NOTE Confidence: 0.9694305

00:00:00.000 --> 00:00:03.168 Hi, my name is Stacy Stein.

NOTE Confidence: 0.9694305

00:00:03.170 --> 00:00:04.698 I'm an associate professor

NOTE Confidence: 0.9694305

00:00:04.698 --> 00:00:06.226 of medicine at Yale.

NOTE Confidence: 0.9694305

00:00:06.230 --> 00:00:08.534 I've been here since 2010 and I focus

NOTE Confidence: 0.9694305

00:00:08.534 --> 00:00:10.660 in GI cancers specifically with

NOTE Confidence: 0.9694305

00:00:10.660 --> 00:00:13.130 a focus in hepatobiliary cancers.

NOTE Confidence: 0.9694305

00:00:13.130 --> 00:00:15.158 I think I always knew I

NOTE Confidence: 0.9694305

00:00:15.158 --> 00:00:17.340 wanted to go into medicine,

NOTE Confidence: 0.9694305

00:00:17.340 --> 00:00:19.578 but in thinking about when did

NOTE Confidence: 0.9694305

00:00:19.578 --> 00:00:21.530 I first really think about

NOTE Confidence: 0.9694305

00:00:21.530 --> 00:00:23.846 oncology when I was in college?

NOTE Confidence: 0.9694305

00:00:23.850 --> 00:00:26.652 One of my grandmothers was diagnosed

NOTE Confidence: 0.9694305

00:00:26.652 --> 00:00:29.259 with pancreatic cancer and it was

NOTE Confidence: 0.9694305

00:00:29.259 --> 00:00:31.562 a very tough year for our family.

NOTE Confidence: 0.9694305

00:00:31.570 --> 00:00:34.825 Uhm, and I think it really connected

NOTE Confidence: 0.9694305

00:00:34.825 --> 00:00:38.171 me to really appreciating how the

NOTE Confidence: 0.9694305

00:00:38.171 --> 00:00:41.256 science and new discoveries could

NOTE Confidence: 0.9694305

00:00:41.256 --> 00:00:44.300 help these types of patients.

NOTE Confidence: 0.9694305

00:00:44.300 --> 00:00:46.288 I think that's when the seed was

NOTE Confidence: 0.9694305

00:00:46.288 --> 00:00:48.138 kind of first planted for me.

NOTE Confidence: 0.9694305

00:00:48.140 --> 00:00:50.394 It's a tough position to be in

NOTE Confidence: 0.9694305

00:00:50.394 --> 00:00:53.071 when there's a question of a cancer

NOTE Confidence: 0.9694305

00:00:53.071 --> 00:00:56.100 diagnosis and people are waiting for a plan.

NOTE Confidence: 0.9694305

00:00:56.100 --> 00:00:58.557 We try to put people at ease,

NOTE Confidence: 0.9694305

00:00:58.560 --> 00:01:00.320 answer all of their questions,

NOTE Confidence: 0.9694305

00:01:00.320 --> 00:01:02.438 come up with a plan together.

NOTE Confidence: 0.9694305

00:01:02.440 --> 00:01:04.897 Really think about all of the options,

NOTE Confidence: 0.9694305

00:01:04.900 --> 00:01:07.105 but just to know that the team

NOTE Confidence: 0.9694305

00:01:07.105 --> 00:01:09.819 is here to take care of you and

NOTE Confidence: 0.9694305

00:01:09.819 --> 00:01:12.409 you know we really want to know
NOTE Confidence: 0.9694305

00:01:12.409 --> 00:01:14.049 what's important to you,
NOTE Confidence: 0.9694305

00:01:14.050 --> 00:01:16.325 what questions you have and what we
NOTE Confidence: 0.9694305

00:01:16.325 --> 00:01:19.327 can do to make things easier for you.
NOTE Confidence: 0.9694305

00:01:19.330 --> 00:01:21.090 I think it's important to
NOTE Confidence: 0.9694305

00:01:21.090 --> 00:01:22.850 have your support team there,
NOTE Confidence: 0.9694305

00:01:22.850 --> 00:01:24.962 and cancer care is really a
NOTE Confidence: 0.9694305

00:01:24.962 --> 00:01:26.779 full team that's involved, so.
NOTE Confidence: 0.9694305

00:01:26.779 --> 00:01:28.824 It's often the patient and
NOTE Confidence: 0.9694305

00:01:28.824 --> 00:01:30.460 their team at home,
NOTE Confidence: 0.9694305

00:01:30.460 --> 00:01:33.709 and then the team that you have here at
NOTE Confidence: 0.9694305

00:01:33.709 --> 00:01:37.005 the hospital and we all work together.
NOTE Confidence: 0.9694305

00:01:37.010 --> 00:01:39.464 We have many studies open for
NOTE Confidence: 0.9694305

00:01:39.464 --> 00:01:41.100 patients with GI cancers,
NOTE Confidence: 0.9694305

00:01:41.100 --> 00:01:43.326 and I've been mostly focused in
NOTE Confidence: 0.9694305

00:01:43.326 --> 00:01:44.810 developing new clinical trials

NOTE Confidence: 0.9694305

00:01:44.870 --> 00:01:47.110 and opening studies for patients

NOTE Confidence: 0.9694305

00:01:47.110 --> 00:01:48.454 with hepatobiliary cancers,

NOTE Confidence: 0.9694305

00:01:48.460 --> 00:01:51.218 and that has been very rewarding and

NOTE Confidence: 0.9694305

00:01:51.218 --> 00:01:54.586 so just in the last couple of years,

NOTE Confidence: 0.9694305

00:01:54.590 --> 00:01:57.025 there's been multiple new therapies

NOTE Confidence: 0.9694305

00:01:57.025 --> 00:01:58.486 for liver cancer.

NOTE Confidence: 0.9694305

00:01:58.490 --> 00:02:01.423 We had participated in one of the

NOTE Confidence: 0.9694305

00:02:01.423 --> 00:02:03.256 groundbreaking phase one studies

NOTE Confidence: 0.9694305

00:02:03.256 --> 00:02:05.751 of looking at the combination

NOTE Confidence: 0.9694305

00:02:05.751 --> 00:02:07.747 of atezolizumab and bevacizumab

NOTE Confidence: 0.9694305

00:02:07.820 --> 00:02:09.700 for liver cancer patients,

NOTE Confidence: 0.9694305

00:02:09.700 --> 00:02:12.822 and just this past year that drug

NOTE Confidence: 0.9694305

00:02:12.822 --> 00:02:15.097 combination was approved and it's

NOTE Confidence: 0.9694305

00:02:15.097 --> 00:02:17.677 just been really rewarding to see

NOTE Confidence: 0.9694305

00:02:17.677 --> 00:02:19.673 the treatment options changing

NOTE Confidence: 0.9694305

00:02:19.673 --> 00:02:22.308 and improving for our patients.
