WEBVTT

00:00:00.000 --> 00:00:02.920 My name is Terry Parker and I'm an

00:00:02.920 --> 00:00:04.529 assistant professor of medicine.

00:00:04.530 --> 00:00:06.170 In this section of hematology.

00:00:06.170 --> 00:00:08.138 So in medical school and an

00:00:08.138 --> 00:00:09.122 internal medicine residency,

00:00:09.130 --> 00:00:11.632 I was always drawn to the

00:00:11.632 --> 00:00:13.300 human to logical malignancies.

00:00:13.300 --> 00:00:15.412 The research in the field was

00:00:15.412 --> 00:00:17.450 rapidly expanding and very exciting,

00:00:17.450 --> 00:00:19.712 and the patients had these amazing

00:00:19.712 --> 00:00:21.220 relationships with their physicians,

00:00:21.220 --> 00:00:24.908 many spanning years, and all of this had.

00:00:24.910 --> 00:00:26.992 Led to my decision to specialize

00:00:26.992 --> 00:00:28.033 in haematological malignancies,

NOTE Confidence: 0.87551004

00:00:28.040 --> 00:00:29.364 specifically plasma cell disorders

NOTE Confidence: 0.87551004

00:00:29.364 --> 00:00:31.350 when patients come from the first

NOTE Confidence: 0.87551004

00:00:31.400 --> 00:00:32.908 appointment with any physician,

NOTE Confidence: 0.87551004

00:00:32.910 --> 00:00:34.302 especially when discussing a

NOTE Confidence: 0.87551004

00:00:34.302 --> 00:00:36.390 possible or new diagnosis of cancer,

NOTE Confidence: 0.87551004

00:00:36.390 --> 00:00:38.130 it can be very overwhelming.

NOTE Confidence: 0.87551004

00:00:38.130 --> 00:00:39.870 I would encourage all patients

NOTE Confidence: 0.87551004

00:00:39.870 --> 00:00:41.262 and their support system,

NOTE Confidence: 0.87551004

00:00:41.270 --> 00:00:43.545 whether that be a family member or

NOTE Confidence: 0.87551004

00:00:43.545 --> 00:00:45.693 friends to write down any questions

NOTE Confidence: 0.87551004

00:00:45.693 --> 00:00:47.528 or concerns that they have.

NOTE Confidence: 0.87551004

00:00:47.530 --> 00:00:49.890 That way you can be sure that these

NOTE Confidence: 0.87551004

00:00:49.890 --> 00:00:52.049 are addressed during your appointments.

NOTE Confidence: 0.87551004

00:00:52.050 --> 00:00:54.055 Treatment of plasma cell disorders

NOTE Confidence: 0.87551004

00:00:54.055 --> 00:00:56.060 is definitely a team approach.

NOTE Confidence: 0.87551004

00:00:56.060 --> 00:00:58.324 Here at yell at the team is not

NOTE Confidence: 0.87551004

00:00:58.324 --> 00:01:00.390 only your physician but consist

NOTE Confidence: 0.87551004

00:01:00.390 --> 00:01:02.765 of an advanced practice provider,

NOTE Confidence: 0.87551004

00:01:02.770 --> 00:01:04.640 which is a physician assistant.

NOTE Confidence: 0.87551004

00:01:04.640 --> 00:01:07.244 In our case, practice Tarsis infusion nurses,

NOTE Confidence: 0.87551004

00:01:07.250 --> 00:01:08.634 nutrition and social work,

NOTE Confidence: 0.87551004

00:01:08.634 --> 00:01:10.710 which also runs a patient support

NOTE Confidence: 0.87551004

00:01:10.772 --> 00:01:12.847 group for multiple myeloma patients.

NOTE Confidence: 0.87551004

00:01:12.850 --> 00:01:14.338 My research focused mirrors

NOTE Confidence: 0.87551004

00:01:14.338 --> 00:01:15.454 my clinical interest.

NOTE Confidence: 0.87551004

00:01:15.460 --> 00:01:17.325 I conduct clinical trials in

NOTE Confidence: 0.87551004

00:01:17.325 --> 00:01:19.190 patients with plasma cell disorders.

NOTE Confidence: 0.87551004

00:01:19.190 --> 00:01:21.290 There have been many advances in

NOTE Confidence: 0.87551004

00:01:21.290 --> 00:01:23.550 plasma cell disorders in regards to

NOTE Confidence: 0.87551004

00:01:23.550 --> 00:01:25.525 the understanding of the diseases,

NOTE Confidence: 0.87551004

00:01:25.530 --> 00:01:26.466 pathogenesis, and biology.

NOTE Confidence: 0.87551004

00:01:26.466 --> 00:01:28.650 Which has led to the new developments

NOTE Confidence: 0.87551004

00:01:28.706 --> 00:01:29.390 of treatments.
