:12.620 \longrightarrow 00:18:14.342$ such as a new counter space and

NOTE Confidence: 0.87521565

 $00:18:14.342 \longrightarrow 00:18:16.309$ putting in a for new workstations.

NOTE Confidence: 0.8364233

00:18:18.360 --> 00:18:19.756 I'll mention just briefly,

NOTE Confidence: 0.8364233

 $00:18:19.756 \longrightarrow 00:18:22.440$ our GI tumor burden multi D efforts,

NOTE Confidence: 0.8364233

00:18:22.440 --> 00:18:24.666 so as I had mentioned yesterday,

NOTE Confidence: 0.8364233

 $00:18:24.670 \longrightarrow 00:18:28.009$ we launched our split of the GI Tumor Board.

NOTE Confidence: 0.8364233

 $00:18:28.010 \longrightarrow 00:18:30.182$ This was initiated due to really

NOTE Confidence: 0.8364233

 $00:18:30.182 \longrightarrow 00:18:32.459$ incredible growth in our tumor board.

NOTE Confidence: 0.8364233

 $00:18:32.460 \longrightarrow 00:18:35.113$ We had really outgrown the existing time

00:18:35.113 --> 00:18:38.426 and this is really with credit due to Stacy

NOTE Confidence: 0.8364233

00:18:38.426 --> 00:18:41.357 sign and more in the lead and others,

NOTE Confidence: 0.8364233

 $00:18:41.360 \longrightarrow 00:18:43.747$ and in addition the colorectal team would

NOTE Confidence: 0.8364233

 $00:18:43.747 \longrightarrow 00:18:46.052$ like to launch the National Accreditation

NOTE Confidence: 0.8364233

 $00:18:46.052 \longrightarrow 00:18:48.488$ Program for Rectal Cancer and in.

NOTE Confidence: 0.8364233

 $00:18:48.490 \longrightarrow 00:18:51.289$ Order to do so and become an accredited site.

NOTE Confidence: 0.8364233

 $00:18:51.290 \longrightarrow 00:18:53.404$ We are required to have a separate

NOTE Confidence: 0.8364233

00:18:53.404 --> 00:18:55.587 tumor board so the upper GI pancreas

NOTE Confidence: 0.8364233

 $00{:}18{:}55.587 \dashrightarrow 00{:}18{:}58.099$ and net tumor board will be led by

NOTE Confidence: 0.8364233

00:18:58.099 --> 00:18:59.995 Stacy Stein in the colorectal ****

NOTE Confidence: 0.8364233

 $00{:}19{:}00.000 \dashrightarrow 00{:}19{:}02.480$ tumor board is being led by an poncho

NOTE Confidence: 0.8364233

 $00:19:02.480 \longrightarrow 00:19:04.656$ and hadn't put out happy and tell.

NOTE Confidence: 0.8364233

00:19:04.660 --> 00:19:06.526 This is our actually tumor board

NOTE Confidence: 0.8364233

 $00{:}19{:}06.526 \dashrightarrow 00{:}19{:}07.770$ from yesterday via zoom.

NOTE Confidence: 0.8364233

 $00:19:07.770 \longrightarrow 00:19:09.642$ I'd like to also re late take this

NOTE Confidence: 0.8364233

 $00{:}19{:}09.642 \dashrightarrow 00{:}19{:}11.652$ as an opportunity to thank Lauren

00:19:11.652 --> 00:19:13.866 Mallette who does an incredible job

NOTE Confidence: 0.8364233

00:19:13.931 --> 00:19:16.143 with tumor board and the support from

NOTE Confidence: 0.8364233

 $00:19:16.143 \longrightarrow 00:19:18.024$ other leaders to make this happen.

NOTE Confidence: 0.8364233

 $00:19:18.024 \longrightarrow 00:19:20.541$ It was a little bit more complicated than

NOTE Confidence: 0.8364233

00:19:20.541 --> 00:19:22.450 I imagined, but to Kevin Billingsley,

NOTE Confidence: 0.8364233

 $00:19:22.450 \longrightarrow 00:19:23.425$ hell Terra David.

NOTE Confidence: 0.8364233

00:19:23.430 --> 00:19:27.180 Fisher, Sonya, Bricelyn tide Wilcox.

NOTE Confidence: 0.8364233

00:19:27.180 --> 00:19:29.516 Are multi D clinics or a work in

NOTE Confidence: 0.8364233

 $00{:}19{:}29.516 \dashrightarrow 00{:}19{:}31.981$ progress and we are building on some

NOTE Confidence: 0.8364233

 $00{:}19{:}31.981 \dashrightarrow 00{:}19{:}33.796$ lessons learned from the earlier

NOTE Confidence: 0.8364233

 $00:19:33.865 \longrightarrow 00:19:36.043$ colorectal cancer pilot that was done

NOTE Confidence: 0.8364233

 $00:19:36.043 \longrightarrow 00:19:38.382$ in North Haven and delayed by Covid.

NOTE Confidence: 0.8364233

 $00:19:38.382 \longrightarrow 00:19:40.440$ We have plans for 2 pilots of

NOTE Confidence: 0.8364233

 $00:19:40.504 \longrightarrow 00:19:41.630$ colorectal cancer,

NOTE Confidence: 0.8364233

 $00{:}19{:}41.630 \dashrightarrow 00{:}19{:}43.490$ multi Dion Trumbull and a pancreas

 $00:19:43.490 \longrightarrow 00:19:46.341$ multi D at main campus and we have

NOTE Confidence: 0.8364233

 $00:19:46.341 \longrightarrow 00:19:48.266$ already started some smaller working

NOTE Confidence: 0.8364233

 $00:19:48.266 \longrightarrow 00:19:50.332$ groups and are meeting regularly to

NOTE Confidence: 0.8364233

 $00:19:50.332 \longrightarrow 00:19:52.312$ try to think about some strategic

NOTE Confidence: 0.8364233

00:19:52.312 --> 00:19:54.122 planning that that includes some

NOTE Confidence: 0.8364233

 $00:19:54.122 \longrightarrow 00:19:56.278$ of the elements listed here such

NOTE Confidence: 0.8364233

 $00:19:56.278 \longrightarrow 00:19:57.908$ as enhancing signature of care.

NOTE Confidence: 0.8364233

 $00:19:57.910 \longrightarrow 00:20:00.556$ Aligning with our existing disease programs.

NOTE Confidence: 0.8364233

 $00{:}20{:}00.560 \dashrightarrow 00{:}20{:}02.320$ Aligning with local expertise

NOTE Confidence: 0.8364233

 $00:20:02.320 \longrightarrow 00:20:03.200$ and specialties.

NOTE Confidence: 0.8364233

 $00{:}20{:}03.200 \dashrightarrow 00{:}20{:}06.063$ Selecting an optimal location and then later

NOTE Confidence: 0.8364233

00:20:06.063 --> 00:20:09.378 on we will work on operational topics,

NOTE Confidence: 0.8364233

00:20:09.380 --> 00:20:12.020 workflow being creative with Tele health,

NOTE Confidence: 0.8364233

 $00:20:12.020 \longrightarrow 00:20:14.430$ etc.

NOTE Confidence: 0.8364233

00:20:14.430 --> 00:20:14.808 Lastly,

NOTE Confidence: 0.8364233

00:20:14.808 --> 00:20:17.076 in the round with patient care,

 $00{:}20{:}17.080 \dashrightarrow 00{:}20{:}19.488$ I'd like to mention that our team

NOTE Confidence: 0.8364233

 $00{:}20{:}19.488 \dashrightarrow 00{:}20{:}21.417$ members make important contributions to

NOTE Confidence: 0.8364233

00:20:21.417 --> 00:20:23.907 the NCC and panels are institutional,

NOTE Confidence: 0.8364233

 $00:20:23.910 \longrightarrow 00:20:24.550$ representative issues,

NOTE Confidence: 0.8364233

 $00:20:24.550 \longrightarrow 00:20:26.790$ and Higgins who sits on the NCC

NOTE Confidence: 0.8364233

00:20:26.790 --> 00:20:28.828 and guidelines steering Committee,

NOTE Confidence: 0.8364233

 $00:20:28.830 \longrightarrow 00:20:30.730$ and she's been very helpful,

NOTE Confidence: 0.8364233

 $00:20:30.730 \longrightarrow 00:20:32.620$ helpful with guidance around this.

NOTE Confidence: 0.8364233

 $00:20:32.620 \longrightarrow 00:20:35.266$ So Stacy Stein serves on the hepatic

NOTE Confidence: 0.8364233

 $00:20:35.266 \longrightarrow 00:20:36.022$ biliary piano.

NOTE Confidence: 0.8364233

00:20:36.030 --> 00:20:38.308 John Kunsman on the pancreas, panel,

NOTE Confidence: 0.8364233

 $00:20:38.308 \longrightarrow 00:20:40.954$ Sajc on on the neuroendocrine tumor panel,

NOTE Confidence: 0.8364233

 $00{:}20{:}40.960 \dashrightarrow 00{:}20{:}43.228$ Jill Lacey on the Asafa Geo.

NOTE Confidence: 0.8364233

00:20:43.230 --> 00:20:46.650 Gastric panel in Kim Jong on the small bowel,

NOTE Confidence: 0.8364233

00:20:46.650 --> 00:20:48.364 colon, rectal,

 $00:20:48.364 \longrightarrow 00:20:49.221 ****$

NOTE Confidence: 0.8364233

 $00{:}20{:}49.221 \dashrightarrow 00{:}20{:}52.828$ Channel so let's move on and talk

NOTE Confidence: 0.8364233

 $00:20:52.828 \longrightarrow 00:20:53.744$ about education.

NOTE Confidence: 0.8364233

 $00:20:53.750 \longrightarrow 00:20:56.494$ I'd like to give two of our fellows

NOTE Confidence: 0.8364233

 $00:20:56.494 \longrightarrow 00:20:57.770$ a big shout.

NOTE Confidence: 0.8364233

00:20:57.770 --> 00:20:59.475 Out papers just gave presentations

NOTE Confidence: 0.8364233

00:20:59.475 --> 00:21:01.611 last week at our fellow research

NOTE Confidence: 0.8364233

 $00{:}21{:}01.611 \dashrightarrow 00{:}21{:}03.461$ retreat and Doctor Timmel Patel

NOTE Confidence: 0.8364233

 $00{:}21{:}03.461 \dashrightarrow 00{:}21{:}05.383$ gave a presentation on clinical

NOTE Confidence: 0.8364233

00:21:05.383 --> 00:21:06.887 outcomes or first line,

NOTE Confidence: 0.8364233

 $00{:}21{:}06.890 \dashrightarrow 00{:}21{:}09.445$ full fear and ox versus Gen Plusnet,

NOTE Confidence: 0.8364233

 $00:21:09.450 \longrightarrow 00:21:11.258$ paclitaxel in metastatic pancreas.

NOTE Confidence: 0.8364233

 $00{:}21{:}11.258 \dashrightarrow 00{:}21{:}13.970$ Cancer Timmel is a senior fellow

NOTE Confidence: 0.8364233

 $00:21:14.046 \longrightarrow 00:21:15.990$ will be graduating this year and

NOTE Confidence: 0.8364233

 $00:21:15.990 \longrightarrow 00:21:18.574$ has taken a job with the FDA where

NOTE Confidence: 0.8364233

 $00:21:18.574 \longrightarrow 00:21:20.764$ he will serve as a medical officer

 $00:21:20.764 \longrightarrow 00:21:22.948$ in the GI Cancer Review team.

NOTE Confidence: 0.8364233

 $00:21:22.950 \longrightarrow 00:21:24.622$ So in this study.

NOTE Confidence: 0.8364233

 $00:21:24.622 \longrightarrow 00:21:27.130$ Timol and his mentors Gelasia Michael

NOTE Confidence: 0.78860774

00:21:27.210 --> 00:21:29.720 Cicchini wanted to compare overall

NOTE Confidence: 0.78860774

 $00{:}21{:}29.720 \dashrightarrow 00{:}21{:}32.230$ survival and time to treatment.

NOTE Confidence: 0.78860774

 $00:21:32.230 \longrightarrow 00:21:34.515$ Discontinuation for two main chemotherapy

NOTE Confidence: 0.78860774

 $00:21:34.515 \longrightarrow 00:21:36.343$ regiments from metastatic pancreas.

NOTE Confidence: 0.78860774

 $00:21:36.350 \longrightarrow 00:21:39.098$ Cancer folfirinox in gym mat paclitaxel.

NOTE Confidence: 0.78860774

 $00:21:39.100 \longrightarrow 00:21:42.082$ They reviewed over 300 patients and found

NOTE Confidence: 0.78860774

 $00:21:42.082 \longrightarrow 00:21:44.414$ that patients treated with Firstline

NOTE Confidence: 0.78860774

 $00:21:44.414 \longrightarrow 00:21:46.874$ full paradox had increased survival.

NOTE Confidence: 0.78860774

 $00:21:46.880 \longrightarrow 00:21:49.352$ These patients were younger and less

NOTE Confidence: 0.78860774

 $00:21:49.352 \longrightarrow 00:21:52.629$ likely to be admitted while on treatment

NOTE Confidence: 0.78860774

 $00:21:52.629 \longrightarrow 00:21:55.209$ and rates of treatment discontinuation.

NOTE Confidence: 0.78860774

00:21:55.210 --> 00:21:57.760 Due to toxicity actually similar

 $00:21:57.760 \longrightarrow 00:21:59.800$ between the two regiments.

NOTE Confidence: 0.78860774

 $00{:}21{:}59.800 \dashrightarrow 00{:}22{:}02.188$ I'm Secondly, Doctor James Zang is

NOTE Confidence: 0.78860774

 $00{:}22{:}02.188 \dashrightarrow 00{:}22{:}04.310$ currently on RT32 training grants.

NOTE Confidence: 0.78860774

 $00:22:04.310 \longrightarrow 00:22:07.302$ She has one more year left on that

NOTE Confidence: 0.78860774

 $00:22:07.302 \longrightarrow 00:22:10.322$ she presented on her project at MGM

NOTE Confidence: 0.78860774

00:22:10.322 --> 00:22:12.507 T expression in colorectal cancer,

NOTE Confidence: 0.78860774

00:22:12.510 --> 00:22:14.150 the immune microenvironment in

NOTE Confidence: 0.78860774

00:22:14.150 --> 00:22:16.200 response to DNA damaging agents.

NOTE Confidence: 0.78860774

 $00{:}22{:}16.200 \dashrightarrow 00{:}22{:}18.660$ Her mentors are Doctor Kurt Shelper,

NOTE Confidence: 0.78860774

00:22:18.660 --> 00:22:20.710 Michael Cicchini and Jill Lacey,

NOTE Confidence: 0.78860774

 $00{:}22{:}20.710 \dashrightarrow 00{:}22{:}24.202$ and her specific aims and I will not go

NOTE Confidence: 0.78860774

00:22:24.202 --> 00:22:27.676 into all of the details on her project,

NOTE Confidence: 0.78860774

 $00:22:27.680 \longrightarrow 00:22:30.634$ which are were beautifully presented by her.

NOTE Confidence: 0.78860774

 $00:22:30.640 \longrightarrow 00:22:33.286$ At the specific aims are to quantify

NOTE Confidence: 0.78860774

 $00:22:33.286 \longrightarrow 00:22:35.485$ MGMT expression in colorectal cancer

NOTE Confidence: 0.78860774

 $00:22:35.485 \longrightarrow 00:22:38.455$ cohorts and assess Association of MGMT

00:22:38.455 --> 00:22:40.760 expression with DNA damage repair,

NOTE Confidence: 0.78860774

 $00{:}22{:}40.760 \dashrightarrow 00{:}22{:}42.520$ adaptive tumor, immune response,

NOTE Confidence: 0.78860774

 $00:22:42.520 \longrightarrow 00:22:43.840$ and overall survival,

NOTE Confidence: 0.78860774

 $00:22:43.840 \longrightarrow 00:22:46.647$ and then Secondly review some of these

NOTE Confidence: 0.78860774

 $00{:}22{:}46.647 \dashrightarrow 00{:}22{:}48.853$ same characteristics in an investigator

NOTE Confidence: 0.78860774

 $00{:}22{:}48.853 \dashrightarrow 00{:}22{:}50.717$ initiated clinical trial launched

NOTE Confidence: 0.78860774

 $00:22:50.717 \longrightarrow 00:22:53.525$ by Doctor Cicchini and Tamil Patel

NOTE Confidence: 0.78860774

 $00{:}22{:}53.525 \dashrightarrow 00{:}22{:}57.260$ using tamazula, my dental lab rib.

NOTE Confidence: 0.78860774

 $00:22:57.260 \longrightarrow 00:22:59.405$ So very exciting.

NOTE Confidence: 0.78860774

00:22:59.410 --> 00:23:01.636 In the realm of patient education,

NOTE Confidence: 0.78860774

 $00{:}23{:}01.640 \dashrightarrow 00{:}23{:}04.244$ we tested out the Smilow shares platform,

NOTE Confidence: 0.78860774

 $00:23:04.250 \longrightarrow 00:23:05.805$ which was actually very user

NOTE Confidence: 0.78860774

 $00:23:05.805 \longrightarrow 00:23:07.903$ friendly and lots of fun during

NOTE Confidence: 0.78860774

 $00:23:07.903 \longrightarrow 00:23:09.827$ colorectal Cancer Awareness Month.

NOTE Confidence: 0.78860774

 $00:23:09.830 \longrightarrow 00:23:12.427$ In March we gave two separate presentations,

00:23:12.430 --> 00:23:14.635 one to the New Haven community and

NOTE Confidence: 0.78860774

 $00{:}23{:}14.635 \dashrightarrow 00{:}23{:}17.268$ the other to the Greenwich Community,

NOTE Confidence: 0.78860774

 $00:23:17.270 \longrightarrow 00:23:19.867$ and we took advantage of again local

NOTE Confidence: 0.78860774

 $00:23:19.867 \longrightarrow 00:23:21.443$ expertise, particularly in Greenwich.

NOTE Confidence: 0.78860774

 $00:23:21.443 \longrightarrow 00:23:23.849$ We collaborated with one of the

NOTE Confidence: 0.78860774

00:23:23.849 --> 00:23:25.320 colorectal surgeons at Greenwich

NOTE Confidence: 0.78860774

 $00:23:25.320 \longrightarrow 00:23:27.679$ Hospital and two of our Care center,

NOTE Confidence: 0.78860774

 $00:23:27.680 \longrightarrow 00:23:28.422$ medical oncologists,

NOTE Confidence: 0.78860774

 $00:23:28.422 \longrightarrow 00:23:29.906$ Doctor Lee and Doctor.

NOTE Confidence: 0.8061731

 $00:23:32.360 \longrightarrow 00:23:34.766$ So moving on to clinical research.

