Announcements

COVID Response

Yale New Haven Health continues to see a daily decline in hospitalizations for COVID-19. While this encouraging progress helps us all to look toward future planning, the leadership of Smilow Cancer Hospital and Yale Cancer Center is focused on the daily protection and care of our patients. We instituted many strategic steps to ensure our patients have access to the cancer treatment and care they need, all while being careful to protect our physicians, nurses, caregivers, and staff.

Whenever possible, we are making a concerted effort to follow-up with our patients remotely. Between March and April, we saw a 187% increase in follow-up visits by video and a 162% increase by phone. The total change in video and phone utilization from March 15 to April 19 was 356%. In just the last week, Smilow clinicians completed 2,115 video and phone visits.

At the same time, patients needing treatment are scheduled with expanded hours offered in many of our Care Center locations to minimize contact and maximize social distancing. Oncologic surgeries are proceeding, as needed, on the Saint
Raphael Campus with maximal precautions taken for our patients. Our Smilow Extended Care Clinic remains open and available for patients with emergent needs by referral from 7am - 11pm on NP1. We have also opened a Smilow Rapid Evaluation Clinic for testing and evaluation of our patients who have a fever or other symptoms of COVID-19 on NP1.

Together, our response on behalf of our patients will continue to evolve each week. Lori Pickens and I are incredibly grateful to all of our physicians, nurses, and staff who willingly respond to each change with strength and humility, always putting our patients first. Thank you all.

AACR Presentations
The American Association for Cancer Research (AACR) held its first-ever Virtual Annual Meeting earlier this week and attracted a vast worldwide audience, with more than 61,000 registrants. Dr. Lajos Pusztai presented the results of the I-SPY trial during the opening clinical plenary with 28,674 live views during the session! Thank you to all of the Yale Cancer Center presenters during the meeting. We are looking forward to the new virtual format, and increased participation from viewers worldwide during the virtual ASCO meeting also later this month, May 29-31.

Plenary Session: Opening Clinical Plenary
CT011 - Evaluation of durvalumab in combination with olaparib and paclitaxel in high-risk HER2 negative stage II/III breast cancer: Results from the I-SPY 2 TRIAL

Cancer Disparities Firewall Distributes Masks in New Haven
Many programs at Yale Cancer Center and Smilow Cancer Hospital have evolved to support the community during the COVID-19 pandemic, and the Yale Cancer Disparities Firewall (CDF) project is no exception. Originally designed to address cancer disparities...
in New Haven, the team recently rallied to deliver face masks to local organizations to distribute to city residents.

Roy S. Herbst, MD, PhD, Ensign Professor of Medicine (Medical Oncology) and Chief of Medical Oncology, and one of the leaders of the CDF project, collaborated with Dr. Naftali Kaminski, Section Chief of Pulmonary, Critical Care & Sleep Medicine (PCCSM). Dr. Kaminski organized the donation of the masks from PCCSM. Jose DeJesus, Community Health Educator, dropped off the masks and instruction sheets to Christian Community Action, Inc.- Food Pantry Program, Meals on Wheels, Coordinated Food Assistance Network (CFAN)-Loaves & Fishes, Downtown Pantry and six soup kitchens to be used by front line staff serving food to the community and to be distributed to city residents.

Notables

Anne Chiang, MD, PhD, has been named a Fellow of the American Society of Clinical Oncology. Dr. Chiang is an Associate Professor of Medicine (Medical Oncology) and Chief Network Officer and Deputy Chief Medical Officer at Smilow Cancer Hospital. The Fellow of the American Society of Clinical Oncology (FASCO) distinction recognizes ASCO members

calm nature. She has been a tremendous support to our teams in North Haven, and we appreciate her flexibility and willingness to step in and help. Thank you, Susan!

Our Integrative Medicine Program continues to provide opportunities to help with your well-being. Please check our calendar for live online classes each week at www.yalecancercenter.org/calendar and access archived classes to try anytime at https://bit.ly/2yEFLTp

Today's #SmilowStar is Pamela-Jean Berkheiser, Administrative Director for our Ambulatory Practice at Smilow Cancer Hospital. Pam has been a calm and steady source of strength for our outpatient clinics, not only ensuring her staff members received the resources they needed, but also working to transition patient care from our main hospital to their new locations in our Care Centers. Pam oversees a team that includes our front desk staff, medical assistants, clinical operations managers, and
for their extraordinary volunteer service, dedication, and commitment to ASCO.

