## WEBVTT

NOTE duration: "00:01:34.3150000"

NOTE language:en-us

NOTE Confidence: 0.87551004

 $00:00:00.000 \longrightarrow 00:00:02.920$  My name is Terry Parker and I'm an

NOTE Confidence: 0.87551004

 $00:00:02.920 \longrightarrow 00:00:04.529$  assistant professor of medicine.

NOTE Confidence: 0.87551004

 $00:00:04.530 \longrightarrow 00:00:06.170$  In this section of hematology.

NOTE Confidence: 0.87551004

 $00:00:06.170 \longrightarrow 00:00:08.138$  So in medical school and an

NOTE Confidence: 0.87551004

00:00:08.138 --> 00:00:09.122 internal medicine residency,

NOTE Confidence: 0.87551004

 $00:00:09.130 \longrightarrow 00:00:11.632$  I was always drawn to the

NOTE Confidence: 0.87551004

 $00{:}00{:}11.632 \dashrightarrow 00{:}00{:}13.300$  human to logical malignancies.

NOTE Confidence: 0.87551004

 $00:00:13.300 \longrightarrow 00:00:15.412$  The research in the field was

NOTE Confidence: 0.87551004

 $00:00:15.412 \longrightarrow 00:00:17.450$  rapidly expanding and very exciting,

NOTE Confidence: 0.87551004

 $00:00:17.450 \longrightarrow 00:00:19.712$  and the patients had these amazing

NOTE Confidence: 0.87551004

 $00:00:19.712 \longrightarrow 00:00:21.220$  relationships with their physicians,

NOTE Confidence: 0.87551004

 $00{:}00{:}21.220 \dashrightarrow 00{:}00{:}24.908$  many spanning years, and all of this had.

NOTE Confidence: 0.87551004

 $00:00:24.910 \longrightarrow 00:00:26.992$  Led to my decision to specialize

NOTE Confidence: 0.87551004

 $00:00:26.992 \longrightarrow 00:00:28.033$  in haematological malignancies,

NOTE Confidence: 0.87551004

 $00{:}00{:}28.040 \dashrightarrow 00{:}00{:}29.364$  specifically plasma cell disorders

NOTE Confidence: 0.87551004

 $00:00:29.364 \longrightarrow 00:00:31.350$  when patients come from the first

NOTE Confidence: 0.87551004

00:00:31.400 --> 00:00:32.908 appointment with any physician,

NOTE Confidence: 0.87551004

 $00:00:32.910 \longrightarrow 00:00:34.302$  especially when discussing a

NOTE Confidence: 0.87551004

 $00{:}00{:}34.302 \dashrightarrow 00{:}00{:}36.390$  possible or new diagnosis of cancer,

NOTE Confidence: 0.87551004

 $00:00:36.390 \longrightarrow 00:00:38.130$  it can be very overwhelming.

NOTE Confidence: 0.87551004

 $00:00:38.130 \longrightarrow 00:00:39.870$  I would encourage all patients

NOTE Confidence: 0.87551004

 $00:00:39.870 \longrightarrow 00:00:41.262$  and their support system,

NOTE Confidence: 0.87551004

 $00:00:41.270 \longrightarrow 00:00:43.545$  whether that be a family member or

NOTE Confidence: 0.87551004

 $00:00:43.545 \longrightarrow 00:00:45.693$  friends to write down any questions

NOTE Confidence: 0.87551004

 $00:00:45.693 \longrightarrow 00:00:47.528$  or concerns that they have.

NOTE Confidence: 0.87551004

 $00:00:47.530 \longrightarrow 00:00:49.890$  That way you can be sure that these

NOTE Confidence: 0.87551004

 $00{:}00{:}49.890 \dashrightarrow 00{:}00{:}52.049$  are addressed during your appointments.

NOTE Confidence: 0.87551004

 $00{:}00{:}52.050 \dashrightarrow 00{:}00{:}54.055$  Treatment of plasma cell disorders

NOTE Confidence: 0.87551004

 $00:00:54.055 \longrightarrow 00:00:56.060$  is definitely a team approach.

NOTE Confidence: 0.87551004

 $00:00:56.060 \longrightarrow 00:00:58.324$  Here at yell at the team is not

NOTE Confidence: 0.87551004

 $00{:}00{:}58.324 \dashrightarrow 00{:}01{:}00.390$ only your physician but consist

NOTE Confidence: 0.87551004

00:01:00.390 --> 00:01:02.765 of an advanced practice provider,

NOTE Confidence: 0.87551004

 $00{:}01{:}02.770 \dashrightarrow 00{:}01{:}04.640$  which is a physician assistant.

NOTE Confidence: 0.87551004

00:01:04.640 --> 00:01:07.244 In our case, practice Tarsis infusion nurses,

NOTE Confidence: 0.87551004

00:01:07.250 --> 00:01:08.634 nutrition and social work,

NOTE Confidence: 0.87551004

 $00{:}01{:}08.634 \dashrightarrow 00{:}01{:}10.710$  which also runs a patient support

NOTE Confidence: 0.87551004

 $00:01:10.772 \longrightarrow 00:01:12.847$  group for multiple myeloma patients.

NOTE Confidence: 0.87551004

 $00{:}01{:}12.850 \dashrightarrow 00{:}01{:}14.338$  My research focused mirrors

NOTE Confidence: 0.87551004

00:01:14.338 --> 00:01:15.454 my clinical interest.

NOTE Confidence: 0.87551004

 $00{:}01{:}15.460 \dashrightarrow 00{:}01{:}17.325$  I conduct clinical trials in

NOTE Confidence: 0.87551004

 $00:01:17.325 \longrightarrow 00:01:19.190$  patients with plasma cell disorders.

NOTE Confidence: 0.87551004

 $00{:}01{:}19.190 \dashrightarrow 00{:}01{:}21.290$  There have been many advances in

NOTE Confidence: 0.87551004

00:01:21.290 --> 00:01:23.550 plasma cell disorders in regards to

NOTE Confidence: 0.87551004

 $00:01:23.550 \longrightarrow 00:01:25.525$  the understanding of the diseases,

NOTE Confidence: 0.87551004

00:01:25.530 --> 00:01:26.466 pathogenesis, and biology.

NOTE Confidence: 0.87551004

 $00{:}01{:}26.466 \dashrightarrow 00{:}01{:}28.650$  Which has led to the new developments

NOTE Confidence: 0.87551004

00:01:28.706 --> 00:01:29.390 of treatments.