NOTE Confidence: 0.8061731

 $00{:}23{:}34.770 \dashrightarrow 00{:}23{:}37.762$ So how does the GI DART clinical trial

NOTE Confidence: 0.8061731

00:23:37.762 --> 00:23:39.978 portfolio compare internally and again?

NOTE Confidence: 0.8061731

 $00:23:39.980 \longrightarrow 00:23:42.248$ These are metrics that we are looking

NOTE Confidence: 0.8061731

 $00:23:42.248 \longrightarrow 00:23:45.362$ at in the course of our leadership

NOTE Confidence: 0.8061731

00:23:45.362 --> 00:23:47.603 cabinet discussions. A thank you.

NOTE Confidence: 0.8061731

 $00:23:47.603 \longrightarrow 00:23:50.410$ Great thank you to Christina Weishar CTM.

 $00:23:50.410 \longrightarrow 00:23:53.610$ So the GI DART clinical trial portfolio is

NOTE Confidence: 0.8061731

00:23:53.610 --> 00:23:56.416 8% of YCS overall clinical trial portfolio,

NOTE Confidence: 0.8061731

 $00:23:56.420 \longrightarrow 00:23:58.830$ yet it represents actually 11% of

NOTE Confidence: 0.8061731

 $00:23:58.830 \longrightarrow 00:24:00.830$ all the clinical trial accruals.

NOTE Confidence: 0.8061731

 $00:24:00.830 \longrightarrow 00:24:03.090$ We have proved quite well.

NOTE Confidence: 0.8061731

 $00{:}24{:}03.090 \mathrel{--}{>} 00{:}24{:}05.766$ And 14% of analytic cases indicating

NOTE Confidence: 0.8061731

 $00:24:05.766 \longrightarrow 00:24:08.349$ that we could potentially do better.

NOTE Confidence: 0.8061731

 $00:24:08.350 \longrightarrow 00:24:11.108$ 5% of the GI cancer analytic case

NOTE Confidence: 0.8061731

00:24:11.108 --> 00:24:13.610 volume accrues to clinical trials,

NOTE Confidence: 0.8061731

 $00:24:13.610 \longrightarrow 00:24:17.106$ so we are higher than the national benchmark.

NOTE Confidence: 0.8061731

 $00:24:17.110 \longrightarrow 00:24:20.606$ However, the NCI expectation is as much as

NOTE Confidence: 0.8061731

 $00:24:20.606 \longrightarrow 00:24:24.554$ 20%, so for sure it opportunity to do better,

NOTE Confidence: 0.8061731

 $00{:}24{:}24.560 \dashrightarrow 00{:}24{:}28.056$ or GI DART sponsor mix is as follows.

NOTE Confidence: 0.8061731

 $00{:}24{:}28.060 \dashrightarrow 00{:}24{:}31.068$ 44% industry, 39% NCI, and 17% IIT.

NOTE Confidence: 0.8061731

 $00:24:31.068 \longrightarrow 00:24:34.092$ The ideal is thought to be a third,

 $00:24:34.100 \longrightarrow 00:24:36.613$ a third a third, so we certainly

NOTE Confidence: 0.8061731

00:24:36.613 --> 00:24:39.098 would like to increase our IIT.

NOTE Confidence: 0.8061731

00:24:39.100 --> 00:24:41.470 Portfolio.

NOTE Confidence: 0.8061731

00:24:41.470 --> 00:24:44.158 Our accrual trends follow the overall

NOTE Confidence: 0.8061731

 $00:24:44.158 \longrightarrow 00:24:47.025$ YCC accrual trends with a dip during

NOTE Confidence: 0.8061731

00:24:47.025 --> 00:24:49.792 covid and we are now starting to recover

NOTE Confidence: 0.8061731

 $00:24:49.792 \longrightarrow 00:24:52.792$ and our accrual over the last 12 months

NOTE Confidence: 0.8061731

00:24:52.792 --> 00:24:55.120 has been heavily reliant on cooperative

NOTE Confidence: 0.8061731

 $00{:}24{:}55.120 \dashrightarrow 00{:}24{:}57.070$ group studies and industry studies.

NOTE Confidence: 0.8061731

 $00:24:57.070 \longrightarrow 00:25:00.342$ And note that the numbers on this slide

NOTE Confidence: 0.8061731

 $00:25:00.342 \longrightarrow 00:25:02.918$ represent trials managed by the GI Dark,

NOTE Confidence: 0.8061731

 $00:25:02.920 \longrightarrow 00:25:05.447$ but we have a number of patients

NOTE Confidence: 0.8061731

 $00:25:05.447 \longrightarrow 00:25:08.380$ that go on to other other darts,

NOTE Confidence: 0.8061731

 $00:25:08.380 \longrightarrow 00:25:11.908$ such as phase one.

NOTE Confidence: 0.8061731

 $00:25:11.910 \longrightarrow 00:25:14.142$ We are grateful and very relyant

NOTE Confidence: 0.8061731

 $00{:}25{:}14.142 \dashrightarrow 00{:}25{:}16.669$ on our care center colleagues for

 $00:25:16.669 \longrightarrow 00:25:19.069$ accrual to our clinical trials.

NOTE Confidence: 0.8061731

 $00:25:19.070 \longrightarrow 00:25:19.884$ In fact,

NOTE Confidence: 0.8061731

 $00:25:19.884 \longrightarrow 00:25:22.733$ 38% of our clinical trial accruals came

NOTE Confidence: 0.8061731

 $00:25:22.733 \longrightarrow 00:25:26.218$ from our care centers between 2016 and 2019.

NOTE Confidence: 0.8227002

00:25:28.620 --> 00:25:31.581 I'd like to highlight two of our

NOTE Confidence: 0.8227002

 $00:25:31.581 \longrightarrow 00:25:33.608$ investigator initiated clinical trials that

NOTE Confidence: 0.8227002

00:25:33.608 --> 00:25:36.360 first here is pidd by Doctor Jill Lacey.

NOTE Confidence: 0.8227002

 $00:25:36.360 \longrightarrow 00:25:38.859$ It's a phase two study of PERI

NOTE Confidence: 0.8227002

 $00:25:38.859 \longrightarrow 00:25:39.930$ operative modified folfirinox

NOTE Confidence: 0.8227002

 $00{:}25{:}39.993 \dashrightarrow 00{:}25{:}41.777$ and localized pancreas cancer.

NOTE Confidence: 0.8227002

 $00{:}25{:}41.780 \dashrightarrow 00{:}25{:}44.062$ It's a single arm study in which

NOTE Confidence: 0.8227002

 $00:25:44.062 \longrightarrow 00:25:46.319$ patients receive 6 cycles of modified

NOTE Confidence: 0.8227002

 $00{:}25{:}46.319 \dashrightarrow 00{:}25{:}48.334$ folfirinox followed by surgery followed

NOTE Confidence: 0.8227002

 $00:25:48.334 \longrightarrow 00:25:51.449$ by 6 more cycles of modified folfirinox.

NOTE Confidence: 0.8227002

 $00:25:51.450 \longrightarrow 00:25:53.385$ This is actually one patient

00:25:53.385 --> 00:25:54.933 away from completing enrollment,

NOTE Confidence: 0.8227002

 $00{:}25{:}54.940 {\:{\circ}{\circ}{\circ}}>00{:}25{:}56.920$ so we're very excited about

NOTE Confidence: 0.8227002

 $00:25:56.920 \longrightarrow 00:25:58.900$ that and I think that.

NOTE Confidence: 0.8227002

 $00:25:58.900 \longrightarrow 00:26:01.912$ There will be some very interesting

NOTE Confidence: 0.8227002

 $00:26:01.912 \longrightarrow 00:26:04.770$ correlative's that come along with this.

NOTE Confidence: 0.8227002

00:26:04.770 --> 00:26:07.794 Doctor Kim Jong is leading another

NOTE Confidence: 0.8227002

 $00{:}26{:}07.794 \dashrightarrow 00{:}26{:}09.306$ investigator initiated trial,

NOTE Confidence: 0.8227002

00:26:09.310 --> 00:26:12.796 a phase two study to evaluate modified

NOTE Confidence: 0.8227002

 $00:26:12.796 \longrightarrow 00:26:15.578$ folfirinox and stereotactic body radiation

NOTE Confidence: 0.8227002

 $00:26:15.578 \longrightarrow 00:26:18.598$ and nonmetastatic unrespectable key back.

NOTE Confidence: 0.8227002

 $00{:}26{:}18.600 \dashrightarrow 00{:}26{:}21.198$ In this study, patients received up

NOTE Confidence: 0.8227002

00:26:21.198 --> 00:26:23.998 front fulfi Rannoch 6 to 12 cycles,

NOTE Confidence: 0.8227002

 $00:26:24.000 \longrightarrow 00:26:28.290$ followed by SPRT, followed by surgery.

NOTE Confidence: 0.8227002

 $00:26:28.290 \longrightarrow 00:26:31.506$ There are a number of really.

NOTE Confidence: 0.8227002

00:26:31.510 --> 00:26:34.340 It's a very interesting correlative's

NOTE Confidence: 0.8227002

 $00:26:34.340 \longrightarrow 00:26:37.170$ that are multi disciplinary including

00:26:37.248 --> 00:26:39.738 US elastography with doctors Farallones

NOTE Confidence: 0.8227002

00:26:39.738 --> 00:26:42.760 leniency T DNA with Doctor Patel,

NOTE Confidence: 0.8227002

00:26:42.760 --> 00:26:44.900 molecular and immune future

NOTE Confidence: 0.8227002

 $00:26:44.900 \longrightarrow 00:26:46.505$ assessment with doctors.

NOTE Confidence: 0.8227002

 $00{:}26{:}46.510 \dashrightarrow 00{:}26{:}48.674$ Cikini Joshi Farallon Sklar

NOTE Confidence: 0.8227002

00:26:48.674 --> 00:26:50.838 and development of pancreatic

NOTE Confidence: 0.8227002

00:26:50.838 --> 00:26:52.410 organoids instructor Joshi.

NOTE Confidence: 0.83298975

 $00{:}26{:}57.730 \dashrightarrow 00{:}27{:}00.222$ I also would like to really give

NOTE Confidence: 0.83298975

 $00{:}27{:}00.222 \dashrightarrow 00{:}27{:}02.648$ some kudos to Doctor Michael Cicchini

NOTE Confidence: 0.83298975

 $00:27:02.648 \longrightarrow 00:27:05.630$ who has just received his KO 8,

NOTE Confidence: 0.83298975

 $00:27:05.630 \longrightarrow 00:27:08.038$ so this is really a beautiful combination

NOTE Confidence: 0.83298975

 $00{:}27{:}08.038 \dashrightarrow 00{:}27{:}10.769$ of the clinical and translational research.

NOTE Confidence: 0.83298975

 $00{:}27{:}10.770 \dashrightarrow 00{:}27{:}13.586$ So the title of his Kaylie does DNA

NOTE Confidence: 0.83298975

 $00:27:13.586 \longrightarrow 00:27:16.518$ damage as a tool to enhance the

NOTE Confidence: 0.83298975

 $00:27:16.518 \longrightarrow 00:27:18.668$ immunogenicity of cold GI tumors.

 $00:27:18.670 \longrightarrow 00:27:21.040$ His mentorship committee is listed here.

NOTE Confidence: 0.83298975

 $00:27:21.040 \longrightarrow 00:27:23.010$ His aims in his K-8.

NOTE Confidence: 0.83298975

 $00:27:23.010 \longrightarrow 00:27:25.452$ I'll just read them and won't

NOTE Confidence: 0.83298975

 $00:27:25.452 \longrightarrow 00:27:27.080$ go into the details.

NOTE Confidence: 0.83298975

 $00:27:27.080 \longrightarrow 00:27:29.330$ But it is to perform clinical

NOTE Confidence: 0.83298975

00:27:29.330 --> 00:27:31.324 trials with novel combinations of

NOTE Confidence: 0.83298975

 $00:27:31.324 \longrightarrow 00:27:33.479$ DNA damaging agents for patients

NOTE Confidence: 0.83298975

00:27:33.479 --> 00:27:35.203 with MGMT promoter hypomethylated

NOTE Confidence: 0.83298975

 $00{:}27{:}35.269 \dashrightarrow 00{:}27{:}37.369$ colorectal cancer to identify

NOTE Confidence: 0.83298975

00:27:37.369 --> 00:27:39.469 predictive biomarkers for novel

NOTE Confidence: 0.83298975

00:27:39.469 --> 00:27:42.760 alculator combinations in CRC and Tour desk,

NOTE Confidence: 0.83298975

 $00:27:42.760 \longrightarrow 00:27:46.585$ assess DNA damage is a tool to enhance the

NOTE Confidence: 0.83298975

 $00:27:46.585 \longrightarrow 00:27:49.029$ immunogenicity of cold colorectal tumors.

NOTE Confidence: 0.8166703

 $00:27:51.160 \longrightarrow 00:27:53.616$ I'd like to end with a couple of

NOTE Confidence: 0.8166703

00:27:53.616 --> 00:27:55.810 new projects that we're working on.

NOTE Confidence: 0.8166703

00:27:55.810 --> 00:27:58.099 This one is actually very exciting and

 $00:27:58.099 \longrightarrow 00:28:00.802$ I'll give a little bit of a teaser and

NOTE Confidence: 0.8166703

 $00{:}28{:}00.802 \dashrightarrow 00{:}28{:}03.869$ I think Roy and add Captain and I are

NOTE Confidence: 0.8166703

00:28:03.869 --> 00:28:05.769 talking about finding another forum,

NOTE Confidence: 0.8166703

 $00:28:05.770 \longrightarrow 00:28:08.150$ but we are working on a clinical

NOTE Confidence: 0.8166703

00:28:08.150 --> 00:28:10.197 trial matching project in GI oncology

NOTE Confidence: 0.8166703

 $00:28:10.197 \longrightarrow 00:28:12.123$ with Guangdong and Wade Schultz and

NOTE Confidence: 0.8166703

 $00:28:12.123 \longrightarrow 00:28:14.439$ a team to really determine if we

NOTE Confidence: 0.8166703

 $00:28:14.439 \longrightarrow 00:28:16.392$ can match patients to the clinical

NOTE Confidence: 0.8166703

00:28:16.392 --> 00:28:18.047 trial at the right time,

NOTE Confidence: 0.8166703

 $00:28:18.050 \longrightarrow 00:28:19.530$ accurately efficiently with high

NOTE Confidence: 0.8166703

 $00{:}28{:}19.530 \dashrightarrow 00{:}28{:}21.750$ volume in a project that's scalable.

NOTE Confidence: 0.8166703

 $00:28:21.750 \longrightarrow 00:28:24.132$ Other team members included Kathy and

NOTE Confidence: 0.8166703

 $00{:}28{:}24.132 --> 00{:}28{:}27.990$ Christina Weiss, myself in your fish back.

NOTE Confidence: 0.8166703

 $00{:}28{:}27.990 \dashrightarrow 00{:}28{:}30.671$ We are using this clinical trial on

NOTE Confidence: 0.8166703

 $00:28:30.671 \longrightarrow 00:28:32.709$ its Michael Cicchini is tamazula.

 $00:28:32.710 \longrightarrow 00:28:34.670$ My dental lab rib study.

NOTE Confidence: 0.8166703

 $00{:}28{:}34.670 \dashrightarrow 00{:}28{:}37.596$ As a pilot we've selected for inclusion

NOTE Confidence: 0.8166703

 $00:28:37.596 \longrightarrow 00:28:41.123$ criteria in which Gwen and Wade and their

NOTE Confidence: 0.8166703

 $00:28:41.123 \longrightarrow 00:28:43.323$ team use natural language processing

NOTE Confidence: 0.8166703

 $00:28:43.397 \longrightarrow 00:28:45.887$ and structuring data from the EMR.

NOTE Confidence: 0.8166703

 $00:28:45.890 \longrightarrow 00:28:49.090$ This is the workflow focus on the orange

NOTE Confidence: 0.8166703

 $00:28:49.090 \longrightarrow 00:28:53.239$ box and we are using the entry event in the

NOTE Confidence: 0.8166703

 $00:28:53.239 \longrightarrow 00:28:56.308$ pre screening event as pilots right now.

NOTE Confidence: 0.8166703

 $00:28:56.310 \longrightarrow 00:28:59.190$ Just to give you a sense of the numbers,

NOTE Confidence: 0.8166703

 $00:28:59.190 \longrightarrow 00:29:01.566$ we that blue top line looks at the number

NOTE Confidence: 0.8166703

 $00{:}29{:}01.566 \to 00{:}29{:}03.906$ of visits to GI Oncology Department by

NOTE Confidence: 0.8166703

00:29:03.906 --> 00:29:06.354 week followed by the number of patients

NOTE Confidence: 0.8166703

00:29:06.354 --> 00:29:08.790 unique patients to GI oncology by week,

NOTE Confidence: 0.8166703

 $00:29:08.790 \longrightarrow 00:29:09.994$ then down in Gray.

NOTE Confidence: 0.8166703

 $00:29:09.994 \longrightarrow 00:29:12.192$ The number of patients with colorectal cancer

NOTE Confidence: 0.8166703

00:29:12.192 --> 00:29:14.226 than those with metastatic stage four,

 $00:29:14.230 \longrightarrow 00:29:15.780$ and then ultimately that bottom

NOTE Confidence: 0.8166703

 $00{:}29{:}15.780 \dashrightarrow 00{:}29{:}17.932$ line where you see the numbers in

NOTE Confidence: 0.8166703

 $00:29:17.932 \longrightarrow 00:29:19.822$ red range from 10 to 15 patients

NOTE Confidence: 0.8166703

00:29:19.822 --> 00:29:21.986 per week that could potentially be

NOTE Confidence: 0.8166703

 $00:29:21.986 \longrightarrow 00:29:23.821$ eligible for this clinical trial.

NOTE Confidence: 0.8166703

 $00:29:23.830 \longrightarrow 00:29:25.684$ How great would it be if

NOTE Confidence: 0.8166703

00:29:25.684 --> 00:29:27.470 you got in your inbox?

NOTE Confidence: 0.8166703

 $00{:}29{:}27.470 \longrightarrow 00{:}29{:}29.732$ A list of eligible patients every

NOTE Confidence: 0.8166703

 $00{:}29{:}29{:}732 \dashrightarrow 00{:}29{:}31.770$ week for your individual trials.

NOTE Confidence: 0.8166703

 $00:29:31.770 \longrightarrow 00:29:33.725$ So this pilot was incredibly

NOTE Confidence: 0.8166703

 $00:29:33.725 \longrightarrow 00:29:34.898$ effective and efficient.