Dr. Susan J. Baserga, was recently appointed as the William H. Fleming, M.D. Professor of Molecular Biophysics and Biochemistry. Dr. Baserga is a member of Yale Cancer Center’s Genomics, Genetics, and Epigenetics Research Program and studies fundamental aspects of ribosome biogenesis, the nucleolus, human diseases of making ribosomes (ribosomopathies), and the impact of ribosome biogenesis on cell growth, cell division, and cancer.

The American Academy of Microbiology has elected 73 new Fellows to the Class of 2020, including Yale Cancer Center’s Akiko Iwasaki, PhD, and Walther Mothes, PhD.

Conquer Cancer, the ASCO Foundation, has announced its annual Special Merit Awards, including the Pain and Symptom Management Special Merit Award, which has been given to Vikram Jairam, MD, a Resident in the Department of Therapeutic Radiology.

The Society for Immunotherapy of Cancer announced Dr. Lieping Chen as one of the recipients of the Richard V. Smalley, MD, Memorial Award and Lectureship, the Society’s highest honor, for his pioneering research in immunotherapy.

Zhengxin (Jason) Cai, PhD, Assistant Professor of Radiology and Biomedical Imaging and a member of Yale Cancer administrative staff. Her leadership, careful oversight, and attention to detail not only managed the packing and unpacking of the exam rooms from Smilow to new temporary space in North Haven earlier this month, but her team also provided our patients with the information they needed to help reschedule their appointments in a timely manner, minimizing disruption to their care and alleviating anxiety. Pam, thank you for your commitment to Smilow Cancer Hospital!

Yale Cancer Center researchers have found a new inhibitor that in animal studies demonstrates greater potency against a wider variety of cancers, as well as against solid tumors, and also produces fewer side effects compared to others in the class.

In animal studies, the Yale researchers examined the impact of the new inhibitor, called NHWD-870, on ovarian cancer, small cell lung cancer, breast cancer, lymphoma, and melanoma. They found it was between 3 times and 50 times more potent against cancer cells than existing BET inhibitors.
Center's Radiobiology and Radiotherapy Research Program, has been awarded an R03 grant from the National Institutes of Health (NIH) to develop a PARP PET radiotracer. Collaborators on this project include Drs. Henk De Feyter, Mark Saltzman, and Ranjit Bindra.

Daniel Coman, PhD, Assistant Professor of Radiology and Biomedical Imaging, recently joined the Radiobiology and Radiotherapy Research Program. His research interest is the development of molecular imaging methods to reveal the physiological and chemical alterations underlying disease in preclinical and exploit them in clinical models. Dr. Coman pioneered an ultrafast chemical shift imaging technique, Biosensor Imaging of Redundant Deviation in Shifts (BIRDS).

Dr. John Onofrey discussed the use of Artificial Intelligence to improve imaging for prostate cancer on Yale Cancer Answers. Tune in to hear how AI is making a difference for our patients! You can also download our weekly podcast through iTunes.

Kathleen Moseman, RN, BSN, MHA, Patient Services Manager at Smilow Cancer Hospital, has been a true #SmilowStar during our transition of patient care from NP 4 and NP 8 to North Haven recently. Without hesitation, Kathleen identified new work flows to ensure patient care was uninterrupted, and was instrumental in moving her patient support teams to the new location. Kathleen’s steadfast leadership and dedicated efforts contributed to our successful first week in North Haven. Thank you for your commitment to our team, Kathleen!
for mapping the acidic microenvironment of cancer.

**Third Annual YCC Trainee Colloquium**

Yale Cancer Center (YCC) will hold its Third Annual YCC Trainee Colloquium virtually on Friday, June 5, 2020. This will be a forum for Yale trainees to highlight their research, exchange ideas, and initiate collaborations. This year, we invite predoctoral MD, PhD, MD-PhD students, postdoctoral associates, postdoctoral fellows, residents, clinical fellows engaging in cancer research, and graduates of the Cancer Biology Training Program to submit abstracts describing their work.