NOTE Confidence: 0.8166703

 $00{:}29{:}34.900 \dashrightarrow 00{:}29{:}38.442$ It had about a 98% accuracy rate and it

NOTE Confidence: 0.8166703

 $00{:}29{:}38.442 \dashrightarrow 00{:}29{:}41.549$ really cut down on the amount of time.

NOTE Confidence: 0.8166703

 $00:29:41.550 \longrightarrow 00:29:43.710$ So before we estimated 3.11 minutes

NOTE Confidence: 0.8166703

 $00:29:43.710 \longrightarrow 00:29:46.477$ per chart for 10 week full time

 $00:29:46.477 \longrightarrow 00:29:48.557$ working hours and afterwards 1.82

NOTE Confidence: 0.8166703

 $00{:}29{:}48.557 {\:{\circ}{\circ}{\circ}}>00{:}29{:}50.987$ minutes per chart which just equals

NOTE Confidence: 0.8166703

 $00:29:50.987 \longrightarrow 00:29:53.825$ three days of full time working hours.

NOTE Confidence: 0.8166703

 $00{:}29{:}53.825 \dashrightarrow 00{:}29{:}57.095$ So I'm really excited to see

NOTE Confidence: 0.8166703

 $00:29:57.095 \longrightarrow 00:29:59.360$ where where this goes.

NOTE Confidence: 0.8166703

 $00:29:59.360 \longrightarrow 00:29:59.755$ Lastly,

NOTE Confidence: 0.8166703

 $00{:}29{:}59.755 \dashrightarrow 00{:}30{:}02.125$ Aryel GI tumor biorepository is a

NOTE Confidence: 0.8166703

 $00{:}30{:}02.125 \dashrightarrow 00{:}30{:}04.160$ real foundation for our program.

NOTE Confidence: 0.8166703

00:30:04.160 --> 00:30:07.360 This is being PII by by Doctor John,

NOTE Confidence: 0.8166703

 $00:30:07.360 \longrightarrow 00:30:09.360$ Councilman and the technician Joanna,

NOTE Confidence: 0.8166703

 $00{:}30{:}09.360 \dashrightarrow 00{:}30{:}11.574$ who it's been in existence since

NOTE Confidence: 0.8166703

00:30:11.574 --> 00:30:14.559 2012 and we have over 1100 patients,

NOTE Confidence: 0.8166703

00:30:14.560 --> 00:30:17.360 but it certainly has, like many things,

NOTE Confidence: 0.8166703

 $00:30:17.360 \longrightarrow 00:30:20.560$ taken a bit of a hit during covid.

NOTE Confidence: 0.8166703

 $00:30:20.560 \longrightarrow 00:30:23.185$ John has really taken this as an

NOTE Confidence: 0.8166703

 $00:30:23.185 \longrightarrow 00:30:25.360$ opportunity to revamp and modernize,

 $00:30:25.360 \longrightarrow 00:30:27.832$ so our accrual numbers have certainly

NOTE Confidence: 0.8166703

 $00{:}30{:}27.832 \dashrightarrow 00{:}30{:}29.480$ increased overtime or biorepository.

NOTE Confidence: 0.8166703

 $00:30:29.480 \longrightarrow 00:30:31.690$ Is over represented with colon,

NOTE Confidence: 0.8166703

 $00:30:31.690 \longrightarrow 00:30:33.970$ rectal and pancreas tumors.

NOTE Confidence: 0.8166703

 $00:30:33.970 \longrightarrow 00:30:37.990$ We certainly hope to expand on this.

NOTE Confidence: 0.8166703

 $00:30:37.990 \longrightarrow 00:30:39.470$ And as I'd mentioned,

NOTE Confidence: 0.8166703

00:30:39.470 --> 00:30:41.690 John really has revamped the infrastructure,

NOTE Confidence: 0.8166703

 $00:30:41.690 \longrightarrow 00:30:44.280$ so we have an existing steering committee,

NOTE Confidence: 0.8166703

 $00:30:44.280 \longrightarrow 00:30:46.870$ but we now actually have a new

NOTE Confidence: 0.8166703

 $00:30:46.870 \longrightarrow 00:30:47.980$ location and BML.

NOTE Confidence: 0.8166703

 $00:30:47.980 \longrightarrow 00:30:50.283$ We have a brand new freezer and

NOTE Confidence: 0.8166703

 $00:30:50.283 \longrightarrow 00:30:52.136$ John has completely overhauled the

NOTE Confidence: 0.8166703

 $00:30:52.136 \longrightarrow 00:30:54.536$ consent and intake process to reduce

NOTE Confidence: 0.8166703

00:30:54.536 --> 00:30:57.237 the survey link for patients and to

NOTE Confidence: 0.8166703

 $00:30:57.237 \longrightarrow 00:30:59.072$ add explicit language for modern

 $00:30:59.080 \longrightarrow 00:31:00.865$ research activities such as multi

NOTE Confidence: 0.8166703

 $00{:}31{:}00.865 \dashrightarrow 00{:}31{:}02.650$ omics cell lines and organoids

NOTE Confidence: 0.83988595

 $00{:}31{:}02.707 \dashrightarrow 00{:}31{:}04.219$ and deposition of a nonymized

NOTE Confidence: 0.83988595

 $00:31:04.219 \longrightarrow 00:31:06.109$ data in the public repository's.

NOTE Confidence: 0.83988595

 $00:31:06.110 \longrightarrow 00:31:09.530$ And we have a number of examples of active.

NOTE Confidence: 0.83988595

 $00{:}31{:}09.530 \dashrightarrow 00{:}31{:}11.570$ Projects including a study in pydoc

NOTE Confidence: 0.83988595

 $00:31:11.570 \longrightarrow 00:31:14.230$ with UCLA and then Elappara Bram study

NOTE Confidence: 0.83988595

 $00:31:14.230 \longrightarrow 00:31:16.280$ on this multi institution study.

NOTE Confidence: 0.83988595

 $00:31:16.280 \longrightarrow 00:31:19.280$ So we have a number of future needs,

NOTE Confidence: 0.83988595

00:31:19.280 --> 00:31:20.030 including more,

NOTE Confidence: 0.83988595

 $00:31:20.030 \longrightarrow 00:31:22.280$ broader and more diverse tumor collection,

NOTE Confidence: 0.83988595

 $00:31:22.280 \longrightarrow 00:31:24.135$ resumption of specimen collection in

NOTE Confidence: 0.83988595

 $00:31:24.135 \longrightarrow 00:31:26.779$ our care centers and updating our database.

NOTE Confidence: 0.83988595

 $00{:}31{:}26.780 \longrightarrow 00{:}31{:}29.300$ I'm going to just end with a mention

NOTE Confidence: 0.83988595

00:31:29.300 --> 00:31:31.975 of some really exciting work that Wade

NOTE Confidence: 0.83988595

00:31:31.975 --> 00:31:35.220 Schultz and his team are doing to use

 $00:31:35.220 \longrightarrow 00:31:37.225$ a computational health platform to

NOTE Confidence: 0.83988595

 $00{:}31{:}37.225 \dashrightarrow 00{:}31{:}39.422$ build an integrated clinical database.

NOTE Confidence: 0.83988595

 $00:31:39.422 \longrightarrow 00:31:40.350$ So imagine.

NOTE Confidence: 0.83988595

 $00:31:40.350 \longrightarrow 00:31:43.206$ That you have all of your structured

NOTE Confidence: 0.83988595

00:31:43.206 --> 00:31:45.244 E HR data, imaging, pathology,

NOTE Confidence: 0.83988595

 $00:31:45.244 \longrightarrow 00:31:47.686$ genetics, all of these data sources.

NOTE Confidence: 0.83988595

 $00:31:47.690 \longrightarrow 00:31:50.950$ You put it into a funnel and this

NOTE Confidence: 0.83988595

 $00:31:50.950 \longrightarrow 00:31:53.380$ is a essentially a workflow you

NOTE Confidence: 0.83988595

 $00{:}31{:}53.465 {\:\dashrightarrow\:} 00{:}31{:}56.069$ can create curated data by the use

NOTE Confidence: 0.83988595

00:31:56.069 --> 00:31:59.419 of red cap and then Wade and his

NOTE Confidence: 0.83988595

 $00{:}31{:}59.419 \dashrightarrow 00{:}32{:}02.044$ team create aid and integrated user

NOTE Confidence: 0.83988595

 $00:32:02.044 \dashrightarrow 00:32:04.888$ interface so that it really minimizes

NOTE Confidence: 0.83988595

 $00{:}32{:}04.888 \dashrightarrow 00{:}32{:}07.219$ redundancy of manual data entry.

NOTE Confidence: 0.83988595

 $00:32:07.220 \longrightarrow 00:32:10.088$ The CHP news cases include COVID-19,

NOTE Confidence: 0.83988595

 $00:32:10.090 \longrightarrow 00:32:11.998$ in which they were.

 $00:32:11.998 \longrightarrow 00:32:14.383$ The teams were quite prolific.

NOTE Confidence: 0.83988595

 $00{:}32{:}14.390 \dashrightarrow 00{:}32{:}17.096$ He matology is just starting to launch

NOTE Confidence: 0.83988595

00:32:17.096 --> 00:32:20.497 this and integrating a number of key

NOTE Confidence: 0.83988595

00:32:20.497 --> 00:32:22.517 structured databases including C,

NOTE Confidence: 0.83988595

00:32:22.520 --> 00:32:23.171 Bioportal,

NOTE Confidence: 0.83988595

 $00:32:23.171 \longrightarrow 00:32:27.728$ Redcap omaf genomic data in registry data.

NOTE Confidence: 0.83988595

 $00:32:27.730 \longrightarrow 00:32:29.510$ So to end, you know,

NOTE Confidence: 0.83988595

 $00:32:29.510 \longrightarrow 00:32:32.696$ I think that we have a number of strengths.

NOTE Confidence: 0.83988595

 $00{:}32{:}32.700 \dashrightarrow 00{:}32{:}34.830$ We have a high patient volume

NOTE Confidence: 0.83988595

 $00:32:34.830 \longrightarrow 00:32:35.895$ within our network.

NOTE Confidence: 0.83988595

 $00{:}32{:}35.900 \dashrightarrow 00{:}32{:}38.385$ We have a large clinical trial and

NOTE Confidence: 0.83988595

 $00:32:38.385 \longrightarrow 00:32:39.450$ financially healthy portfolio.

NOTE Confidence: 0.83988595

 $00:32:39.450 \longrightarrow 00:32:41.580$ Still that we're hoping to maintain.

NOTE Confidence: 0.83988595

 $00{:}32{:}41.580 \dashrightarrow 00{:}32{:}43.524$ We have an existing and expanding

NOTE Confidence: 0.83988595

 $00:32:43.524 \longrightarrow 00:32:44.820$ biorepository and strong basic

NOTE Confidence: 0.83988595

 $00{:}32{:}44.873 \dashrightarrow 00{:}32{:}46.190$ and translational science.

00:32:46.190 --> 00:32:48.966 I think we have a lot of opportunities

NOTE Confidence: 0.83988595

 $00:32:48.966 \longrightarrow 00:32:51.518$ in the next one to five years,

NOTE Confidence: 0.83988595

 $00:32:51.520 \longrightarrow 00:32:52.940$ including expanding our clinical

NOTE Confidence: 0.83988595

00:32:52.940 --> 00:32:54.360 trial portfolio with IIT's.

NOTE Confidence: 0.83988595

 $00:32:54.360 \longrightarrow 00:32:55.832$ I think really investing

NOTE Confidence: 0.83988595

 $00:32:55.832 \longrightarrow 00:32:57.304$ and expanding and the.

NOTE Confidence: 0.83988595

00:32:57.310 --> 00:32:57.664 Biorepository,

NOTE Confidence: 0.83988595

 $00{:}32{:}57.664 --> 00{:}33{:}00.142$ I think that will help us help

NOTE Confidence: 0.83988595

 $00:33:00.142 \longrightarrow 00:33:02.530$ lead us to better team science and

NOTE Confidence: 0.83988595

 $00{:}33{:}02.530 \dashrightarrow 00{:}33{:}05.022$ then in the long term or medium

NOTE Confidence: 0.83988595

 $00:33:05.022 \longrightarrow 00:33:07.062$ term goals of obtaining multipy

NOTE Confidence: 0.83988595

 $00:33:07.062 \longrightarrow 00:33:08.986$ and program project funding.

NOTE Confidence: 0.83988595

 $00{:}33{:}08.986 \dashrightarrow 00{:}33{:}12.466$ So I will stop there.

NOTE Confidence: 0.83988595

 $00:33:12.470 \longrightarrow 00:33:14.300$ And pass the baton to Amanda,

NOTE Confidence: 0.83988595

 $00:33:14.300 \longrightarrow 00:33:16.435$ and then we'll take questions after right?

00:33:16.440 --> 00:33:18.234 Thanks, Pam. I think we should

NOTE Confidence: 0.7706427

 $00:33:18.234 \longrightarrow 00:33:20.105$ move on to Amanda and then

NOTE Confidence: 0.7706427

 $00{:}33{:}20.105 \dashrightarrow 00{:}33{:}21.929$ we'll do questions at the end.

NOTE Confidence: 0.7706427

 $00:33:21.930 \longrightarrow 00:33:24.058$ Please put your questions in the chat.

NOTE Confidence: 0.7706427

 $00:33:24.060 \longrightarrow 00:33:26.500$ I know I have a few for you,

NOTE Confidence: 0.7706427

 $00{:}33{:}26.500 \to 00{:}33{:}28.635$ but now we're very fortunate to have.

NOTE Confidence: 0.7706427

 $00:33:28.640 \longrightarrow 00:33:30.356$ Mandar was Amdar who is assistant

NOTE Confidence: 0.7706427

 $00:33:30.356 \longrightarrow 00:33:31.990$ professor of genetics and Medicine.

NOTE Confidence: 0.7706427

 $00:33:31.990 \longrightarrow 00:33:33.515$ He's part of the Yale

NOTE Confidence: 0.7706427

00:33:33.515 --> 00:33:34.430 Cancer Biology Institute,

NOTE Confidence: 0.7706427

 $00:33:34.430 \longrightarrow 00:33:35.594$ threes at West Campus,

NOTE Confidence: 0.7706427

 $00:33:35.594 \longrightarrow 00:33:38.569$ and my Dream is one day will hold one of

NOTE Confidence: 0.7706427

 $00:33:38.569 \longrightarrow 00:33:41.140$ our grand rounds in person on West Campus.

NOTE Confidence: 0.7706427

00:33:41.140 --> 00:33:42.725 I promised that tomorrow I'm

NOTE Confidence: 0.7706427

 $00:33:42.725 \longrightarrow 00:33:43.993$ in many years ago.

NOTE Confidence: 0.7706427

 $00{:}33{:}44.000 \dashrightarrow 00{:}33{:}46.359$ We will hold to that scientific director

 $00:33:46.359 \longrightarrow 00:33:48.260$ of the Center for Gastrointestinal

NOTE Confidence: 0.7706427

 $00{:}33{:}48.260 {\:{\circ}{\circ}{\circ}}>00{:}33{:}50.320$ Cancers here at the hospital

NOTE Confidence: 0.7706427

 $00:33:50.320 \longrightarrow 00:33:52.559$ and just quickly his background.

NOTE Confidence: 0.7706427

 $00:33:52.560 \longrightarrow 00:33:54.894$ He's also has a Stanford background

NOTE Confidence: 0.7706427

 $00{:}33{:}54.894 \dashrightarrow 00{:}33{:}56.450$ medical degree from Stanford

NOTE Confidence: 0.7706427

 $00:33:56.511 \longrightarrow 00:33:58.421$ and then internship residency at

NOTE Confidence: 0.7706427

 $00:33:58.421 \longrightarrow 00:34:00.331$ some small Hospital in Boston,

NOTE Confidence: 0.7706427

 $00{:}34{:}00.340 \dashrightarrow 00{:}34{:}01.892$ Brigham and Women's Hospital,

NOTE Confidence: 0.7706427

 $00:34:01.892 \longrightarrow 00:34:03.444$ Dana Farber Cancer Institute.

NOTE Confidence: 0.7706427

 $00{:}34{:}03.450 \dashrightarrow 00{:}34{:}05.616$ And then he completed his postdoctoral

NOTE Confidence: 0.7706427

00:34:05.616 --> 00:34:07.960 research at the Koch Institute of

NOTE Confidence: 0.7706427

00:34:07.960 --> 00:34:10.055 Integrative Cancer Research at MIT,

NOTE Confidence: 0.7706427

 $00{:}34{:}10.060 \dashrightarrow 00{:}34{:}13.552$ so a lot more I can say about manager,

NOTE Confidence: 0.7706427

 $00:34:13.560 \longrightarrow 00:34:14.520$ but I will.

NOTE Confidence: 0.7706427

00:34:14.520 --> 00:34:17.256 Let you hear about his work, and I'm Amanda.

 $00:34:17.256 \longrightarrow 00:34:18.344$ The floor is yours.

NOTE Confidence: 0.83620965

00:34:19.280 --> 00:34:21.090 Great thank you Roy for

NOTE Confidence: 0.83620965

 $00:34:21.090 \longrightarrow 00:34:22.176$ the kind introduction.

NOTE Confidence: 0.83620965

00:34:22.180 --> 00:34:24.324 I just want to build on what Doctor

NOTE Confidence: 0.83620965

 $00:34:24.324 \longrightarrow 00:34:26.671$ Kunz is described and talk a little

NOTE Confidence: 0.83620965

 $00:34:26.671 \longrightarrow 00:34:29.033$ bit more about up challenges and

NOTE Confidence: 0.83620965

 $00:34:29.033 \longrightarrow 00:34:31.229$ opportunities in translational research,

NOTE Confidence: 0.83620965

00:34:31.230 --> 00:34:33.396 specifically in GI cancers at Yale.

NOTE Confidence: 0.83620965

 $00{:}34{:}33.400 \dashrightarrow 00{:}34{:}35.530$ So I'll briefly discuss some more

NOTE Confidence: 0.83620965

 $00:34:35.530 \longrightarrow 00:34:37.344$ detailed metrics on the current

NOTE Confidence: 0.83620965

 $00{:}34{:}37.344 \dashrightarrow 00{:}34{:}39.612$ state of GI Cancer Research at Yale

NOTE Confidence: 0.83620965

00:34:39.612 --> 00:34:42.293 and then talk about some of our

NOTE Confidence: 0.83620965

 $00:34:42.293 \longrightarrow 00:34:43.865$ goals in building translational

NOTE Confidence: 0.83620965

 $00:34:43.865 \longrightarrow 00:34:45.343$ Sciences within the center.

NOTE Confidence: 0.83620965

 $00:34:45.343 \longrightarrow 00:34:46.426$ Describing four specific

NOTE Confidence: 0.83620965

 $00:34:46.426 \longrightarrow 00:34:47.148$ overarching initiatives.

 $00:34:47.150 \longrightarrow 00:34:48.960$ Distance shown here and then,

NOTE Confidence: 0.83620965

 $00:34:48.960 \longrightarrow 00:34:49.611$ talk a few.

NOTE Confidence: 0.83620965

00:34:49.611 --> 00:34:51.564 A bit about some of the more specific

NOTE Confidence: 0.83620965

 $00:34:51.564 \longrightarrow 00:34:53.439$ initiatives that we have planned

NOTE Confidence: 0.83620965

 $00:34:53.439 \longrightarrow 00:34:55.325$ using pancreatic cancer and the

NOTE Confidence: 0.83620965

00:34:55.325 --> 00:34:56.649 Yale Pancreatic Cancer Collaborative

NOTE Confidence: 0.83620965

 $00:34:56.649 \longrightarrow 00:34:59.160$ is an example of the types of

NOTE Confidence: 0.83620965

 $00:34:59.160 \longrightarrow 00:35:01.285$ things that we're hoping for.

NOTE Confidence: 0.83620965

 $00:35:01.290 \longrightarrow 00:35:03.914$ So I'd like to start by saying that

NOTE Confidence: 0.83620965

 $00:35:03.914 \longrightarrow 00:35:06.400$ GI Cancer Research at Yale within

NOTE Confidence: 0.83620965

 $00:35:06.400 \longrightarrow 00:35:08.590$ the Cancer Center is prolific,

NOTE Confidence: 0.83620965

 $00:35:08.590 \longrightarrow 00:35:10.202$ high impact and inclusive.

NOTE Confidence: 0.83620965

 $00:35:10.202 \longrightarrow 00:35:13.145$ Shown here are data from the Cancer

NOTE Confidence: 0.83620965

 $00{:}35{:}13.145 \dashrightarrow 00{:}35{:}15.380$ Center GI cancer related publications

NOTE Confidence: 0.83620965

 $00:35:15.380 \longrightarrow 00:35:18.419$ over an 18 month types time span.

00:35:18.420 --> 00:35:20.748 From July 2019 to December 2020,

NOTE Confidence: 0.83620965

 $00{:}35{:}20.750 \dashrightarrow 00{:}35{:}22.700$ and as you can see,

NOTE Confidence: 0.83620965

 $00:35:22.700 \longrightarrow 00:35:25.040$ there were more than 130 publications

NOTE Confidence: 0.83620965

 $00:35:25.040 \longrightarrow 00:35:27.043$ for GI cancer related research

NOTE Confidence: 0.83620965

 $00:35:27.043 \longrightarrow 00:35:29.305$ within this 18 month time span,

NOTE Confidence: 0.83620965

00:35:29.310 --> 00:35:31.260 amounting to about 7.5 publications

NOTE Confidence: 0.83620965

 $00:35:31.260 \longrightarrow 00:35:32.040$ per month,

NOTE Confidence: 0.83620965

 $00:35:32.040 \longrightarrow 00:35:33.970$ which I personally thought was

NOTE Confidence: 0.83620965

 $00{:}35{:}33.970 \dashrightarrow 00{:}35{:}35.900$ quite impressive given that many

NOTE Confidence: 0.83620965

 $00:35:35.967 \longrightarrow 00:35:37.897$ of our investigators were dealing

NOTE Confidence: 0.83620965

 $00{:}35{:}37.897 \dashrightarrow 00{:}35{:}40.200$ with the pandemic during this time.

NOTE Confidence: 0.83620965

 $00:35:40.200 \longrightarrow 00:35:40.590$ Importantly,

NOTE Confidence: 0.83620965

 $00:35:40.590 \longrightarrow 00:35:42.930$ more than 1/4 of these publications,

NOTE Confidence: 0.83620965

 $00{:}35{:}42.930 \dashrightarrow 00{:}35{:}45.258$ four published in high impact journals,

NOTE Confidence: 0.83620965

 $00:35:45.260 \longrightarrow 00:35:47.270$ and they represented the full

NOTE Confidence: 0.83620965

 $00{:}35{:}47.270 \dashrightarrow 00{:}35{:}48.878$ spectrum of diseases within.

00:35:48.880 --> 00:35:51.880 The GI space, including pancreatic cancers,

NOTE Confidence: 0.83620965

 $00:35:51.880 \longrightarrow 00:35:53.880$ colorectal and **** cancers,

NOTE Confidence: 0.83620965

 $00:35:53.880 \longrightarrow 00:35:55.380$ gastroesophageal liver cancers.

NOTE Confidence: 0.83620965

 $00:35:55.380 \longrightarrow 00:35:55.883$ Furthermore,

NOTE Confidence: 0.83620965

00:35:55.883 --> 00:35:57.895 these publications included 47

NOTE Confidence: 0.83620965

 $00:35:57.895 \longrightarrow 00:35:59.404$ individual investigators within

NOTE Confidence: 0.83620965

 $00:35:59.404 \longrightarrow 00:36:00.880$ the Cancer Center.

NOTE Confidence: 0.83620965

 $00:36:00.880 \longrightarrow 00:36:01.380$ Again,

NOTE Confidence: 0.83620965

00:36:01.380 --> 00:36:03.880 quite a diverse crew including

NOTE Confidence: 0.83620965

 $00:36:03.880 \longrightarrow 00:36:04.880$ basic scientists,

NOTE Confidence: 0.83620965

 $00{:}36{:}04.880 \dashrightarrow 00{:}36{:}06.880$ clinical and translational scientists,

NOTE Confidence: 0.83620965

 $00:36:06.880 \longrightarrow 00:36:07.880$ and epidemiologists.

NOTE Confidence: 0.83620965

 $00{:}36{:}07.880 \dashrightarrow 00{:}36{:}11.289$ Now the story is very similar for

NOTE Confidence: 0.83620965

 $00{:}36{:}11.289 \dashrightarrow 00{:}36{:}14.351$ active research funding where the GI

NOTE Confidence: 0.83620965

00:36:14.351 --> 00:36:16.871 cancer portfolio includes nearly \$5

 $00:36:16.871 \longrightarrow 00:36:20.789$ million in direct costs of research funding.

NOTE Confidence: 0.83620965

 $00:36:20.790 \longrightarrow 00:36:23.695$ This is about 2/3 in peer reviewed.

NOTE Confidence: 0.83620965

 $00:36:23.700 \longrightarrow 00:36:27.276$ Either NIH or competitive foundation grants.

NOTE Confidence: 0.83620965

 $00:36:27.280 \longrightarrow 00:36:29.548$ And the remaining from industry or

NOTE Confidence: 0.83620965

 $00:36:29.548 \longrightarrow 00:36:31.540$ non peer reviewed foundation grants.

NOTE Confidence: 0.83620965

00:36:31.540 --> 00:36:34.284 You can see there is a heavy influx

NOTE Confidence: 0.83620965

 $00:36:34.284 \longrightarrow 00:36:37.319$ of money focused on pancreatic cancer,

NOTE Confidence: 0.83620965

 $00:36:37.320 \longrightarrow 00:36:40.015$ but there is a good spread across

NOTE Confidence: 0.83620965

 $00{:}36{:}40.015 \dashrightarrow 00{:}36{:}41.870$ the different disease programs.

NOTE Confidence: 0.83620965

00:36:41.870 --> 00:36:42.310 Additionally,

NOTE Confidence: 0.83620965

 $00:36:42.310 \longrightarrow 00:36:44.950$ this funding has been accumulated by

NOTE Confidence: 0.83620965

00:36:44.950 --> 00:36:46.671 24 independent investigators with

NOTE Confidence: 0.83620965

 $00:36:46.671 \longrightarrow 00:36:49.086$ a very similar spread in the basic

NOTE Confidence: 0.83620965

00:36:49.086 --> 00:36:50.950 clinical translational epidemiologic space.

NOTE Confidence: 0.83620965

00:36:50.950 --> 00:36:53.428 Importantly, most of these funding sources,

NOTE Confidence: 0.83620965

 $00:36:53.430 \longrightarrow 00:36:55.490$ in fact, the vast majority,

00:36:55.490 --> 00:36:57.142 are really independent grants,

NOTE Confidence: 0.83620965

 $00{:}36{:}57.142 --{>} 00{:}36{:}57.968 \ {\rm single \ investigators},$

NOTE Confidence: 0.83620965

 $00:36:57.970 \longrightarrow 00:37:01.098$ and so the hope is to really love

NOTE Confidence: 0.83620965

 $00:37:01.098 \longrightarrow 00:37:03.049$ leverage this great breath.

NOTE Confidence: 0.83620965

00:37:03.050 --> 00:37:03.950 Of scientific expertise,

NOTE Confidence: 0.83620965

 $00:37:03.950 \longrightarrow 00:37:04.550$ clinical care,

NOTE Confidence: 0.83620965

 $00:37:04.550 \longrightarrow 00:37:05.730$ and clinical research expertise

NOTE Confidence: 0.83620965

 $00{:}37{:}05.730 \dashrightarrow 00{:}37{:}07.500$ and try and build and synergize

NOTE Confidence: 0.83620965

 $00:37:07.556 \longrightarrow 00:37:08.728$ their efforts into teams,

NOTE Confidence: 0.83620965

 $00{:}37{:}08.730 \dashrightarrow 00{:}37{:}11.194$ and that's sort of the major goal

NOTE Confidence: 0.83620965

 $00:37:11.194 \longrightarrow 00:37:13.721$ of where we're going to go with

NOTE Confidence: 0.83620965

 $00:37:13.721 \longrightarrow 00:37:15.113$ the GI Cancer Center.

NOTE Confidence: 0.83620965

 $00:37:15.120 \longrightarrow 00:37:15.702$ So again,

NOTE Confidence: 0.83620965

 $00:37:15.702 \longrightarrow 00:37:18.030$ one of our major goals is to build

NOTE Confidence: 0.83620965

 $00:37:18.097 \longrightarrow 00:37:20.045$ across display research teams

 $00:37:20.045 \longrightarrow 00:37:21.993$ that bring together clinical,

NOTE Confidence: 0.83620965

 $00{:}37{:}22.000 --> 00{:}37{:}22.520 \ {\rm translational},$

NOTE Confidence: 0.83620965

 $00:37:22.520 \longrightarrow 00:37:25.120$ basic and population health scientists.

NOTE Confidence: 0.83620965

 $00:37:25.120 \longrightarrow 00:37:27.290$ With the plan to allow these teams

NOTE Confidence: 0.83620965

 $00:37:27.290 \longrightarrow 00:37:29.428$ to enable team based research grants

NOTE Confidence: 0.83620965

00:37:29.428 --> 00:37:31.675 including multi P IR ones, PO1.

NOTE Confidence: 0.83620965

 $00{:}37{:}31.675 \dashrightarrow 00{:}37{:}34.090$ Since for grants to try and grow

NOTE Confidence: 0.83620965

 $00:37:34.090 \longrightarrow 00:37:35.177$ investigator initiated trials

NOTE Confidence: 0.83620965

 $00{:}37{:}35.177 \dashrightarrow 00{:}37{:}37.199$ based on yell science Doctor Kunz,

NOTE Confidence: 0.83620965

 $00:37:37.200 \longrightarrow 00:37:39.960$ allude to the fact that less than 20%

NOTE Confidence: 0.8320928

00:37:39.960 --> 00:37:42.010 of our current grants are

NOTE Confidence: 0.8320928

 $00{:}37{:}42.010 \dashrightarrow 00{:}37{:}43.650$ investigator initiated would like

NOTE Confidence: 0.8320928

 $00:37:43.650 \longrightarrow 00:37:45.939$ to bump that up to at least a

NOTE Confidence: 0.8320928

 $00:37:45.939 \dashrightarrow 00:37:48.239$ third if not a half really showing.

NOTE Confidence: 0.8320928

 $00:37:48.240 \longrightarrow 00:37:50.436$ Sort of the importance of science

NOTE Confidence: 0.8320928

 $00:37:50.436 \longrightarrow 00:37:53.190$ within Yale and and what can result

 $00:37:53.190 \longrightarrow 00:37:55.220$ in terms of translational care.

NOTE Confidence: 0.8320928

 $00{:}37{:}55.220 --> 00{:}37{:}57.008$ And finally, we'd like to use

NOTE Confidence: 0.8320928

 $00{:}37{:}57.008 {\:{\mbox{--}}\!>\:} 00{:}37{:}58.742$ these teams to inspire trainees

NOTE Confidence: 0.8320928

 $00:37:58.742 \longrightarrow 00:38:00.666$ towards the Korean translational.

NOTE Confidence: 0.8320928

 $00:38:00.670 \longrightarrow 00:38:02.350$ She, like Cancer Research Doctor

NOTE Confidence: 0.8320928

 $00{:}38{:}02.350 \dashrightarrow 00{:}38{:}04.030$ Kunz highlighted several of our

NOTE Confidence: 0.8320928

00:38:04.090 --> 00:38:06.010 trainings doing trainees doing really

NOTE Confidence: 0.8320928

 $00{:}38{:}06.010 \dashrightarrow 00{:}38{:}07.930$ exciting science within this space.

NOTE Confidence: 0.8320928

 $00:38:07.930 \longrightarrow 00:38:10.331$ We like to to recruit even more

NOTE Confidence: 0.8320928

 $00:38:10.331 \longrightarrow 00:38:12.280$ to really further the mission.

NOTE Confidence: 0.8320928

 $00:38:12.280 \longrightarrow 00:38:13.267$ And Jack answers.

NOTE Confidence: 0.8320928

00:38:13.267 --> 00:38:13.596 Ultimately,

NOTE Confidence: 0.8320928

 $00{:}38{:}13.596 \dashrightarrow 00{:}38{:}15.993$ the goal is to make Yale's destination

NOTE Confidence: 0.8320928

00:38:15.993 --> 00:38:18.177 Center for GI cancers such that

NOTE Confidence: 0.8320928

00:38:18.177 --> 00:38:20.270 Yale is synonymous for outstanding,

 $00:38:20.270 \longrightarrow 00:38:21.718$ not only clinical care,

NOTE Confidence: 0.8320928

00:38:21.718 --> 00:38:23.166 but also homegrown science.

NOTE Confidence: 0.8320928

 $00{:}38{:}23.170 \dashrightarrow 00{:}38{:}25.860$ That translates to the clinic.

NOTE Confidence: 0.8320928

 $00:38:25.860 \longrightarrow 00:38:27.846$ Now there are number of challenges

NOTE Confidence: 0.8320928

 $00:38:27.846 \longrightarrow 00:38:30.527$ that get in the way of boosting

NOTE Confidence: 0.8320928

 $00:38:30.527 \longrightarrow 00:38:32.677$ translational science in GI cancers.

NOTE Confidence: 0.8320928

 $00:38:32.680 \longrightarrow 00:38:33.042$ Indeed,

NOTE Confidence: 0.8320928

 $00:38:33.042 \longrightarrow 00:38:35.214$ these are challenges that Roy could

NOTE Confidence: 0.8320928

 $00{:}38{:}35.214 \dashrightarrow 00{:}38{:}38.366$ speak to for thoracic or even other cancers,

NOTE Confidence: 0.8320928

 $00:38:38.370 \longrightarrow 00:38:40.260$ and also challenges that exist

NOTE Confidence: 0.8320928

 $00{:}38{:}40.260 \dashrightarrow 00{:}38{:}41.772$ across the academic spectrum,

NOTE Confidence: 0.8320928

 $00:38:41.780 \longrightarrow 00:38:43.789$ and these include a lack of time

NOTE Confidence: 0.8320928

 $00:38:43.789 \longrightarrow 00:38:46.330$ or lack of institutional resources,

NOTE Confidence: 0.8320928

 $00{:}38{:}46.330 \dashrightarrow 00{:}38{:}48.598$ a lack of knowledge or expertise,

NOTE Confidence: 0.8320928

 $00:38:48.600 \longrightarrow 00:38:50.490$ or even awareness of potential

NOTE Confidence: 0.8320928

 $00{:}38{:}50.490 \dashrightarrow 00{:}38{:}52.002$ collaborators within the institution.

 $00:38:52.010 \longrightarrow 00:38:55.384$ And as team based science is increasing.

NOTE Confidence: 0.8320928

 $00{:}38{:}55.390 \dashrightarrow 00{:}38{:}57.722$ Ensuring adequate recognition or

NOTE Confidence: 0.8320928

 $00:38:57.722 \longrightarrow 00:39:00.054$ opportunities for career advancement.

NOTE Confidence: 0.8320928

 $00:39:00.060 \longrightarrow 00:39:02.226$ So in terms of overarching initiatives

NOTE Confidence: 0.8320928

 $00:39:02.226 \longrightarrow 00:39:04.340$ to combat these particular challenges,

NOTE Confidence: 0.8320928

 $00:39:04.340 \longrightarrow 00:39:06.280$ we've come up with four.

NOTE Confidence: 0.8320928

 $00:39:06.280 \longrightarrow 00:39:08.230$ One is to really emphasize

NOTE Confidence: 0.8320928

00:39:08.230 --> 00:39:09.010 community building,

NOTE Confidence: 0.8320928

00:39:09.010 --> 00:39:11.338 which is hopefully to bring awareness

NOTE Confidence: 0.8320928

 $00:39:11.338 \longrightarrow 00:39:12.502$ of potential collaborators,

NOTE Confidence: 0.8320928

 $00{:}39{:}12.510 \dashrightarrow 00{:}39{:}14.062$ enhance the community knowledge

NOTE Confidence: 0.8320928

 $00:39:14.062 \longrightarrow 00:39:14.838$ and expertise,

NOTE Confidence: 0.8320928

 $00{:}39{:}14.840 \dashrightarrow 00{:}39{:}17.168$ and that can be leveraged towards

NOTE Confidence: 0.8320928

00:39:17.168 --> 00:39:18.332 team based grants.

NOTE Confidence: 0.8320928

00:39:18.340 --> 00:39:18.763 Additionally,

 $00:39:18.763 \longrightarrow 00:39:20.878$ try to enhance research education

NOTE Confidence: 0.8320928

 $00{:}39{:}20.878 \dashrightarrow 00{:}39{:}23.454$ across spectrum to try and get

NOTE Confidence: 0.8320928

 $00{:}39{:}23.454 \dashrightarrow 00{:}39{:}25.098$ basic scientists to communicate

NOTE Confidence: 0.8320928

 $00:39:25.098 \longrightarrow 00:39:27.165$ with clinical scientists and vice

NOTE Confidence: 0.8320928

 $00:39:27.165 \longrightarrow 00:39:28.975$ versa to enhance knowledge and

NOTE Confidence: 0.8320928

 $00:39:28.975 \longrightarrow 00:39:30.423$ to bring together teams.