The colloquium will include presentations from trainees in the following four areas: 1) Basic Science Research and Bioinformatics, 2) Translational Research, 3) Clinical Research, 4) Population Science, Prevention, and Outcomes Research. Winners will be announced during the colloquium and each awardee will receive a certificate and an award of $250.

We understand that your research progress may have been delayed due to the COVID-19 shutdown, and we encourage you to submit the data that you have. We will consider this important factor when we judge your work.

**Submission Guidelines:**

- Abstracts should be 300 words or less, and may include one figure
- The deadline for submission is May 15, 2020 at 11:59pm EST

Have you found a heart to share with us online and tag #SmilowHearts? Look at some of the beautiful images we received this week.

All heart photos submitted will be used in a future art installation project in the main lobby of Smilow Cancer Hospital. You can also email your photos to dana.brewer@ynhh.org. We look forward to seeing your hearts!

The staff at our Smilow Cancer Hospital Care Center in North Haven wanted to do something to welcome the patients and visitors that come to our building. They miss the family members and visitors who usually accompany our patients to the fourth floor for treatment, so the team created this special greeting for everyone in the parking lot!
Please submit your application online.
Questions, please email Meina Wang.

Employee Profile: Katherine Allen

People often think that as a Registered Dietitian, Katherine Allen’s job is to tell them what to eat, which is part of it, but there are many other aspects, including providing education, support, and critical clinical care. In her role as a dietitian for the Smilow Pediatric Hematology and Oncology Program, Katherine works with patients and families both inpatient and outpatient, to manage side effects and make sure nutritional needs are being met.

Once patients are no longer receiving treatment, Katherine meets with them

Lisa Barbarotta MSN, APRN-BC, AOCNS, Senior Manager of Oncology Nursing Education and Practice for Smilow Cancer Hospital, is a #SmilowStar! Over the past month, Lisa has been the calm in the eye of the storm as our teams have created multiple new clinical processes to ensure the safety of our patients. As a nursing leader, Lisa has worked nonstop to update and educate our nursing teams and has continuously kept them informed on evolving protocols related to clinical practice, PPE, and operations. In addition, Lisa has led our efforts to develop and launch the Smilow Rapid Evaluation Clinic to quickly test our patients with worrisome symptoms and further protect them from viral exposure in other parts of the hospital. Lisa’s leadership and tireless efforts provide consistency between many workgroups, bringing several complicated initiatives together in this time of crisis. Thank you, Lisa!

Our Smilow Cancer Hospital Care Center in Trumbull recently received a donation of hand sanitizer from Mizzi Cosmetics, a local Connecticut company that switched its operations over the last month to make sanitizer in response to the critical need. Thank you for your
as part of their visit to the HEROS Clinic, which under the leadership of Dr. Nina Kadan-Lottick, monitors for recurrence, screens for possible late effects from treatment, and teaches how to live a healthy life with nutrition, exercise, and stress management. For these patients, obesity and increased risk of cardiovascular disease are the biggest obstacles when it comes to nutrition. While receiving treatment, the nutritional needs of patients vary, and Katherine provides individualized plans that include the entire family, when possible.

"I work with families to help them identify side effects, and find ways to get creative with their options," said Katherine. She is also involved with educating family members if nutrition support such as a feeding tube is required, and they are transitioning to home care. "It's a very family-centered approach. I try to prepare the family as much as possible for alternative feeding methods, and building a strong relationship helps if tough conversations are needed. The families I work with are so joyful and hopeful that it inspires me every day."

Dr. Kadan-Lottick commented, "During cancer therapy, it is important to maintain weight to prevent overweight or underweight patients, which are both associated with worse cancer outcomes. Post-therapy, survivors are at increased risk of becoming obese and having cardiovascular complications that can be managed with improved diet. Katherine problem solves with families by phone, in person, and through email. She has a particularly sweet relationship with many teenagers who ask her for frequent advice and view her as the go-to person for their health questions."