NOTE Confidence: 0.8320928

 $00:39:30.430 \longrightarrow 00:39:33.139$ The third pillar is to develop resources

NOTE Confidence: 0.8320928

 $00:39:33.139 \longrightarrow 00:39:35.421$ that's both financial in terms of

NOTE Confidence: 0.8320928

00:39:35.421 --> 00:39:37.176 grants and funding pilot funding,

NOTE Confidence: 0.8320928

 $00:39:37.180 \longrightarrow 00:39:39.250$ but also institutional resources for

NOTE Confidence: 0.8320928

 $00{:}39{:}39.250 \dashrightarrow 00{:}39{:}41.661$ tissue resources such as bio banks

NOTE Confidence: 0.8320928

 $00:39:41.661 \longrightarrow 00:39:43.805$ that are hard to come by and hard

NOTE Confidence: 0.8320928

 $00:39:43.805 \longrightarrow 00:39:46.177$ to leverage within individual labs.

NOTE Confidence: 0.8320928

 $00:39:46.180 \longrightarrow 00:39:46.864$ And finally,

NOTE Confidence: 0.8320928

 $00:39:46.864 \longrightarrow 00:39:49.258$ we like to take advantage of these

NOTE Confidence: 0.8320928

 $00{:}39{:}49.258 \dashrightarrow 00{:}39{:}50.910$ great developments and disseminate

00:39:50.910 --> 00:39:53.801 it to the Community using web based

NOTE Confidence: 0.8320928

 $00{:}39{:}53.874 \dashrightarrow 00{:}39{:}56.004$ or social media platforms as an

NOTE Confidence: 0.8320928

00:39:56.004 --> 00:39:58.122 opportunity not only to tell everyone

NOTE Confidence: 0.8320928

 $00:39:58.122 \longrightarrow 00:40:00.890$ what a great place Yale is for GI

NOTE Confidence: 0.8320928

 $00{:}40{:}00.971 \dashrightarrow 00{:}40{:}03.476$ Cancer Research and clinical care.

NOTE Confidence: 0.8320928

 $00:40:03.480 \longrightarrow 00:40:06.084$ But also potentially to recruit outside

NOTE Confidence: 0.8320928

 $00:40:06.084 \longrightarrow 00:40:09.000$ funding to support some of these others.

NOTE Confidence: 0.8320928

 $00{:}40{:}09.000 \dashrightarrow 00{:}40{:}11.824$ So to start to chip away and sort

NOTE Confidence: 0.8320928

00:40:11.824 --> 00:40:14.467 of build some of these pillars,

NOTE Confidence: 0.8320928

 $00:40:14.470 \longrightarrow 00:40:17.319$ a group of us started the yellow

NOTE Confidence: 0.8320928

 $00:40:17.319 \longrightarrow 00:40:18.540$ Pancreatic cancer collaborative

NOTE Confidence: 0.8320928

 $00:40:18.606 \longrightarrow 00:40:19.560$ or yellow pack.

NOTE Confidence: 0.8320928

 $00{:}40{:}19.560 \dashrightarrow 00{:}40{:}21.798$ Shown here is the steering committee

NOTE Confidence: 0.8320928

 $00{:}40{:}21.798 \dashrightarrow 00{:}40{:}23.798$ that includes Mary leaders in

NOTE Confidence: 0.8320928

 $00{:}40{:}23.798 \rightarrow 00{:}40{:}25.554$ pancreatic Cancer Research and

 $00:40:25.554 \longrightarrow 00:40:27.310$ clinical care across different

NOTE Confidence: 0.8320928

 $00:40:27.310 \longrightarrow 00:40:28.760$ divisions and departments.

NOTE Confidence: 0.8320928

00:40:28.760 --> 00:40:29.945 Including medical oncology,

NOTE Confidence: 0.8320928

00:40:29.945 --> 00:40:31.525 radiation oncology surgical oncology,

NOTE Confidence: 0.8320928

 $00:40:31.530 \longrightarrow 00:40:31.926$ gastroenterology,

NOTE Confidence: 0.8320928

 $00:40:31.926 \longrightarrow 00:40:33.906$ pathology and the basic Sciences.

NOTE Confidence: 0.8320928

 $00{:}40{:}33.910 --> 00{:}40{:}35.890$ We formed the Yale Pack,

NOTE Confidence: 0.8320928

00:40:35.890 --> 00:40:38.655 which is an inclusive team of physicians,

NOTE Confidence: 0.8320928

 $00{:}40{:}38.660 {\:\dashrightarrow\:} 00{:}40{:}40.600$ scientists and trainings that seeks

NOTE Confidence: 0.8320928

 $00:40:40.600 \longrightarrow 00:40:43.048$ to synergise the strengths of the

NOTE Confidence: 0.8320928

 $00{:}40{:}43.048 \dashrightarrow 00{:}40{:}45.258$ L science and clinical expertise

NOTE Confidence: 0.8320928

00:40:45.258 --> 00:40:46.584 to accelerate transformative

NOTE Confidence: 0.8320928

 $00{:}40{:}46.584 \dashrightarrow 00{:}40{:}48.105$ research and pancreatic cancer

NOTE Confidence: 0.8320928

 $00:40:48.105 \longrightarrow 00:40:50.133$ to sort of nucleates the LPK,

NOTE Confidence: 0.8320928

 $00:40:50.140 \longrightarrow 00:40:53.446$ we held a summit for Community

NOTE Confidence: 0.8320928

00:40:53.446 --> 00:40:55.099 building last August.

 $00:40:55.100 \longrightarrow 00:40:57.160$ This was a entirely virtual

NOTE Confidence: 0.8320928

 $00{:}40{:}57.160 \dashrightarrow 00{:}40{:}59.220$ summit that included more than

NOTE Confidence: 0.8392697

00:40:59.292 --> 00:41:00.856 130 participants. Importantly,

NOTE Confidence: 0.8392697

 $00:41:00.856 \longrightarrow 00:41:03.704$ more than a third of whom were trainees

NOTE Confidence: 0.8392697

 $00:41:03.704 \longrightarrow 00:41:06.361$ in participation included 16 different

NOTE Confidence: 0.8392697

 $00:41:06.361 \longrightarrow 00:41:08.593$ departments and three institutes.

NOTE Confidence: 0.8392697

 $00:41:08.600 \longrightarrow 00:41:11.603$ We had 16 different speakers who either

NOTE Confidence: 0.8392697

00:41:11.603 --> 00:41:13.405 were actively pursuing pancreatic

NOTE Confidence: 0.8392697

 $00:41:13.405 \longrightarrow 00:41:15.620$ Cancer Research initiatives or those

NOTE Confidence: 0.8392697

00:41:15.620 --> 00:41:18.851 shown in red had not prior previously

NOTE Confidence: 0.8392697

00:41:18.851 --> 00:41:21.166 been involved in pancreatic Cancer

NOTE Confidence: 0.8392697

00:41:21.166 --> 00:41:23.510 Research to highlight existing research,

NOTE Confidence: 0.8392697

 $00:41:23.510 \longrightarrow 00:41:25.860$ as well as to engage.

NOTE Confidence: 0.8392697

 $00:41:25.860 \longrightarrow 00:41:27.316$ Scientists with innovative technologies

NOTE Confidence: 0.8392697

 $00:41:27.316 \longrightarrow 00:41:29.923$ that could be applied to this research

00:41:29.923 --> 00:41:31.728 space and through these efforts,

NOTE Confidence: 0.8392697

 $00:41:31.730 \longrightarrow 00:41:33.565$ we've been able to actually

NOTE Confidence: 0.8392697

00:41:33.565 --> 00:41:34.666 generate some teams.

NOTE Confidence: 0.8392697

 $00:41:34.670 \longrightarrow 00:41:37.750$ I'll describe a few here of examples of

NOTE Confidence: 0.8392697

00:41:37.750 --> 00:41:39.439 multidisciplinary teams in GI cancers,

NOTE Confidence: 0.8392697

 $00:41:39.440 \longrightarrow 00:41:41.960$ one of which is involves our own lab

NOTE Confidence: 0.8392697

00:41:41.960 --> 00:41:44.154 in collaboration with the key being

NOTE Confidence: 0.8392697

00:41:44.154 --> 00:41:46.029 endocrinology and submit the Krishnaswamy

NOTE Confidence: 0.8392697

 $00{:}41{:}46.029 \dashrightarrow 00{:}41{:}48.248$ in genetics and computer science,

NOTE Confidence: 0.8392697

 $00:41:48.250 \longrightarrow 00:41:50.525$ in which we have been studying and

NOTE Confidence: 0.8392697

 $00{:}41{:}50.525 \dashrightarrow 00{:}41{:}52.393$ identifying a novel intra pancreatic

NOTE Confidence: 0.8392697

00:41:52.393 --> 00:41:53.638 endocrine exocrine hormonal

NOTE Confidence: 0.8392697

 $00:41:53.638 \longrightarrow 00:41:56.200$ signaling axis that is a driver.

NOTE Confidence: 0.8392697

 $00:41:56.200 \longrightarrow 00:41:58.860$ Pancreatic ductal and questionable

NOTE Confidence: 0.8392697

 $00:41:58.860 \longrightarrow 00:42:00.855$ progression in obesity.

NOTE Confidence: 0.8392697

 $00:42:00.860 \longrightarrow 00:42:03.266$ Luisa Escobar hires in radiation therapy,

 $00:42:03.270 \longrightarrow 00:42:05.634$ has partnered with Jeff Townsend by

NOTE Confidence: 0.8392697

00:42:05.634 --> 00:42:07.686 Statistics John Chrisman and Surgery

NOTE Confidence: 0.8392697

 $00:42:07.686 \longrightarrow 00:42:10.128$ and Nick Joe Sheehan immunology to

NOTE Confidence: 0.8392697

00:42:10.128 --> 00:42:12.090 understand RNA splicing and tumors,

NOTE Confidence: 0.8392697

 $00:42:12.090 \longrightarrow 00:42:14.868$ adaptation and a tumor immunity building

NOTE Confidence: 0.8392697

00:42:14.868 --> 00:42:17.566 off really seminal science from the

NOTE Confidence: 0.8392697

 $00:42:17.566 \longrightarrow 00:42:19.888$ Escobar Hoyos slab that identified a

NOTE Confidence: 0.8392697

00:42:19.888 --> 00:42:23.301 novel role for Mutant P 53 and splicing

NOTE Confidence: 0.8392697

 $00{:}42{:}23.301 \dashrightarrow 00{:}42{:}25.013$ regulation and pancreatic cancer.

NOTE Confidence: 0.8392697

 $00{:}42{:}25.020 \dashrightarrow 00{:}42{:}27.512$ Both of these teams based grants have

NOTE Confidence: 0.8392697

 $00:42:27.512 \longrightarrow 00:42:29.862$ been recently funded by the Damon

NOTE Confidence: 0.8392697

00:42:29.862 --> 00:42:31.478 Runyon Rachleff Innovation Award,

NOTE Confidence: 0.8392697

 $00{:}42{:}31.480 \dashrightarrow 00{:}42{:}34.045$ highlighting that these team based

NOTE Confidence: 0.8392697

 $00:42:34.045 \longrightarrow 00:42:37.129$ approaches are really well received by

NOTE Confidence: 0.8392697

 $00:42:37.129 \longrightarrow 00:42:39.769$ funding organizations in the NCI alike.

 $00:42:39.770 \longrightarrow 00:42:42.276$ The Teen Challenge awards that have been

NOTE Confidence: 0.8392697

 $00:42:42.276 \longrightarrow 00:42:44.993$ pioneered by the Cancer Center have also

NOTE Confidence: 0.8392697

 $00{:}42{:}44.993 \dashrightarrow 00{:}42{:}47.363$ funded several GI cancer related teams.

NOTE Confidence: 0.8392697

 $00:42:47.370 \longrightarrow 00:42:49.650$ I'll highlight two of them here.

NOTE Confidence: 0.8392697

 $00:42:49.650 \longrightarrow 00:42:50.174$ This one,

NOTE Confidence: 0.8392697

 $00:42:50.174 \longrightarrow 00:42:52.270$ led by set hers on in chemistry that

NOTE Confidence: 0.8392697

 $00:42:52.329 \longrightarrow 00:42:54.789$ tries to examine the molecular cancer

NOTE Confidence: 0.8392697

00:42:54.789 --> 00:42:57.060 microbiology and the underpinnings of

NOTE Confidence: 0.8392697

 $00{:}42{:}57.060 \to 00{:}42{:}58.770$ microbiome associated carcinogenesis.

NOTE Confidence: 0.8392697

00:42:58.770 --> 00:43:00.948 Building on work from South Arizona

NOTE Confidence: 0.8392697

 $00{:}43{:}00.948 \mathrel{--}{>} 00{:}43{:}02.400$ and collaborator Jason Crawford

NOTE Confidence: 0.8392697

 $00:43:02.461 \longrightarrow 00:43:04.089$ on synthesizing the Genotoxin.

NOTE Confidence: 0.8392697

00:43:04.090 --> 00:43:04.812 Cali Bactine,

NOTE Confidence: 0.8392697

 $00:43:04.812 \longrightarrow 00:43:07.339$ which is thought to be an inducer

NOTE Confidence: 0.8392697

 $00:43:07.339 \longrightarrow 00:43:09.080$ of colorectal cancer.

NOTE Confidence: 0.8392697

 $00:43:09.080 \longrightarrow 00:43:11.786$ And leveraging this kind of seminal

00:43:11.786 --> 00:43:14.879 pre pre clinical work to understand

NOTE Confidence: 0.8392697

 $00{:}43{:}14.879 \dashrightarrow 00{:}43{:}17.889$ pathogenesis by which microbiomes promote

NOTE Confidence: 0.8392697

 $00:43:17.889 \longrightarrow 00:43:21.200$ cancer in particular colorectal cancer.

NOTE Confidence: 0.8392697

00:43:21.200 --> 00:43:23.398 And another grant funded by the Teen

NOTE Confidence: 0.8392697

 $00{:}43{:}23.398 \dashrightarrow 00{:}43{:}25.552$ Challenge Award is includes Auto Group

NOTE Confidence: 0.8392697

00:43:25.552 --> 00:43:27.477 in collaboration with John Wessel,

NOTE Confidence: 0.8392697

00:43:27.480 --> 00:43:27.816 Mirsky,

NOTE Confidence: 0.8392697

00:43:27.816 --> 00:43:28.488 Anne Rd,

NOTE Confidence: 0.8392697

00:43:28.488 --> 00:43:29.832 Hoffer and Comparative Medicine

NOTE Confidence: 0.8392697

 $00{:}43{:}29.832 \dashrightarrow 00{:}43{:}32.132$ which seeks to define the effects of

NOTE Confidence: 0.8392697

 $00{:}43{:}32.132 \dashrightarrow 00{:}43{:}33.986$ dietary fatty acids on breast cancer

NOTE Confidence: 0.8392697

 $00:43:34.045 \longrightarrow 00:43:35.857$ and pancreatic cancer progression,

NOTE Confidence: 0.8392697

 $00{:}43{:}35.860 {\:{\mbox{--}}}{\:{\mbox{-}}} 00{:}43{:}37.650$ leveraging innovative high fat diets

NOTE Confidence: 0.8392697

 $00:43:37.650 \longrightarrow 00:43:39.844$ than Metro diapers group has developed

NOTE Confidence: 0.8392697

 $00:43:39.844 \longrightarrow 00:43:41.926$ that represented the diversity of bias

00:43:41.926 --> 00:43:44.344 found in human cancers and trying to

NOTE Confidence: 0.8392697

 $00:43:44.344 \longrightarrow 00:43:46.324$ identify effects on host Physiology as

NOTE Confidence: 0.8392697

 $00:43:46.330 \longrightarrow 00:43:48.710$ well as on tumor progression and you

NOTE Confidence: 0.8392697

 $00{:}43{:}48.710 \dashrightarrow 00{:}43{:}51.300$ can see there's a diversity of effects.

NOTE Confidence: 0.8392697

 $00:43:51.300 \longrightarrow 00:43:53.400$ On pancreatic cancer progression

NOTE Confidence: 0.8392697

 $00:43:53.400 \longrightarrow 00:43:54.975$ using these diets.

NOTE Confidence: 0.8392697

 $00:43:54.980 \longrightarrow 00:43:56.426$ Beyond building teams,

NOTE Confidence: 0.8392697

00:43:56.426 --> 00:43:58.836 we've also been interested in

NOTE Confidence: 0.8392697

 $00{:}43{:}58.836 \dashrightarrow 00{:}44{:}01.545$ educating these teams on the latest

NOTE Confidence: 0.8392697

 $00:44:01.545 \longrightarrow 00:44:03.635$ and greatest advances and basic

NOTE Confidence: 0.8392697

 $00:44:03.635 \longrightarrow 00:44:06.083$ science and clinical and translational

NOTE Confidence: 0.8392697

 $00:44:06.083 \longrightarrow 00:44:09.017$ science by forming the Yale Pancreatic

NOTE Confidence: 0.8392697

 $00{:}44{:}09.020 \dashrightarrow 00{:}44{:}10.736$ Cancer Collaborative Seminars series.

NOTE Confidence: 0.8392697

 $00:44:10.736 \longrightarrow 00:44:12.881$ This included an outstanding cadre

NOTE Confidence: 0.8392697

 $00:44:12.881 \longrightarrow 00:44:14.170$ of investigators,

NOTE Confidence: 0.8392697

00:44:14.170 --> 00:44:15.970 principally outside of Yale,

 $00:44:15.970 \longrightarrow 00:44:18.670$ who encompass that Breath of basic

NOTE Confidence: 0.8392697

 $00:44:18.748 \longrightarrow 00:44:20.248$ two clinical science,

NOTE Confidence: 0.8392697

 $00:44:20.250 \longrightarrow 00:44:21.774$ as shown here,

NOTE Confidence: 0.8392697

00:44:21.774 --> 00:44:24.822 and was an opportunity for our

NOTE Confidence: 0.8392697

 $00:44:24.822 \longrightarrow 00:44:26.810$ community to learn about.

NOTE Confidence: 0.8392697

 $00:44:26.810 \longrightarrow 00:44:28.114$ The advances in pancreatic

NOTE Confidence: 0.8392697

00:44:28.114 --> 00:44:29.418 Cancer Research and care,

NOTE Confidence: 0.846231639999999

 $00:44:29.420 \longrightarrow 00:44:31.540$ and to try and build upon some of

NOTE Confidence: 0.846231639999999

 $00{:}44{:}31.540 \dashrightarrow 00{:}44{:}34.023$ what has already come before us and

NOTE Confidence: 0.846231639999999

 $00:44:34.023 \longrightarrow 00:44:36.303$ really understand the unmet needs in

NOTE Confidence: 0.846231639999999

00:44:36.303 --> 00:44:38.550 this space and how Yale could position

NOTE Confidence: 0.846231639999999

 $00:44:38.550 \longrightarrow 00:44:42.260$ itself to meet these particular needs.

NOTE Confidence: 0.846231639999999

 $00{:}44{:}42.260 \dashrightarrow 00{:}44{:}44.696$ Another core initiative for our group is

NOTE Confidence: 0.846231639999999

 $00:44:44.696 \longrightarrow 00:44:47.110$ to really build resource development.

NOTE Confidence: 0.846231639999999

00:44:47.110 --> 00:44:49.534 Doctor Kunz highlighted the GI cancer

00:44:49.534 --> 00:44:51.960 Biobank, which is actually quite prolific,

NOTE Confidence: 0.846231639999999

 $00{:}44{:}51.960 \dashrightarrow 00{:}44{:}54.976$ includes a large number of samples in the

NOTE Confidence: 0.846231639999999

00:44:54.976 --> 00:44:57.208 pancreatic cancer and codirector cancer,

NOTE Confidence: 0.846231639999999

 $00:44:57.210 \longrightarrow 00:44:58.926$ and specifically and beyond.

NOTE Confidence: 0.846231639999999

 $00:44:58.926 \longrightarrow 00:45:01.071$ Expanding this to other cancers

NOTE Confidence: 0.846231639999999

 $00:45:01.071 \longrightarrow 00:45:02.459$ in the GI space.

NOTE Confidence: 0.846231639999999

 $00:45:02.460 \longrightarrow 00:45:04.884$ We've also been working closely with

NOTE Confidence: 0.846231639999999

 $00:45:04.884 \longrightarrow 00:45:06.500$ their collaborators in surgery,

 $00{:}45{:}06.500 --> 00{:}45{:}07.286 \ \mathrm{Yelp, \ Pathology,}$

NOTE Confidence: 0.846231639999999

 $00:45:07.286 \longrightarrow 00:45:09.644$ and Lab Medicine to develop new

NOTE Confidence: 0.846231639999999

 $00:45:09.644 \longrightarrow 00:45:10.940$ living cancer models.

NOTE Confidence: 0.846231639999999

 $00:45:10.940 \longrightarrow 00:45:13.690$ Based on these perspective collection

NOTE Confidence: 0.846231639999999 00:45:13.690 --> 00:45:14.790 of samples. NOTE Confidence: 0.846231639999999

00:45:14.790 --> 00:45:16.720 These include patient drives into

NOTE Confidence: 0.846231639999999

00:45:16.720 --> 00:45:18.650 graphs and patient derived organoids

NOTE Confidence: 0.846231639999999

00:45:18.712 --> 00:45:20.896 with the hope of developing and

00:45:20.896 --> 00:45:21.988 molecularly characterizing some

NOTE Confidence: 0.846231639999999

 $00:45:21.988 \longrightarrow 00:45:23.957$ of these very precious tissues.

NOTE Confidence: 0.846231639999999

00:45:23.960 --> 00:45:24.724 Now importantly,

NOTE Confidence: 0.846231639999999

00:45:24.724 --> 00:45:27.398 many of these tissues are quite limited,

NOTE Confidence: 0.846231639999999

 $00:45:27.400 \longrightarrow 00:45:28.924$ particularly in diseases like

NOTE Confidence: 0.846231639999999

00:45:28.924 --> 00:45:29.686 pancreatic cancer,

NOTE Confidence: 0.846231639999999

 $00:45:29.690 \longrightarrow 00:45:32.357$ where the tumor fraction is quite low,

NOTE Confidence: 0.846231639999999

 $00{:}45{:}32.360 \dashrightarrow 00{:}45{:}35.357$ and so we need to be able to leverage

NOTE Confidence: 0.846231639999999

 $00{:}45{:}35.357 \dashrightarrow 00{:}45{:}37.800$ emerging technologies that are able to

NOTE Confidence: 0.846231639999999

 $00:45:37.800 \longrightarrow 00:45:40.400$ garner a large quantity of information

NOTE Confidence: 0.846231639999999

 $00:45:40.400 \longrightarrow 00:45:42.875$ from small and scare samples.

NOTE Confidence: 0.846231639999999

 $00:45:42.880 \longrightarrow 00:45:44.228$ Answer To that end,

NOTE Confidence: 0.846231639999999

 $00{:}45{:}44.228 \operatorname{--}{>} 00{:}45{:}46.250$ our collaborative has tried to bring

NOTE Confidence: 0.846231639999999

 $00{:}45{:}46.317 \dashrightarrow 00{:}45{:}48.029$ together innovative scientists such

NOTE Confidence: 0.846231639999999

 $00:45:48.029 \longrightarrow 00:45:50.169$ as Stephen weighing in genetics

00:45:50.169 --> 00:45:52.490 and wrong thing and biomedical

NOTE Confidence: 0.846231639999999

 $00:45:52.490 \longrightarrow 00:45:54.322$ engineering who developed interesting

NOTE Confidence: 0.846231639999999

 $00:45:54.322 \longrightarrow 00:45:56.476$ multi omics technologies that allow

NOTE Confidence: 0.846231639999999

 $00:45:56.476 \longrightarrow 00:45:58.536$ spatial analysis of gene expression,

NOTE Confidence: 0.846231639999999

00:45:58.540 --> 00:46:00.535 protein expression and even 3D

NOTE Confidence: 0.846231639999999

00:46:00.535 --> 00:46:02.530 genome organization in very scarce

NOTE Confidence: 0.846231639999999

 $00:46:02.599 \longrightarrow 00:46:03.889$ tissue based samples.

NOTE Confidence: 0.846231639999999

 $00:46:03.890 \longrightarrow 00:46:06.739$ And so we're excited of the possibility

00:46:06.739 --> 00:46:09.959 of taking advantage of the Bio Bank to

NOTE Confidence: 0.846231639999999

 $00:46:09.959 \longrightarrow 00:46:11.889$ do deep molecular characterization to

NOTE Confidence: 0.846231639999999

 $00:46:11.961 \longrightarrow 00:46:14.715$ build resources that could be leveraged.

NOTE Confidence: 0.846231639999999

 $00:46:14.720 \longrightarrow 00:46:17.620$ Or to address particular questions

NOTE Confidence: 0.846231639999999

 $00:46:17.620 \longrightarrow 00:46:19.580$ that our investigators might have.

00:46:19.580 --> 00:46:20.243 And finally,

NOTE Confidence: 0.846231639999999

 $00:46:20.243 \longrightarrow 00:46:22.970$ I think it's important for us to be able

NOTE Confidence: 0.846231639999999

 $00:46:23.038 \longrightarrow 00:46:25.635$ to expand and let the community know

 $00:46:25.635 \longrightarrow 00:46:27.809$ about our translational science efforts.

NOTE Confidence: 0.846231639999999

 $00:46:27.810 \longrightarrow 00:46:29.875$ Shown here are the breakthroughs

NOTE Confidence: 0.846231639999999

00:46:29.875 --> 00:46:31.940 magazine this year that highlighted

NOTE Confidence: 0.846231639999999

 $00:46:32.001 \longrightarrow 00:46:34.113$ the team building that we've done

NOTE Confidence: 0.846231639999999

 $00:46:34.113 \longrightarrow 00:46:35.950$ in the pancreatic cancer space.

NOTE Confidence: 0.846231639999999

 $00:46:35.950 \longrightarrow 00:46:38.085$ And shown here also is the ability

NOTE Confidence: 0.846231639999999

00:46:38.085 --> 00:46:40.244 to use Twitter to really expand our

NOTE Confidence: 0.846231639999999

 $00:46:40.244 \longrightarrow 00:46:42.456$ reach of our center and in hopes

NOTE Confidence: 0.846231639999999

00:46:42.456 --> 00:46:44.778 of not only educating the community

NOTE Confidence: 0.846231639999999

 $00:46:44.778 \longrightarrow 00:46:46.936$ but also potentially as a fund

NOTE Confidence: 0.846231639999999

 $00:46:46.936 \longrightarrow 00:46:48.596$ raising mechanism in the future.

NOTE Confidence: 0.846231639999999

 $00:46:48.600 \longrightarrow 00:46:50.763$ So what are some of the future

NOTE Confidence: 0.846231639999999

 $00{:}46{:}50.763 \mathrel{--}{>} 00{:}46{:}52.834$ specific plans we have in mind

NOTE Confidence: 0.846231639999999

 $00:46:52.834 \longrightarrow 00:46:54.270$ to meet these initiatives?

NOTE Confidence: 0.846231639999999

 $00:46:54.270 \longrightarrow 00:46:56.335$ One is we like to expand the

 $00:46:56.335 \longrightarrow 00:46:57.911$ activities we've done in pancreatic

NOTE Confidence: 0.846231639999999

 $00{:}46{:}57.911 \dashrightarrow 00{:}47{:}00.102$ cancer to the other centers to focus

NOTE Confidence: 0.846231639999999

 $00:47:00.102 \longrightarrow 00:47:01.989$ on community building through a

NOTE Confidence: 0.846231639999999

 $00:47:01.989 \longrightarrow 00:47:04.257$ similar types of summits or seminar

NOTE Confidence: 0.846231639999999

 $00:47:04.260 \longrightarrow 00:47:06.700$ series across our core programs.

NOTE Confidence: 0.846231639999999

 $00:47:06.700 \longrightarrow 00:47:09.017$ We'd also like to develop some cross

NOTE Confidence: 0.846231639999999

 $00:47:09.017 \longrightarrow 00:47:10.640$ program initiatives within the center.

NOTE Confidence: 0.846231639999999

 $00:47:10.640 \longrightarrow 00:47:10.973$ Importantly,

NOTE Confidence: 0.846231639999999

 $00:47:10.973 \longrightarrow 00:47:12.971$ we want to focus on physician

NOTE Confidence: 0.846231639999999

 $00:47:12.971 \longrightarrow 00:47:14.569$ scientist recruitment in GI cancers.

 $00:47:14.570 \longrightarrow 00:47:16.210$ I think they serve as.

NOTE Confidence: 0.7921766

00:47:22.330 --> 00:47:24.442 And in the center from Michael

NOTE Confidence: 0.7921766

 $00:47:24.442 \longrightarrow 00:47:26.203$ Instagram Cology, which is actively

NOTE Confidence: 0.7921766

 $00{:}47{:}26.203 \dashrightarrow 00{:}47{:}27.607$ pursuing junior physician scientists,

NOTE Confidence: 0.7921766

00:47:27.610 --> 00:47:31.680 recruits and we hope to be able to bring in

NOTE Confidence: 0.7921766

 $00:47:31.782 \longrightarrow 00:47:35.670$ more who have a real focus in GI cancers.

 $00:47:35.670 \longrightarrow 00:47:38.208$ We also want to try and bridge the gap

NOTE Confidence: 0.7921766

 $00:47:38.208 \longrightarrow 00:47:40.387$ between basic and clinical scientists,

NOTE Confidence: 0.7921766

 $00:47:40.390 \longrightarrow 00:47:42.886$ and to do that, we're going to try

NOTE Confidence: 0.7921766

 $00:47:42.886 \longrightarrow 00:47:45.107$ and launch the doctors in series.

NOTE Confidence: 0.7921766

 $00{:}47{:}45.110 \dashrightarrow 00{:}47{:}47.510$ This is a series to allow clinicians to

NOTE Confidence: 0.7921766

 $00:47:47.510 \longrightarrow 00:47:49.818$ educate basic researchers on the diagnosis,

NOTE Confidence: 0.7921766

00:47:49.820 --> 00:47:51.848 treatment, and importantly, the unmet needs.

NOTE Confidence: 0.7921766

 $00:47:51.850 \longrightarrow 00:47:53.130$ For specific answers only.

NOTE Confidence: 0.7921766

 $00:47:53.130 \longrightarrow 00:47:54.730$ This will these be important

NOTE Confidence: 0.7921766

 $00:47:54.730 \longrightarrow 00:47:55.890$ community building events,

NOTE Confidence: 0.7921766

 $00{:}47{:}55.890 \dashrightarrow 00{:}47{:}58.362$ but also an opportunity to educate

NOTE Confidence: 0.7921766

 $00:47:58.362 \longrightarrow 00:48:00.804$ our basic science community on the

NOTE Confidence: 0.7921766

 $00:48:00.804 \longrightarrow 00:48:02.609$ challenges faced in the clinic.

NOTE Confidence: 0.7921766

 $00:48:02.610 \longrightarrow 00:48:05.270$ We want to include basic and translational

NOTE Confidence: 0.7921766

 $00:48:05.270 \longrightarrow 00:48:07.993$ research talks into the CME events within

00:48:07.993 --> 00:48:10.273 our community that Doctor Kunz described

NOTE Confidence: 0.7921766

 $00{:}48{:}10.336 \dashrightarrow 00{:}48{:}12.356$ again as an education initiative,

NOTE Confidence: 0.7921766

 $00:48:12.360 \longrightarrow 00:48:15.588$ but also an opportunity for outreach.

NOTE Confidence: 0.7921766

 $00:48:15.590 \longrightarrow 00:48:17.300$ We want to facilitate team

NOTE Confidence: 0.7921766

00:48:17.300 --> 00:48:18.326 based grant funding,

NOTE Confidence: 0.7921766

00:48:18.330 --> 00:48:20.520 in particular trying to take advantage

NOTE Confidence: 0.7921766

 $00:48:20.520 \longrightarrow 00:48:22.450$ of internal support such as TCA.

NOTE Confidence: 0.7921766

 $00:48:22.450 \longrightarrow 00:48:23.980$ The team challenge awarded the

NOTE Confidence: 0.7921766

 $00{:}48{:}23.980 \dashrightarrow 00{:}48{:}25.510$ teacher grants and ultimately to

NOTE Confidence: 0.7921766

 $00:48:25.567 \longrightarrow 00:48:27.841$ direct these teams and support these

NOTE Confidence: 0.7921766

 $00{:}48{:}27.841 \dashrightarrow 00{:}48{:}28.978$ teams administratively towards

NOTE Confidence: 0.7921766

 $00{:}48{:}28.978 {\: -->\:} 00{:}48{:}30.678$ developing or program project grants.

NOTE Confidence: 0.7921766

 $00:48:30.680 \longrightarrow 00:48:32.794$ Just peel ones and spores we want

NOTE Confidence: 0.7921766

 $00{:}48{:}32.794 \dashrightarrow 00{:}48{:}34.561$ to increase Accessibility in Electro

NOTE Confidence: 0.7921766

 $00:48:34.561 \longrightarrow 00:48:36.165$ characterization of biobank samples.

NOTE Confidence: 0.7921766

00:48:36.170 --> 00:48:37.890 Doctor Kunz describe some events,

 $00:48:37.890 \longrightarrow 00:48:39.936$ some initiatives in the computational side.

NOTE Confidence: 0.7921766

 $00:48:39.940 \longrightarrow 00:48:41.692$ We also want to leverage some

NOTE Confidence: 0.7921766

 $00:48:41.692 \longrightarrow 00:48:43.720$ of the multi omics technologies.

NOTE Confidence: 0.7921766

00:48:43.720 --> 00:48:45.580 And finally we want to fundraise

NOTE Confidence: 0.7921766

 $00:48:45.580 \longrightarrow 00:48:47.303$ towards the center and disease

NOTE Confidence: 0.7921766

 $00{:}48{:}47.303 \dashrightarrow 00{:}48{:}49.418$ programs to support this translation.

NOTE Confidence: 0.7921766

 $00:48:49.420 \longrightarrow 00:48:51.612$ Research clearly to be able to build these

NOTE Confidence: 0.7921766

00:48:51.612 --> 00:48:53.797 teams and provide private pilot funding.

NOTE Confidence: 0.7921766

 $00:48:53.800 \longrightarrow 00:48:55.464$ Some amount of philanthropy

NOTE Confidence: 0.7921766

 $00:48:55.464 \longrightarrow 00:48:57.544$ is going to be required.

NOTE Confidence: 0.7921766

 $00:48:57.550 \longrightarrow 00:48:59.518$ And to do that we want to create

NOTE Confidence: 0.7921766

 $00{:}48{:}59.518 \dashrightarrow 00{:}49{:}01.161$ a unified Twitter and website

NOTE Confidence: 0.7921766

00:49:01.161 --> 00:49:03.345 presence to really unify the center,

NOTE Confidence: 0.7921766

 $00:49:03.350 \longrightarrow 00:49:05.660$ but also to make key announcements

NOTE Confidence: 0.7921766

 $00:49:05.660 \longrightarrow 00:49:07.200$ of advances in translational

 $00:49:07.268 \longrightarrow 00:49:08.860$ science within our center.

NOTE Confidence: 0.7921766

 $00:49:08.860 \longrightarrow 00:49:09.988$ And so with that,

NOTE Confidence: 0.7921766

 $00:49:09.988 \longrightarrow 00:49:11.680$ we're happy to take any questions.

NOTE Confidence: 0.8409647

00:49:13.750 --> 00:49:14.743 Thank you both.

NOTE Confidence: 0.8409647

 $00:49:14.743 \longrightarrow 00:49:16.402$ That was absolutely wonderful. Well,

NOTE Confidence: 0.8409647

 $00{:}49{:}16.402 \dashrightarrow 00{:}49{:}19.058$ we'll put some some questions in the chat,

NOTE Confidence: 0.8409647

 $00:49:19.060 \longrightarrow 00:49:21.046$ so maybe I'll start, you know,

NOTE Confidence: 0.8409647

 $00:49:21.050 \longrightarrow 00:49:22.919$ for you, Pam can you speak a

NOTE Confidence: 0.8409647

 $00{:}49{:}22.919 \dashrightarrow 00{:}49{:}25.034$ little bit about you talked about

NOTE Confidence: 0.8409647

 $00:49:25.034 \longrightarrow 00:49:26.698$ screening for colorectal cancer?

NOTE Confidence: 0.8409647

00:49:26.700 --> 00:49:28.572 Can you talk about what the

NOTE Confidence: 0.8409647

 $00:49:28.572 \longrightarrow 00:49:30.244$ current guidelines are and how

NOTE Confidence: 0.8409647

 $00:49:30.244 \longrightarrow 00:49:31.680$ we're addressing that here?

NOTE Confidence: 0.8409647

 $00:49:31.680 \longrightarrow 00:49:33.008$ At? Yes, my own.

NOTE Confidence: 0.8409647

00:49:33.008 --> 00:49:34.333 Also, the whole HealthEquity

NOTE Confidence: 0.8409647

 $00:49:34.333 \longrightarrow 00:49:35.326$ issue around this.

 $00:49:35.330 \longrightarrow 00:49:37.689$ How are you making sure that all

NOTE Confidence: 0.8409647

 $00{:}49{:}37.689 \dashrightarrow 00{:}49{:}39.978$ patients are getting in for a screening?

NOTE Confidence: 0.8644784

 $00:49:42.090 \longrightarrow 00:49:44.172$ So, so at present the recommended

NOTE Confidence: 0.8644784

 $00:49:44.172 \longrightarrow 00:49:45.922$ screening age is still 50

NOTE Confidence: 0.8644784

 $00:49:45.922 \longrightarrow 00:49:47.417$ on the USPS TF guidelines.

NOTE Confidence: 0.8644784

 $00:49:47.420 \longrightarrow 00:49:49.418$ The draft has not been accepted

NOTE Confidence: 0.8644784

 $00:49:49.418 \longrightarrow 00:49:50.750$ into practice just yet.

NOTE Confidence: 0.8644784

 $00:49:50.750 \longrightarrow 00:49:52.410$ So what I will say,

NOTE Confidence: 0.8644784

 $00:49:52.410 \longrightarrow 00:49:55.317$ I have an in since my husband is a

NOTE Confidence: 0.8644784

00:49:55.317 --> 00:49:56.738 gastroenterologist in the community,

NOTE Confidence: 0.8644784

 $00:49:56.740 \longrightarrow 00:49:59.228$ but he has said that I think this

NOTE Confidence: 0.8644784

 $00:49:59.228 \longrightarrow 00:50:00.969$ is appropriate that we recommend

NOTE Confidence: 0.8644784

 $00{:}50{:}00.969 {\:{\mbox{--}}\!>} 00{:}50{:}03.069$ that if patients who are between

NOTE Confidence: 0.8644784

 $00{:}50{:}03.069 --> 00{:}50{:}05.430$ the ages of 45 and 40 niner

NOTE Confidence: 0.8644784

 $00:50:05.430 \longrightarrow 00:50:07.064$ interested that they check with

00:50:07.064 --> 00:50:08.400 their insurance company first.

NOTE Confidence: 0.8644784

00:50:08.400 --> 00:50:10.703 I mean, I anticipate that this will

NOTE Confidence: 0.8644784

 $00:50:10.703 \longrightarrow 00:50:13.558$ in fact be adopted and then we will.

NOTE Confidence: 0.8644784

 $00:50:13.560 \longrightarrow 00:50:15.612$ Have a considerable education to do

NOTE Confidence: 0.8644784

 $00:50:15.612 \longrightarrow 00:50:17.946$ and I think that partnering with

NOTE Confidence: 0.8644784

 $00:50:17.946 \longrightarrow 00:50:20.628$ shabbier your and this the colorectal

NOTE Confidence: 0.8644784

 $00{:}50{:}20.628 \dashrightarrow 00{:}50{:}23.307$ cancer program Shabbir died and his team.

NOTE Confidence: 0.8644784

 $00:50:23.310 \longrightarrow 00:50:25.440$ We talked a lot about outreach

NOTE Confidence: 0.8644784

 $00{:}50{:}25.440 \dashrightarrow 00{:}50{:}28.225$ and and how we can improve our

NOTE Confidence: 0.8644784

 $00:50:28.225 \longrightarrow 00:50:29.937$ efforts in that space.

NOTE Confidence: 0.8268985

 $00{:}50{:}30.630 \dashrightarrow 00{:}50{:}31.770$ Right, you mentioned you're

NOTE Confidence: 0.8268985

 $00:50:31.770 \longrightarrow 00:50:32.625$ using Wades database.

NOTE Confidence: 0.8268985

 $00:50:32.630 \longrightarrow 00:50:34.076$ Are you able to look through

NOTE Confidence: 0.8268985

 $00:50:34.076 \longrightarrow 00:50:35.474$ that database by the patients

NOTE Confidence: 0.8268985

00:50:35.474 --> 00:50:36.617 that you're screening,

NOTE Confidence: 0.8268985

 $00:50:36.620 \longrightarrow 00:50:38.040$ representing the Community in general,

 $00:50:38.040 \longrightarrow 00:50:39.470$ or their areas to enhance?

NOTE Confidence: 0.7928682

 $00:50:41.000 \longrightarrow 00:50:43.696$ So we are just starting working with Wade,

NOTE Confidence: 0.7928682

 $00:50:43.700 \longrightarrow 00:50:45.891$ but that's an excellent idea and I

NOTE Confidence: 0.7928682

00:50:45.891 --> 00:50:48.316 think ways that we can leverage that

NOTE Confidence: 0.7928682

 $00:50:48.316 \dashrightarrow 00:50:50.452$ and also with with Marcelonis Smith.

NOTE Confidence: 0.79288375

 $00{:}50{:}52.310 \dashrightarrow 00{:}50{:}53.970$ Amanda, why is pancreatic cancer

NOTE Confidence: 0.79288375

 $00:50:53.970 \longrightarrow 00:50:55.630$ so difficult to to treat?

NOTE Confidence: 0.79288375

00:50:55.630 --> 00:50:57.954 You know, you have these new these

NOTE Confidence: 0.79288375

 $00{:}50{:}57.954 \dashrightarrow 00{:}50{:}59.328$ new approaches, but immunother apy.

NOTE Confidence: 0.79288375

00:50:59.328 --> 00:51:02.160 It doesn't seem to work as well there

NOTE Confidence: 0.79288375

 $00:51:02.232 \longrightarrow 00:51:04.255$ as in many of the other cancers.

NOTE Confidence: 0.79288375

 $00:51:04.260 \longrightarrow 00:51:05.920$ What's the reason for that?

NOTE Confidence: 0.8206661

00:51:07.150 --> 00:51:09.734 Yeah, I think there's a number of kind

NOTE Confidence: 0.8206661

00:51:09.734 --> 00:51:12.480 of unique features of pancreatic cancer,

NOTE Confidence: 0.8206661

00:51:12.480 --> 00:51:14.420 in particular that make it

 $00:51:14.420 \longrightarrow 00:51:15.584$ particularly challenging for

NOTE Confidence: 0.8206661

 $00:51:15.584 \longrightarrow 00:51:17.439$ therapeutics and even therapy space.

NOTE Confidence: 0.8206661

 $00{:}51{:}17.440 \dashrightarrow 00{:}51{:}19.070$ It's well known that pancreatic

NOTE Confidence: 0.8206661

 $00:51:19.070 \longrightarrow 00:51:22.148$ cancer has a quite a bit of a

NOTE Confidence: 0.8206661

 $00:51:22.148 \longrightarrow 00:51:23.528$ different stromal microenvironment.

NOTE Confidence: 0.8206661

 $00{:}51{:}23.530 \dashrightarrow 00{:}51{:}25.006$ In particular, it's thought

NOTE Confidence: 0.8206661

00:51:25.006 --> 00:51:26.851 that this micro environment made

NOTE Confidence: 0.8206661

00:51:26.851 --> 00:51:28.870 up of fibroblast immune cells,

NOTE Confidence: 0.8206661

 $00{:}51{:}28.870 \longrightarrow 00{:}51{:}30.394$ like macrophages in particular,

NOTE Confidence: 0.8206661

00:51:30.394 --> 00:51:32.680 as well as exercising matrix proteins,

NOTE Confidence: 0.8206661

 $00:51:32.680 \longrightarrow 00:51:34.248$ can be quite immunosuppressive,

NOTE Confidence: 0.8206661

 $00:51:34.248 \longrightarrow 00:51:36.600$ and even in mismatch repair deficient.

NOTE Confidence: 0.8206661

 $00:51:36.600 \longrightarrow 00:51:38.410$ Pancreatic cancer is the response.

NOTE Confidence: 0.8206661

00:51:38.410 --> 00:51:40.930 Rates are quite a bit lower than,

NOTE Confidence: 0.8206661

 $00:51:40.930 \longrightarrow 00:51:41.652$ for example,

NOTE Confidence: 0.8206661

 $00:51:41.652 \longrightarrow 00:51:43.818$ what we'd see in colorectal cancer,

 $00:51:43.820 \longrightarrow 00:51:45.184$ suggesting that there's something

NOTE Confidence: 0.8206661

00:51:45.184 --> 00:51:46.548 unique about the intrinsic

NOTE Confidence: 0.8206661

00:51:46.548 --> 00:51:48.150 biology of pancreatic cancer,

NOTE Confidence: 0.8206661

 $00:51:48.150 \longrightarrow 00:51:50.424$ and I think the stroma quite

NOTE Confidence: 0.8206661

 $00:51:50.424 \longrightarrow 00:51:52.850$ plays quite a bit of a role.

NOTE Confidence: 0.8206661

 $00{:}51{:}52.850 \to 00{:}51{:}53.930$ Importantly, pancreatic cancer

NOTE Confidence: 0.8206661

 $00:51:53.930 \longrightarrow 00:51:55.370$ is genetically fairly bland.

NOTE Confidence: 0.8206661

00:51:55.370 --> 00:51:57.175 It gets 4 hallmark recurrent

NOTE Confidence: 0.8206661

 $00:51:57.175 \longrightarrow 00:51:57.897$ genetic alterations,

NOTE Confidence: 0.8206661

 $00:51:57.900 \longrightarrow 00:52:00.427$ in particular in the proto oncogene carass,

NOTE Confidence: 0.8206661

 $00:52:00.430 \longrightarrow 00:52:02.590$ and three other tumor suppressor genes.

NOTE Confidence: 0.8206661

 $00:52:02.590 \longrightarrow 00:52:04.395$ So in terms of targetable

NOTE Confidence: 0.8206661

00:52:04.395 --> 00:52:05.117 genetic alterations,

NOTE Confidence: 0.8206661

 $00:52:05.120 \longrightarrow 00:52:06.035$ there are few.

NOTE Confidence: 0.8206661

 $00:52:06.035 \longrightarrow 00:52:07.865$ And even within care as mutations

00:52:07.865 --> 00:52:09.075 there currently targetable

NOTE Confidence: 0.8206661

00:52:09.075 --> 00:52:11.175 1G12C mutations are quite rare,

NOTE Confidence: 0.8206661

 $00:52:11.180 \longrightarrow 00:52:13.956$ only found by two to 3% in our own

NOTE Confidence: 0.8206661

00:52:13.956 --> 00:52:15.648 data suggested that even if you

NOTE Confidence: 0.8206661

00:52:15.648 --> 00:52:17.597 had a perfect chaos inhibitor,

NOTE Confidence: 0.8206661

 $00:52:17.600 \longrightarrow 00:52:19.155$ resistance is likely to emerge

NOTE Confidence: 0.8206661

 $00:52:19.155 \longrightarrow 00:52:21.140$ at least half of the cases,

NOTE Confidence: 0.8206661

 $00:52:21.140 \longrightarrow 00:52:23.348$ and so I think there are a number

NOTE Confidence: 0.8206661

 $00:52:23.348 \longrightarrow 00:52:25.775$ of factors that lead to the poor

NOTE Confidence: 0.8206661

00:52:25.775 --> 00:52:27.223 outcomes of pancreatic cancer,

NOTE Confidence: 0.8206661

 $00:52:27.230 \longrightarrow 00:52:30.016$ and I think one aspect that deserves

NOTE Confidence: 0.8206661

 $00:52:30.016 \longrightarrow 00:52:33.200$ more attention is prevention in the disease.

NOTE Confidence: 0.8206661

 $00:52:33.200 \longrightarrow 00:52:35.312$ One of the one of the key factors

NOTE Confidence: 0.8206661

 $00:52:35.312 \longrightarrow 00:52:37.458$ to poor outcomes is often late

NOTE Confidence: 0.8206661

 $00:52:37.458 \longrightarrow 00:52:38.619$ stage of diagnosis,

NOTE Confidence: 0.8206661

 $00:52:38.620 \longrightarrow 00:52:40.168$ where more than 80% of patients

 $00:52:40.168 \longrightarrow 00:52:42.492$ are found at a time when they're

NOTE Confidence: 0.8206661

 $00:52:42.492 \longrightarrow 00:52:43.725$ not surgically resectable,

NOTE Confidence: 0.8206661

 $00:52:43.730 \longrightarrow 00:52:45.325$ which really is the mainstay

NOTE Confidence: 0.8206661

00:52:45.325 --> 00:52:46.920 curative option in this disease,

NOTE Confidence: 0.8206661

 $00:52:46.920 \longrightarrow 00:52:49.144$ and So what can we do to understand

NOTE Confidence: 0.8206661

 $00:52:49.144 \longrightarrow 00:52:50.750$ when this disease emerges?

NOTE Confidence: 0.8206661

 $00.52.50.750 \longrightarrow 00.52.52.022$ Can we intervene earlier?

NOTE Confidence: 0.8206661

00:52:52.022 --> 00:52:53.612 Can we identify earlier disease,

NOTE Confidence: 0.8206661

 $00:52:53.620 \longrightarrow 00:52:55.825$ and can we even develop strategies for

NOTE Confidence: 0.8206661

00:52:55.825 --> 00:52:57.439 prevention by understanding risk factors?

NOTE Confidence: 0.8206661

 $00:52:57.440 \longrightarrow 00:52:59.680$ For example, how they play a role,

NOTE Confidence: 0.8206661

 $00{:}52{:}59.680 \dashrightarrow 00{:}53{:}02.109$ and that's sort of driven some of

NOTE Confidence: 0.8206661

 $00{:}53{:}02.109 \dashrightarrow 00{:}53{:}04.288$ our own efforts in the obesity.

NOTE Confidence: 0.8206661

00:53:04.290 --> 00:53:05.448 Pancreatic cancer space.

NOTE Confidence: 0.8314319

 $00{:}53{:}06.530 \dashrightarrow 00{:}53{:}08.749$ Other genetic risks as well and I

 $00:53:08.749 \longrightarrow 00:53:11.397$ have to use big data AI approaches.

NOTE Confidence: 0.8314319

 $00{:}53{:}11.400 \dashrightarrow 00{:}53{:}14.272$ Do you think we'd find some some genomic

NOTE Confidence: 0.8314319

 $00:53:14.272 \longrightarrow 00:53:16.970$ factors that might tell us who might need

NOTE Confidence: 0.8314319

 $00:53:16.970 \longrightarrow 00:53:18.710$ need to be screened earlier?

NOTE Confidence: 0.8314319

 $00:53:18.710 \longrightarrow 00:53:21.013$ Yeah, there are a number of genetic

NOTE Confidence: 0.8314319

00:53:21.013 --> 00:53:22.810 factors that have been identified

NOTE Confidence: 0.8314319

 $00{:}53{:}22.810 \dashrightarrow 00{:}53{:}24.974$ only about 10% of pancreatic cancers

NOTE Confidence: 0.8314319

 $00:53:24.974 \longrightarrow 00:53:27.410$ are thought to be familial in nature,

NOTE Confidence: 0.8314319

 $00{:}53{:}27.410 \dashrightarrow 00{:}53{:}29.580$ and a subset of those patients will

NOTE Confidence: 0.8314319

 $00:53:29.580 \longrightarrow 00:53:30.970$ have known genetic alterations

NOTE Confidence: 0.8314319

 $00{:}53{:}30.970 \dashrightarrow 00{:}53{:}32.980$ and our screening clinic here.

NOTE Confidence: 0.8314319

 $00:53:32.980 \longrightarrow 00:53:34.428$ Led by James Farrell,

NOTE Confidence: 0.8314319

 $00:53:34.428 \longrightarrow 00:53:36.890$ is focused on that in trying to.

NOTE Confidence: 0.8314319

 $00:53:36.890 \longrightarrow 00:53:38.282$ Follow these familial cases

NOTE Confidence: 0.8314319

 $00:53:38.282 \longrightarrow 00:53:40.370$ not only in terms of genetics,

NOTE Confidence: 0.8314319

 $00:53:40.370 \longrightarrow 00:53:42.296$ but also to understand other risk

 $00{:}53{:}42.296 \dashrightarrow 00{:}53{:}44.549$ factors such as new onset diabetes.

NOTE Confidence: 0.8314319

00:53:44.550 --> 00:53:46.971 And it turns out about 1% of

NOTE Confidence: 0.8314319

00:53:46.971 --> 00:53:48.676 pancreatic cancer cases can be

NOTE Confidence: 0.8314319

 $00:53:48.676 \longrightarrow 00:53:50.810$ identified when you want to diabetes.

NOTE Confidence: 0.8314319

 $00:53:50.810 \longrightarrow 00:53:52.903$ Could we use that as a biomarker

NOTE Confidence: 0.8314319

 $00:53:52.903 \longrightarrow 00:53:54.989$ of sort of early detection?

NOTE Confidence: 0.8314319

 $00:53:54.990 \longrightarrow 00:53:57.209$ And so there are a number of

NOTE Confidence: 0.8314319

00:53:57.209 --> 00:53:59.159 avenues that people are exploring,

NOTE Confidence: 0.8314319

 $00:53:59.160 \longrightarrow 00:54:00.900$ and certainly big data type

NOTE Confidence: 0.8314319

 $00:54:00.900 \longrightarrow 00:54:02.640$ approaches that mirror that match.

NOTE Confidence: 0.8314319

00:54:02.640 --> 00:54:04.464 Clinical prior clinical history

NOTE Confidence: 0.8314319

 $00:54:04.464 \longrightarrow 00:54:06.288$ to pancreatic cancer developments

NOTE Confidence: 0.8314319

 $00{:}54{:}06.288 \to 00{:}54{:}08.657$ again may be taking advantage of.

NOTE Confidence: 0.8314319

00:54:08.660 --> 00:54:11.089 EMR mining, like Wade Schultz is doing,

NOTE Confidence: 0.8314319

00:54:11.090 --> 00:54:13.202 could help identify some of those

00:54:13.202 --> 00:54:15.006 patients and identify other risk

NOTE Confidence: 0.8314319

 $00{:}54{:}15.006 {\:\dashrightarrow\:} 00{:}54{:}16.986$ factors and their number of groups,

NOTE Confidence: 0.8314319

 $00{:}54{:}16.990 \dashrightarrow 00{:}54{:}18.670$ including the Dana Farber Group

NOTE Confidence: 0.8314319

 $00:54:18.670 \longrightarrow 00:54:21.150$ that is trying to build risk scores.

NOTE Confidence: 0.8314319

 $00:54:21.150 \longrightarrow 00:54:22.885$ That combined with genetics as

NOTE Confidence: 0.8314319

 $00:54:22.885 \longrightarrow 00:54:25.021$ well as non genetic factors to

NOTE Confidence: 0.8314319

00:54:25.021 --> 00:54:26.726 truly determine who are perhaps

NOTE Confidence: 0.8314319

 $00:54:26.726 \longrightarrow 00:54:28.090$ the most highest risk.

NOTE Confidence: 0.8314319

 $00:54:28.090 \longrightarrow 00:54:28.784$ And finally,

NOTE Confidence: 0.8314319

 $00:54:28.784 \longrightarrow 00:54:31.560$ I think we still need to further optimize.

NOTE Confidence: 0.8314319

 $00{:}54{:}31.560 \dashrightarrow 00{:}54{:}33.636$ What are the best screening protocols?

NOTE Confidence: 0.8314319

 $00:54:33.640 \longrightarrow 00:54:35.375$ Is it a combination of

NOTE Confidence: 0.8314319

00:54:35.375 --> 00:54:36.416 endoscopic ultrasound imaging,

NOTE Confidence: 0.8314319

 $00:54:36.420 \longrightarrow 00:54:37.461$ blood based biomarkers?

NOTE Confidence: 0.8314319

 $00:54:37.461 \longrightarrow 00:54:39.890$ All of those are active areas investigation.

NOTE Confidence: 0.8396771

 $00:54:40.400 \longrightarrow 00:54:41.830$ We have a few questions,

 $00:54:41.830 \longrightarrow 00:54:43.250$ so Pam, you're very modest.

NOTE Confidence: 0.8396771

 $00:54:43.250 \longrightarrow 00:54:45.077$ I actually, I'm waiting to see how

NOTE Confidence: 0.8396771

00:54:45.077 --> 00:54:47.321 you do the GI program and I'm at

NOTE Confidence: 0.8396771

00:54:47.321 --> 00:54:49.380 all the long program after you you

NOTE Confidence: 0.8396771

 $00:54:49.380 \longrightarrow 00:54:51.494$ just fantastic and I have to just

NOTE Confidence: 0.8396771

 $00:54:51.494 \longrightarrow 00:54:52.980$ compliment you coming here during

NOTE Confidence: 0.8396771

 $00:54:52.980 \longrightarrow 00:54:54.750$ this very difficult year and telling

NOTE Confidence: 0.8396771

 $00:54:54.800 \longrightarrow 00:54:56.275$ this amazing group together between

NOTE Confidence: 0.8396771

 $00:54:56.275 \longrightarrow 00:54:58.310$ the campuses and I just think it's

NOTE Confidence: 0.8396771

 $00{:}54{:}58.310 \dashrightarrow 00{:}55{:}00.095$ remarkable and I guess zoom has helped

NOTE Confidence: 0.8396771

 $00:55:00.095 \longrightarrow 00:55:02.030$ a little bit but hopefully at some

NOTE Confidence: 0.8396771

 $00:55:02.030 \longrightarrow 00:55:04.058$ point we'll see each other in person.

NOTE Confidence: 0.8396771

00:55:04.060 --> 00:55:05.831 But how do you clinically with care

NOTE Confidence: 0.8396771

 $00:55:05.831 \longrightarrow 00:55:08.048$ on going at 15 different care centers?

NOTE Confidence: 0.8396771

 $00:55:08.050 \longrightarrow 00:55:09.802$ And I was impressed by that

 $00:55:09.802 \longrightarrow 00:55:10.970$ picture where you actually.

NOTE Confidence: 0.8396771

 $00:55:10.970 \longrightarrow 00:55:12.286$ All the different people,

NOTE Confidence: 0.8396771

 $00:55:12.286 \longrightarrow 00:55:14.600$ how are you putting practice plans in

NOTE Confidence: 0.8396771

 $00:55:14.600 \longrightarrow 00:55:16.280$ place and knowing that someone who

NOTE Confidence: 0.8396771

 $00:55:16.280 \longrightarrow 00:55:18.447$ goes to North Haven versus someone that

NOTE Confidence: 0.8396771

00:55:18.447 --> 00:55:20.663 goes to Greenwich or Main campus is

NOTE Confidence: 0.8396771

 $00:55:20.663 \longrightarrow 00:55:22.784$ getting the same sort of approach and

NOTE Confidence: 0.8396771

 $00:55:22.784 \longrightarrow 00:55:25.057$ and care for one of these diseases?

NOTE Confidence: 0.8391838

 $00{:}55{:}26.700 \dashrightarrow 00{:}55{:}28.370$ That that's a great question.

NOTE Confidence: 0.8391838

00:55:28.370 --> 00:55:30.682 You know, I'd say that the first step

NOTE Confidence: 0.8391838

 $00{:}55{:}30.682 \dashrightarrow 00{:}55{:}32.844$ has been creating forums where our

NOTE Confidence: 0.8391838

 $00:55:32.844 \longrightarrow 00:55:35.112$ team members will get together and

NOTE Confidence: 0.8391838

00:55:35.176 --> 00:55:37.744 I have to say that we've had just

NOTE Confidence: 0.8391838

 $00:55:37.744 \longrightarrow 00:55:39.130$ really tremendous virtual attendance,

NOTE Confidence: 0.8391838

00:55:39.130 --> 00:55:41.720 and I think that's one silver lining

NOTE Confidence: 0.8391838

 $00:55:41.720 \longrightarrow 00:55:44.165$ of the zoom format is that we have no

00:55:44.165 --> 00:55:46.736 30 to 40 people attending tumor board,

NOTE Confidence: 0.8391838

00:55:46.740 --> 00:55:48.076 averaging 40 patients attending

NOTE Confidence: 0.8391838

 $00:55:48.076 \longrightarrow 00:55:49.078$ our seminar series,

NOTE Confidence: 0.8391838

 $00:55:49.080 \longrightarrow 00:55:51.078$ and those that's really community building.

NOTE Confidence: 0.8391838

00:55:51.080 --> 00:55:53.744 I think Mandar spoke to that as well,

NOTE Confidence: 0.8391838

 $00:55:53.750 \longrightarrow 00:55:56.094$ and I think as soon as we have

NOTE Confidence: 0.8391838

 $00:55:56.094 \longrightarrow 00:55:57.759$ that as a foundation,

NOTE Confidence: 0.8391838

00:55:57.760 --> 00:55:59.340 it creates other opportunities

NOTE Confidence: 0.8391838

 $00:55:59.340 \longrightarrow 00:56:00.130$ for collaboration.

NOTE Confidence: 0.8391838

 $00:56:00.130 \longrightarrow 00:56:03.458$ I'm Julie, she is our Director of Education

NOTE Confidence: 0.8391838

 $00:56:03.458 \longrightarrow 00:56:07.286$ in our leadership cabinet and I know that.

NOTE Confidence: 0.8391838

 $00:56:07.290 \longrightarrow 00:56:08.482$ She's told me this,

NOTE Confidence: 0.8391838

 $00:56:08.482 \longrightarrow 00:56:10.710$ but I think I can say this,

NOTE Confidence: 0.8391838

 $00:56:10.710 \longrightarrow 00:56:13.050$ but I think she's she and I and the

NOTE Confidence: 0.8391838

 $00:56:13.050 \longrightarrow 00:56:15.373$ team are really eager to work on

00:56:15.373 --> 00:56:17.550 that signature of Karen and talking.

NOTE Confidence: 0.8391838

 $00:56:17.550 \longrightarrow 00:56:19.416$ That's why we have Journal clubs.

NOTE Confidence: 0.8391838

 $00:56:19.420 \longrightarrow 00:56:21.250$ We talk about standard practices very

NOTE Confidence: 0.8391838

 $00:56:21.250 \longrightarrow 00:56:23.459$ openly with all of our team members,

NOTE Confidence: 0.8391838

 $00:56:23.460 \longrightarrow 00:56:26.330$ and we have really tremendous.

NOTE Confidence: 0.8391838

00:56:26.330 --> 00:56:27.820 Dissipation from our care center

NOTE Confidence: 0.8391838

 $00:56:27.820 \longrightarrow 00:56:29.012$ members and you know,

NOTE Confidence: 0.8391838

00:56:29.020 --> 00:56:31.106 I think that's helped by Jeremy Corbyn's.

NOTE Confidence: 0.8391838

 $00{:}56{:}31.110 \dashrightarrow 00{:}56{:}32.610$ Key really being an integral

NOTE Confidence: 0.8391838

 $00:56:32.610 \longrightarrow 00:56:33.810$ part of our team.

NOTE Confidence: 0.8391838

 $00:56:33.810 \longrightarrow 00:56:36.250$ He has been for a long time and I think

NOTE Confidence: 0.8391838

 $00:56:36.319 \longrightarrow 00:56:38.888$ infusing his role that's helping as well.

NOTE Confidence: 0.79950714

 $00:56:40.580 \longrightarrow 00:56:40.853$ Absolutely,

NOTE Confidence: 0.79950714

 $00:56:40.853 \longrightarrow 00:56:43.310$ I would just at the end of the hour.

NOTE Confidence: 0.79950714

 $00:56:43.310 \longrightarrow 00:56:44.680$ Any other questions or comments?

NOTE Confidence: 0.79950714

 $00:56:44.680 \longrightarrow 00:56:46.584$ One thing I'll ask you mentioned it.

00:56:46.590 --> 00:56:48.766 You make sure Lacey ask both of you.

NOTE Confidence: 0.79950714

 $00:56:48.770 \longrightarrow 00:56:51.227$ I see a lot of fellows on the line.

NOTE Confidence: 0.79950714

 $00:56:51.230 \longrightarrow 00:56:53.960$ One of the one of the groups is fellows room,

NOTE Confidence: 0.79950714

 $00:56:53.960 \longrightarrow 00:56:55.325$ so I guess there hopefully

NOTE Confidence: 0.79950714

 $00{:}56{:}55.325 \dashrightarrow 00{:}56{:}56.690$ had getting a solution there.

NOTE Confidence: 0.79950714

 $00:56:56.690 \longrightarrow 00:56:58.866$ If not, let me know for next week,

NOTE Confidence: 0.79950714

 $00:56:58.870 \longrightarrow 00:56:59.910$ but the question is,

NOTE Confidence: 0.79950714

 $00{:}56{:}59.910 \dashrightarrow 00{:}57{:}01.812$ do you have projects you know our

NOTE Confidence: 0.79950714

 $00:57:01.812 \longrightarrow 00:57:03.510$ fellows and we have great fellows?

NOTE Confidence: 0.79950714

 $00{:}57{:}03.510 \dashrightarrow 00{:}57{:}04.875$ Medical students might even be

NOTE Confidence: 0.79950714

 $00{:}57{:}04.875 \dashrightarrow 00{:}57{:}05.694$ some undergraduates listening.

NOTE Confidence: 0.79950714

 $00:57:05.700 \longrightarrow 00:57:07.604$ I don't any one of their projects.

NOTE Confidence: 0.79950714

 $00{:}57{:}07.610 \dashrightarrow 00{:}57{:}09.290$ How it's one find a project

NOTE Confidence: 0.79950714

 $00:57:09.290 \longrightarrow 00:57:10.410$ in GI cancer Mandar.

NOTE Confidence: 0.79950714

 $00:57:10.410 \longrightarrow 00:57:12.050$ If they wanted to work in the lab

 $00:57:12.050 \longrightarrow 00:57:13.438$ or between a lab in the clinic,

NOTE Confidence: 0.79950714

00:57:13.440 --> 00:57:14.450 or Pam in the clinic,

NOTE Confidence: 0.79950714

 $00:57:14.450 \longrightarrow 00:57:15.460$ can you let us know?

NOTE Confidence: 0.8436312

 $00:57:16.530 \longrightarrow 00:57:18.175$ Yeah, I think one of our goals

NOTE Confidence: 0.8436312

 $00:57:18.175 \longrightarrow 00:57:20.080$ is to make very accessible shovel

NOTE Confidence: 0.8436312

00:57:20.080 --> 00:57:21.975 ready projects for people with

NOTE Confidence: 0.8436312

 $00:57:21.975 \longrightarrow 00:57:23.769$ limited time medical students,

NOTE Confidence: 0.8436312

 $00:57:23.770 \longrightarrow 00:57:25.240$ residents, fellows and I think

NOTE Confidence: 0.8436312

 $00{:}57{:}25.240 \dashrightarrow 00{:}57{:}27.390$ there are a couple of advantages.

NOTE Confidence: 0.8436312

 $00:57:27.390 \longrightarrow 00:57:29.030$ The one is the biobank

NOTE Confidence: 0.8436312

 $00:57:29.030 \longrightarrow 00:57:30.342$ which is quite expensive,

NOTE Confidence: 0.8436312

 $00:57:30.350 \longrightarrow 00:57:31.734$ particularly in again pancreatic

NOTE Confidence: 0.8436312

 $00:57:31.734 \longrightarrow 00:57:33.464$ cancer and colorectal cancer that

NOTE Confidence: 0.8436312

 $00{:}57{:}33.464 \dashrightarrow 00{:}57{:}35.076$ might allow tissue based analysis

NOTE Confidence: 0.8436312

 $00:57:35.076 \longrightarrow 00:57:36.596$ that might be more efficient.

NOTE Confidence: 0.8436312

 $00:57:36.600 \longrightarrow 00:57:38.574$ The second is we have a

 $00:57:38.574 \longrightarrow 00:57:39.890$ large number of patients,

NOTE Confidence: 0.8436312

 $00:57:39.890 \dashrightarrow 00:57:41.530$ particularly the pancreatic cancer space,

NOTE Confidence: 0.8436312

 $00:57:41.530 \longrightarrow 00:57:43.510$ that we followed for many years,

NOTE Confidence: 0.8436312

 $00:57:43.510 \longrightarrow 00:57:45.478$ and so some of this studies,

NOTE Confidence: 0.8436312

 $00:57:45.480 \longrightarrow 00:57:46.446$ for example, what?

NOTE Confidence: 0.8436312

 $00:57:46.446 \longrightarrow 00:57:48.378$ Doctor Patel has done is based

NOTE Confidence: 0.8436312

 $00:57:48.378 \longrightarrow 00:57:50.470$ on those types of retrospective

NOTE Confidence: 0.8436312

 $00{:}57{:}50.470 \dashrightarrow 00{:}57{:}52.605$ analysis and this clinical database

NOTE Confidence: 0.8436312

 $00:57:52.605 \longrightarrow 00:57:54.458$ that we have in GI cancers.

NOTE Confidence: 0.8436312

 $00:57:54.460 \longrightarrow 00:57:56.740$ And so again those types of

NOTE Confidence: 0.8436312

00:57:56.740 --> 00:57:58.691 projects are probably much more

NOTE Confidence: 0.8436312

00:57:58.691 --> 00:58:00.845 numerous and we need to make

NOTE Confidence: 0.8436312

 $00{:}58{:}00.845 \to 00{:}58{:}02.961$ those clearer and make them more

NOTE Confidence: 0.8436312

00:58:02.961 --> 00:58:05.222 shovel ready so that we can get

NOTE Confidence: 0.8436312

 $00:58:05.230 \longrightarrow 00:58:07.590$ our trainees involved quickly.

00:58:07.590 --> 00:58:09.808 In any any further I'll just yeah,

NOTE Confidence: 0.84441566

00:58:09.810 --> 00:58:12.029 I'll if I can just add right,

NOTE Confidence: 0.84441566

 $00:58:12.030 \longrightarrow 00:58:14.510$ you know we had our one of our

NOTE Confidence: 0.84441566

 $00:58:14.510 \longrightarrow 00:58:15.834$ programs director's meetings last

NOTE Confidence: 0.84441566

 $00:58:15.834 \longrightarrow 00:58:18.370$ week and we as a those four programs,

NOTE Confidence: 0.84441566

 $00:58:18.370 \longrightarrow 00:58:20.350$ all the code leaders identified as

NOTE Confidence: 0.84441566

 $00:58:20.350 \longrightarrow 00:58:22.351$ our next top priority doing just

NOTE Confidence: 0.84441566

 $00:58:22.351 \longrightarrow 00:58:24.193$ that of really developing this list

NOTE Confidence: 0.84441566

 $00{:}58{:}24.193 \dashrightarrow 00{:}58{:}26.373$ as we have new trainees coming in

NOTE Confidence: 0.84441566

00:58:26.373 --> 00:58:28.200 in July and having that available.

NOTE Confidence: 0.8201183

 $00{:}58{:}29.180 \dashrightarrow 00{:}58{:}30.608$ Right, and you guys are great.

NOTE Confidence: 0.8201183

 $00:58:30.610 \longrightarrow 00:58:31.805$ Actually one big part of

NOTE Confidence: 0.8201183

 $00:58:31.805 \longrightarrow 00:58:33.000$ the shovel is the handle,

NOTE Confidence: 0.8201183

 $00:58:33.000 \longrightarrow 00:58:34.984$ which is the mentor ship and on these

NOTE Confidence: 0.8201183

00:58:34.984 --> 00:58:37.064 projects you don't want to have a good idea,

NOTE Confidence: 0.8201183

 $00{:}58{:}37.070 \dashrightarrow 00{:}58{:}38.734$ but you know it's I can tell you

00:58:38.734 --> 00:58:40.347 from my own career it's having

NOTE Confidence: 0.8201183

 $00{:}58{:}40.347 \dashrightarrow 00{:}58{:}42.063$ mentors and people that help you

NOTE Confidence: 0.8201183

 $00:58:42.116 \longrightarrow 00:58:43.516$ so I can see you have that.

NOTE Confidence: 0.8201183

00:58:43.520 --> 00:58:45.509 And plenty of that in the GI Group will

NOTE Confidence: 0.8201183

 $00:58:45.509 \longrightarrow 00:58:47.403$ look forward to having you back in six

NOTE Confidence: 0.8201183

 $00:58:47.403 \longrightarrow 00:58:49.260$ months or so to hear more progress,

NOTE Confidence: 0.8201183

00:58:49.260 --> 00:58:51.164 maybe bring some other members of the group,

NOTE Confidence: 0.8201183

 $00:58:51.170 \longrightarrow 00:58:52.598$ but this is been a fantastic

NOTE Confidence: 0.8201183

00:58:52.598 --> 00:58:53.312 grand rounds today.

NOTE Confidence: 0.8201183

 $00:58:53.320 \longrightarrow 00:58:55.091$ Will look forward to your first grand

NOTE Confidence: 0.8201183

 $00{:}58{:}55.091 \dashrightarrow 00{:}58{:}57.173$ rounds for the GI program with an invited

NOTE Confidence: 0.8201183

 $00:58:57.173 \longrightarrow 00:58:59.180$ guest from Puerto Rico in two weeks and.

NOTE Confidence: 0.8201183

 $00:58:59.180 \longrightarrow 00:59:00.083$ Thank you all.

NOTE Confidence: 0.8201183

 $00:59:00.083 \longrightarrow 00:59:01.588$ Thanks everyone for coming today

NOTE Confidence: 0.8201183

 $00:59:01.588 \longrightarrow 00:59:03.671$ and we'll see you back next week

 $00{:}59{:}03.671 \dashrightarrow 00{:}59{:}05.096$ for Cancer Center grand rounds.

NOTE Confidence: 0.8201183

 $00:59:05.100 \longrightarrow 00:59:05.690$ Thank you.

NOTE Confidence: 0.8201183

 $00{:}59{:}05.690 \dashrightarrow 00{:}59{:}06.280$ Pam, Amanda.

NOTE Confidence: 0.9220947

 $00:59:07.490 \longrightarrow 00:59:09.482$ Thank you, thanks.
